

There IS a way!

To improve Social Security as the foundation for dignified Retirement Living

To balance the federal budget through a reasonable tax on the concentrations of wealth.

To eliminate the government deficits which are now forcing disastrous economies which are depriving our Veterans and Senior Citizens of proper medical treatment and other necessities.

To abolish payroll taxes which will create millions of new jobs and more opportunities for Senior Citizens to use their wisdom and expertise.

To lower health care costs without destroying medical quality.

To make insurance costs affordable again.

As a man who shares your concerns,
I want to be your Congressman.

As your Congressman, these will be my goals.
