Network

from pg. 6

This "Seeking" line replaces the standard title line on most business cards and makes it stand out in the eyes of the receiver. You can order 200-500 for a minimal cost at most print shops.

The simple mechanics behind developing a network contact involves making a phone call to the person and telling them, "I would like to include you in my network of job contacts." Then explain succinctly what you are looking for (have your 30-second "elevator pitch" down pat) and offer to send them a copy of your resume and several networking business cards.

Then ask them to contact you directly if they are aware of anyone who could be of further help. This important last step is what expands your network out to second and third levels. And by giving you the opportunity for direct contact with these next level contacts, you are able to expand your network exponentially.

Who to contact? First, contact your relatives. And not just your immediate family—branch out into the family tree. And not just those who are "well-connected in business." Aunt Mabel may play bridge with someone who knows someone who may have an interest. Remember, it's not who they are, but whom they know.

Next, contact friends—old and new, high school and college, neighbors and social acquaintances. Some of the best contacts in this group are your college friends who graduated last year. They're already through the job search process and probably have lots of contacts and free advice.

Contact every known entity within your college—professors, advisors, administrators, coaches (they are often amazingly well-connected), and anyone else who has ties to your school. Some of the best contacts within this group are alumni—make sure you get in

contact with alumni who are working for any target companies, within your target geography, or within your chosen profession.

Spend an afternoon at the campus alumni affairs office. They're usually more than willing to help. Lastly, contact past and present employers, professional associations, and social contacts through a church, synagogue, club, or other organization.

With this contact information in hand, you now have insider access to a plethora of companies that you may not have been aware of previously. In making contact with the employer, you now have a referral source who can not only assist you in getting in the door, but can walk you through the required steps on your way toward a potential position.
