Open Letter to Carter

By Rabbi Samuel M. Silver

Dear Mr. President:
Too much snow knocked out a Chicago mayor
Too little gas may knock you out.
Hence, for your own sake and that of our nation, dramatic steps are needed.
In World War II, we spent untold resources on Operation Manhattan to create a weapon which would destroy our foes.
Why not a similar crash program to develop solar power?
Operation Emancipation could speed the advent of a new age of energy which would free us not only from the grip of the shieks but from the peril of nuclear incineration.
Is the current crunch due to a reduction of oil production in Iran?
Then why not go to Iran? Talk to the reining guru. Urge him to step up production.
At the same time you might protest the cold-blooded reign of massacre he has created.
You went to Iowa. You went to New Hampshire. Why not Iran?
If you don't go, rest assured Sen. Dole or one of his fellow-runners will in emulation of Ike's famous statement, "I'll go to Korea." That, they say, won him the White House.
Bold and decisive action is needed. Most of the proposed measures to deal with the matter have been like a band aid.
We need grand aid. You can provide it, if you bestir yourself.
