

The Tom Miller family, like yours, enjoys living in Clark County, but knows things can be better.

**"...a time for vision,  
a time for action."**

Inadequate traffic planning in past years has made getting across town an increasing problem for everyone.

**TIME FOR VISION**

The love and happiness Tom Miller shares in his family life with his wife, Judy, and their sons, Todd and Billy, gives him a special ability to see and understand the greatest resource in Clark County; it's people.

As a member of the Planning Commission, Tom has seen an acute need for a concentrated, united effort by city and county commissioners to meet problems head-on and find effective solutions.

Tom feels we should strive for a return to the old fashion, "common sense" approach to government.

"Political and personal differences must be put aside so plans can move ahead for the benefit of Clark County and its people."

For example, Tom feels our senior citizens have earned our support. They have given much and many now find themselves trying to live dignified lives on fixed incomes while increasingly becoming the unwitting targets of criminals and others.

We are now experiencing problems that should have been anticipated and solved years ago. Increasing crime, worsening traffic and street conditions, and inadequate mass transportation are just a few.

**TIME FOR ACTION**

- Strict regulation of nuclear waste and toxic chemical shipments in Clark County.
- Exhaust every legal recourse of local government to prevent release of criminals from METRO jail.
- Priority funding for development of '911' emergency phone system for police, fire, paramedic and ambulance protection.
- Immediate priority to synchronize traffic lights along key routes by "fast-tracking" construction schedules.
- Develop flood control collection ponds on slopes above populated areas, using BLM land.
- Preserve priority of program funding for Senior Citizens and persons on fixed incomes.
