**MINUTE NOVEL**

**Vail**  
 by bob woodless  
 Shallow Throat, a minor figure in the continuing saga of the unfolding story of the CIA's involvement with the sell of arms to Vale, Colorado, had been with the CIA for over 20 years when he first met Ronald Reagan's appointment to the position of DCI, William Casey.

Throat came to be in the CIA as a result of his service to the OSS, the CIA's predecessor. Throat really didn't have anything to do with the story, but it takes a lot of extemporaneous material to fill out a really big novel. The publisher said I had to put in a lot of established fact in order to balance all the innuendo.

So, anyway Throat became a player in the scandal when he spoke to Olly North one day and said, "Nice weather we're having, huh Ollie." North took this to be the code phrase which provided him with authorization to think about sending a memo describing the proposal which would eventually lead to the discussion of the possibility of maybe telling the Undersecretary to the Secretary to the Advisor to the President. The rest was history.
