

Would you like Tomorrow's car. today?

We wish we could bring it to you. It may even be powered by electricity! We also wish we could bring you tomorrow's power plant today . . . silent, invisible and pollution free. That's our problem. We at Nevada Power Co. must be concerned about the future, and it takes years, from the beginning of design to completion, to get a new power plant "on the line." We desperately need tomorrow's technology . . . today. But we sincerely believe that a nation that can take a man to the moon and back can solve these problems, and we're working on them, because . . .

We live here, too!

NEVADA POWER COMPANY
