POWER: where does it come from?

COAL 40% **GAS OIL 30%** **DIESEL 3%** **HYDRO 10%** **PURCHASED POWER 17%**

As you can see, we get the fuel to generate your electricity from a number of sources. And, unfortunately, the most efficient and least expensive energy sources are not always available to us.

We at Nevada Power feel, however, that it is our obligation to provide a growing Southern Nevada with the electric power it needs. This is not easy in the face of the energy

crisis... and it's costly to do it and yet keep within our environmental mandates.

We're working on it, but we need your help, too. Conserve energy every way you can, at your home and at your business. It all adds up.

After all, you live here, too!
