## Managing the common cold

*Cold season is here and the Student Health Center has compiled some advice for treating and preventing the dreaded cold.*

**Treatment:**

- Don't treat your cold with antibiotics.
- Drink one gallon of liquids a day.
- Take aspirin or other over-the-counter pain medication
- Use disposable tissues, not handkerchiefs.
- Don't smoke.
- Get plenty of rest.
- Gargle with salt water to relieve sore throat.
- Inhale warm moist air to soothe inflamed mucus membranes.

**Medication tips:**

- Pseudoephedrine, sold as Sudafed or Afrinol, relieves congestion.
- Mild antihistamines, such as Chlor-trimeton and Dimetane for runny nose.
- Dextromethorphan, found in Delsym or Benylin DN for dry coughs.
- Coughs with phlegm can be treated with cough syrup including Robitussin.

**Prevention:**

- Wash your hands often and avoid touching your face.
- Eat a balanced diet.
- Avoid prolonged contact with people who have colds.
- Keep your stress level down.
- Keep your room humidity moderate to high.

**Symptoms:**

- Scratchy or sore throat
- Sneezing
- Clear nasal discharge
- Tenderness around the eyes
- Stuffy nose
- Full feeling in ears
- Aches
- Cough, dry or with clear or white mucous
- Tearing (watery) eyes
