ISRAEL'S NEW WEAPONS SYSTEMS

TEL AVIV (WNS) - Defense officials, in a preview of weapons to be shown for the first time at Israel's Independence Day celebration, has taken the wraps off three new weapon systems. They are an improved Patton tank that now mounts a 500mm cannon and has a speed close to 50 m.p.h.; a new self-propelled 90mm anti-tank manned by a crew of five and mounted on half tracks; and speedy new missile boats of the "Saar" class that sport eight Israeli-built Gabriel surface-to-surface missiles.

The ships were built in France to Israeli specifications and can be used to attack other vessels, provide coastal defense and support other naval operations. The electronically guided missile is unlike anything used by Western nations and was designed to fly low over ocean and sink other vessels. Israel lists seven missile ships with five others, spirited from France last Christmas reportedly sold to commercial interests for oil exploration purposes. The five ships have dropped out of the news.

Defense officials also said that Israel was now manufacturing almost all its ammunition other than those items that were more convenient to purchase abroad.

TEL AVIV (WNS) - Fighting on the Lebanese front led to six Israeli casualties last week as terrorist groups operating from that Arab state stepped up their activities.

The dead included three soldiers killed in a clash with terrorist operating from the Mt. Hermon area in Lebanon and three civilians.
