

# Don't just worry about HIV. Do something about it.

Just worrying about HIV infection won't do you a bit of good. But knowing whether you are infected can.

Today, it's more important than ever to get tested. There are things you can do that can help you live longer.

Also remember, if you are infected, you can pass the virus to others through sex or sharing drug needles and syringes, even if you show no symptoms.

Talk to a doctor, your health department, or other AIDS resources within your community. Or call your State or local AIDS hotline, or the National AIDS Hotline at 1-800-342-AIDS. Call 1-800-243-7889 (TTY) for deaf access.

AMERICA  
RESPONDS  
TO AIDS

HIV is the virus that causes AIDS.
