BE LESS PRODUCTIVE AT THE OFFICE.

The office has always been a place to get ahead. Unfortunately, it's also a place where a lot of natural resources start to fall behind. Take a look around the next time you're at work. See how many lights are left on when people leave. See how much paper is being wasted. How much electricity is being used to run computers that are left on. Look at how much water is being wasted in the restrooms. And how much solid waste is being thrown out in the trash cans. We live in a big, big world. Now here it's a connected world. DO YOUR SHARE.

A REFRESHER COURSE IN HOME ECONOMICS.

It's like you to take this simple test to see if your home is as energy efficient as possible. Ready? Let's begin. How many of you have TVs? How many times have you left the room and left a lamp on? How many times have you fallen asleep watching it only to wake up to the "Star Spangled Banner"? And what about your lamps. As I light? Do you turn them off when you exit a room? Is your house excessively lit during the day? Next, check your thermostat. Odds are, it could use adjusting. And finally, see if there's a draft coming from your windows and doors. If there is, your letting valuable energy fly right outside. Now, for the answers. Try installing timers on your lights and television. If overhead lights illuminate by 6:00pm, you could save up to \$9,000 worth of electricity. As for your windows and doors, a couple packages of \$3.00 weather stripping should do the trick. Each of these things will help save natural resources for the years to come. And if we can do that, we all deserve high marks. **FOR MORE INFORMATION, AND TIPS, CALL 1-800-MESURE.** IT'S A CONNECTED WORLD. DO YOUR SHARE.
