

# Winning wars still hasn't won the peace.

On the 6th day the war ended.

On the 7th day the war began.

In 6 violent days the people of Israel courageously defended their land and civilization. But no sooner did one war subside than another began. A war of continuous border attacks. Of surprise and deadly sabotage. A war in which farmers must protect their lives while tending their sheep.

Israel pours out all her resources, gives all her effort to protect her people. And while she does, her people are faced with human

crises within her borders. The more than 300,000 immigrants who must be absorbed, fed, clothed and housed. Who must be educated, retrained and given jobs. Whose sick, handicapped and aged must be cared for.

The United Jewish Appeal asks you never to forget that as long as the war that started on the 7th day continues, people in Israel need your help. More than ever before. Israel must live.
