

Welcome to the Spring 1992 recruiting season! We look forward to working with you in this exciting, yet challenging year. We hope that you as a graduating student will take advantage of all the services we offer and not just restrict your job search to on-campus recruiting.

Don't forget to take advantage of our interviewing, resume writing, job search and career planning workshops held throughout the Spring semester. Pick up a Spring 1992 Master Calendar for all dates and times.

Career Information:

Career Day 1992 will take place on the second floor of the Moyer Student Union on Wednesday, Feb. 12 from 9 a.m. until 2:30 p.m. This is your opportunity to meet employers who might not otherwise be recruiting on campus and talk to them about future career opportunities. We anticipate close to 100 organizations will be participating from a diversity of industries. Be sure you are there!

Career Day strengthens students' future ties

by Kimberley McGee

Career Week is Feb. 10 - 14 and is a great opportunity for all students and alumni to realize what the work world has to offer. Throughout the week, the Alumni Association will have alumni who work in many fields come into the classrooms and talk to students.

Career Day will emphasize the student's need to be aware of the different facets involved in choosing, obtaining and enjoying their particular career choice.

"It is an opportunity for students to start asking intel-

ligent questions and finding out what is out there," said Eileen McGarry, director, Career Planning and Placement Office.

It is also a chance for companies to get exposure with the future potential work force-students.

Students will see a diverse choice of companies whose representatives come and set up interviews for students on campus.

"It is a great opportunity for students to get exposure to companies, to get students to think of the possibility of joining their organization," McGarry said.

Career Day is a special opportunity for seniors to network with companies and identify any possible leads.

"In the past we certainly have had a lot of seniors end up with job offers as a result of (Career Day)," McGarry said.

Students can use Career Day to explore opportunities for the future and as a vehicle to develop related opportunities in their field.

McGarry encourages students to "not be intimidated by the suits" and to attend Career Day in order to truly take advantage of what companies have to offer.
