

ISRAELI SOLDIER RECOVERING

JERUSALEM -- BEHIND THE WHEEL OF HIS CAR IS AVI SUISSA, WHO SUSTAINED THIRD-DEGREE BURNS OVER 85 PER CENT OF HIS BODY WHEN HIS TANK WAS HIT ON THE SYRIAN FRONT IN LEBANON. MIRACULOUSLY RECOVERING AFTER SIX MONTHS IN THE INTENSIVE CARE BURNS UNIT AND IN THE REHABILITATION MEDICINE INSTITUTE AT THE HADASSAH-HEBREW UNIVERSITY MEDICAL CENTER, HE MUST WEAR BANDAGE SUIT FOR 12 - 18 MONTHS. HIS APPEARANCE HAS CAUSED SUCH CONSTERNATION THAT HE HAD TO ASSURE THE PUBLIC VIA TV APPEARANCES THAT HE WAS NEITHER AN EXTRA-TERRESTRIAL NOR A ROBBER IN DISGUISE.

PARIS (WNS) -- A public opinion poll released showed that a majority of French people favor re-instatement of the death penalty in the case of Klaus Barbie, the one time gestapo chief of Lyon who will be tried in that city for "crimes against humanity."

SOVIET MISSILES IN SYRIA

(Continued from Page 1)

their own troops, indicates that the new Soviet leadership has decided not only to expand significantly its commitment to Syria's war-making capability, but also signals its determination to maintain a position of influence in the Middle East heartland.

By supplying such a highly visible weapon, the Soviets also put the prestige of their own military on the line. As such, the construction of SA-5 complexes in

Syria can be compared directly with the deployment of Soviet air defenses in Egypt in 1970, though the numbers of men and quantities of equipment are not yet comparable. It is highly possible, however, that the SA-5 complexes may represent just the first stages of a larger commitment. In order to protect the SA-5 complexes from possible Israeli air attacks, the Soviets may install other Soviet-operated air defense weapons as well, including, other point

defense anti-aircraft weapons (possibly including SA-8, SA-11 or SA-13 surface-to-air missile batteries) and interceptor aircraft.

The entry of Soviet combat troops into Syria has broader implications for the United States and even for NATO. Soviet A-5 missiles in Syria inevitably affect the security of Turkey, since they pose a potential threat to NATO air bases in eastern Turkey. In addition, the specter of a potential superpower conflict in the region is presented by the Soviet deci-

sion to send their own troops to man the SA-5 complexes. Should the Soviets fire SA-5 missiles at Israeli aircraft, Israel would be compelled to attack the complexes. This could lead to an extremely serious situation, one that could lead to a superpower confrontation.
