### Veracruz company re-creates Mexican dances

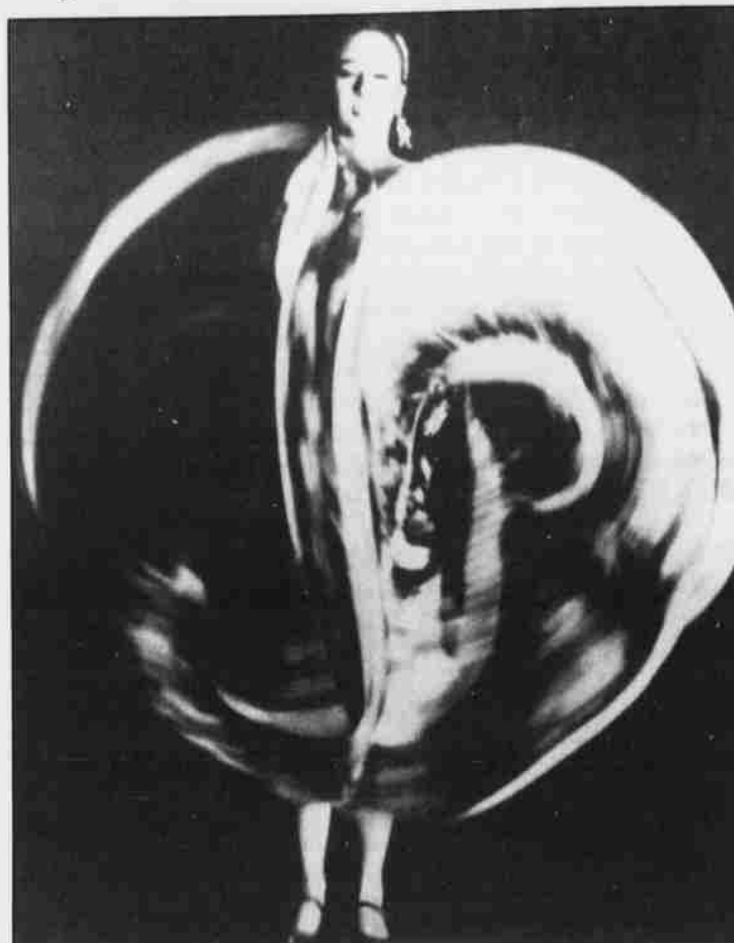

The popular Ballet Folklorico "Quetzalli" de Veracruz will come to the Artemus Ham Concert Hall May 14 at 7:30 p.m. for a performance of authentic folk dances from different regions of Mexico. The group will perform music and dances from five different states of Mexico, including their native Veracruz.

The company of nearly 20 represents the finest in music and dance from the culturally rich area of Veracruz. It is supported by the Department of Tourism and Economic Development for the state of Veracruz.

Some of the dances that will be performed include "jarabe nayarita," which uses machetes of the region and also the well-known dances of Jalisco, which are associated with the music of the mariachi. From Guerrero there will be selections such as "the iguana" and "the bull," as well as ceremonial religious dances from Chihuahua and the Tarahumara Indians.

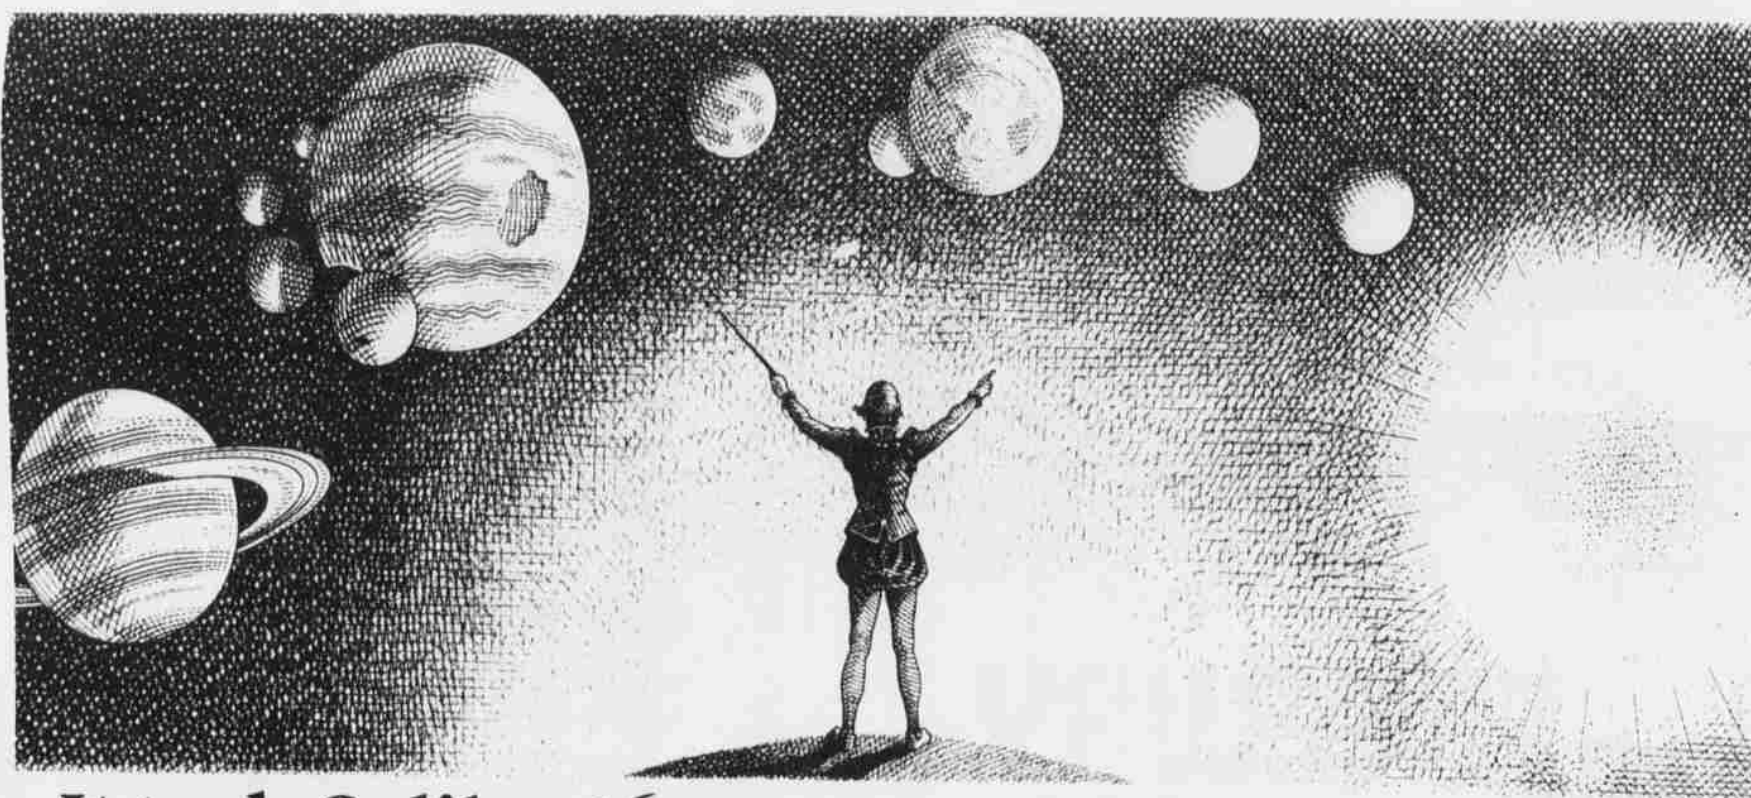

From Veracruz will be the "sones jarochos," which feature experts in the folk harp, the jarana, requinto and others. The music is from the region of Sotavento, home of the jarochos. The most well-known piece from this area is "La Bamba."

The company of 12 dancers and five musicians will be in the United States for three weeks performing in Florida, Arkansas, Louisiana, Georgia, Arizona and Nevada. For more information on the Las Vegas performance, call 739-3801 or 796-0646.

It took Galileo 16 years to master the universe. You have one night.

It seems unfair. The genius had all that time. While you have a few short hours to learn your sun spots from your satellites before the dreaded astronomy exam.

On the other hand, Vivarin gives you the definite advantage. It helps keep you awake and mentally alert for hours. Safely and conveniently. So even when the subject matter's dull, your mind will stay razor sharp.

If Galileo had used Vivarin, maybe he could have mastered the solar system faster, too.
