European Countries Tax Salt. Salt is in many European countries a heavily taxed government monopoly. Italy patrols its beaches to prevent poor people from evaporating sea water for low grade salt.

AGAINST THE PUBLIC INTEREST.

Overzealous Reformers Work for Law Against Proprietary Medicines.

"Schemes to diminish or destroy the sale of proprietary medicines are constantly being devised by interested parties. Every now and then some with the demand for a law to require pation and sustenance. The astonishevery package of proprietary medicine to be labeled with a printed the coast line and the islands from statement of the 'formula,' showing Friesland to the north more populous just how it is manufacture. The mil- than the interior. It was impossible medicines seem to be satisfied; but ged race should confine themselves to the man with a mania for regulating the most peaceful of employments, esthe affairs of other people or who has some personal interest to serve is the one who agitates the proposition. To a person who has never taken time to consider it, such a proposition may seem reasonable enough; yet it is in fact nothing more nor less than a scheme to compel the manufacturers to put their trade throughout the entire country at the mercy of every commercial pirate who might choose to flood the market with imitations of their goods.

"Under such conditions the incentive for the original manufacturer to advertise his goods would be practically destroyed, for the money spent on advertising would inure mainly to the benefit of the pirates and imitators. Without advertising, the public would receive little information in regard to the medicine, and all future sales would be greatly impaired if not wholly destroyed. It is mainly by judicious advertising that the knowledge of proprietary medicines is brought to the public. Nothing is more certain than that millions of people have found relief at a comparatively small expense by the use of some remedy first called to their notice through newspaper advertising. Why, then, should the manufacturer of a meritorious proprietary remedy be compelled by law to practically destroy his business as a condition of being allowed to carry it on? Yet that is exactly what these formula bill's-mean.- Exchange.

The ice industry began in Boston in 1805, when a man by the name of Tu dor shipped it to Martinique.

Advancing the Farmers' Interests.

Traveling agents and salesmen are now sent from the home offices of the Chicago packers into all South American and Asiatic countries. They are going into every land, no matter what language may be spoken or what money be used. They will exchange their goods for cowries or elephant tusks-anything to sell the product and get something in return convertible into money. It may seem odd to some folks, but traveling men, carrying cases with samples of American meat products, can be seen in the desert of Sahara, the sands of Zanzibar or in Brazil, "where the nuts come from." Great is the enterprise of the Yankee merchant. The greater the market, the greater the price and stadity of the price of the product and all that goes to make it in its various

# Viking Spirit Lives To-Day

"Yes, we are peasants and fishernen, and we are proud of it," was the haughty answer of a Norwegian statesman to a Swedish slur cast upon his people, and the answer' showed that the Norwegians still retain the indomitable spirit which made their ancestors a thousand years ago dreaded by the population of every coast' of Europe, says a writer in the St. Louis Globe-Democrat. Only 2,000,000 in numbers, far exceeded in strength and resources by the sister kingdom, Norway nevertheless still retains a spirit of sturdy independence which prompts its people, when dissatisfied with a union, to set up for themselves

Who Were These Vikings? The Norwegians are but one branch of the great Scandinavian family. Long before the time when Augustus bewailed the loss of the legions led by Varus into the wilds of the Teutoburg, the Scandinavians ruled with undis-

They say that the Vikings were the first Europeans to cross the Atlantic. that one after another explored the coast and returned to Greenland, thence to Iceland and home again, and thus were the Danes the first to discover the new world. Be this truth or fable, there is no doubt that the spirit of the sea kings was transferred to this side of the Atlantic as soon as the war began between the colonies and the mother country.

For what was Paul Jones but a Viking of the genuine Danish type? His ancestry is uncertain, but John was a patron saint of Scandinavia. Jones is a derivative of John and one of the commonest of names on all the shores of the North sea. For aught we know, or for aught Jones knew, he may have been a descendant of a royal Viking family, for he was born on the Frith of Forth, where the Danes had fortified settlements and where to the present day most of the population give indications of Scandinavian origputed sway the shores of the Baltic in. It is queer, too, in connection with and the coasts of Sweden, Norway, his ancestry that as soon as he was

Holland and Denmark. Living as they did in an inhospitable region, for of the 124,000 square miles of Norwegian land less than 5 per cent is arable; the real Norsemen looked to the sea sealous reformer comes to the front rather than to the land for both occuing fecundity of the race soon made pecially when they learned, as they soon did, that to the south and west there were rich countries, comparatively undefended. Under the leadership of the younger sons of kings and noblemen the fishing fleets were soon transformed into pirate flotillas and then the Vikings began to be a scourge along the shores of Britain and France

Thrice, under different names, did the Scandinavians and their descendants effect the conquest of Great Britain. More than once they reached Paris, repeatedly they were seen far up the Thames. In course of time they began to winter in captured villages in Britain and France; then came permanent settlements, the acquisition of land and fitful attempts at cultivation of the soil.

The Viking in Trade.

Then came the era of the great trading companies, when every maritime nation in Europe organized as-

Descendants of the Vikings.

sociations for the purpose of fostering colonization and commerce. Dutch vied with English, Frenchmen with Spaniard, in exploring the coast of the newly discovered continent beyond the Atlantic, in assembling fleets loaded with colonists, traders and their goods, to bring to Europe the wealth of America, of Africa, of India, of China, of the rich islands of the southern seas. It is impossible, however, for any considerable length of time to repress the animosities of na-tions or the warlike spirit of individ-

The fact that Spain enjoyed the lion's share of trade with America was sufficient of Itself to excite the hatreds of rival nations, and the viking spirit briefly diverted into

tootloose with a roving commission he should make for the North sea, the original home of his Norse ancestors and win one of his greatest victories in sight of the shores which ten cen turies before had been ravaged by men of his own race. And who was Perry but a Viking, and Decatur and Farragut and the rest of the long and noble line between the last great American admirals, who won at San crushed an English fleet in sight of Albion's shores-what were they ali but Vikings? And now the Vikingspirit has overleaped the Pacific and appeared among the natives of a long string of islands, reaching almost from the arctic circle to the tropics But who furnished them an example? Who introduced them to civilization? Who taught them that they might be come rulers of the sea as well as of the land? It was Perry, the American Viking, the son of a sailor, born by the sea, the descendant of a family many of whose representatives had seen naval service under the flag of more than one maritime nation.

Viking Spirit Worldwide.

Thus by a curious chain each his toric link of which is complete the Viking spirit of Scandinavia has gone round the world. From Denmark and Norway it crossed to England, then round the coast of Europe it went into the Mediterranean; inspired alike the Christians, who won at Lepanto, and the Moslems, who lost; lingered on the southern shore of the land-locked sea, prompted the adventurous voyages of Columbus as it did those of the Danish explorers of the northern coast, blazed out in the buccaneer war, was rekindled by the American revolution and now reigns supreme in the Sea of Japan. The Viking spirit is the development of special conditions operating in a particular region. It was early developed in the Grock islands under circumstances closely analogous to those of Norway and Denmark. It has been lost by the Greeks. Its latest inheritors are the Americans and the maritime race beyond the Pacific, which has proved itself invincible against naval attack by the greatest, though most unwieldy, empire of continental Europe.

Fads of Royal Personages. When King Edward was Prince of Wales, he was a diligent collector of pipes, but he was not by any means the only one among European royalties who indulged in the "collecting fad." The Czar of all the Russias, for instance, collected stamps and the eggs of birds of prey. William of Germany had a fine collection of autographs, the passion for which he shared with his brother rulers, the kings of Roumania and Sweden. The Queen of Italy gathered in what shoes and gloves she could that had been worn by sovereigns of the past and present. She was the proud possessor of the shoes of Marie Antoinette, of Mary Stuart, the Empress Josephine, Queen Anne and the Empress Cather

ine of Russia. Heavy Runs of Salmon. Schooners from the North are bringing large cargoes of salmon to Pacific coast ports. One arrived in San Francisco a few days ago. She had a crew of forty men and 4,246 barrels of fish on board. That meant from \$500 to \$700 a man for three

#### AWFUL NEURALGIA

Mr. Porter Thought He Should Go Mad But Dr. Williams' Pick Pills Cured Him.

"It seems like a miracle that Dr. Williams' Pink Pills should have cured my neuralgia," said Mr. Porter. "They are certainly a marvelous medicine and I am always glad to recommend them. "For two years," he continued, "I had suffered almost unendurable pains in my head. They would start over my eyes

head. They would start over my eyes and shoot upward most frequently, but they often spread over my face, and at times every part of my head and face would be full of agony. Sometimes the pains were so intense that I actually feared they would drive me mad.

"My eyes ached constantly and there was always a burning sensation over my forehead, but the other pains varied, sometimes they were acute, and again they were dull and lingering. I could not sleep. My temper was irritable and I got no pleasure out of life.

"I tried remedy after remedy, but finding no help in any of them, I became a despairing mah. Even when I began to take Dr. Williams' Pink Pills I had no great hope of a cure.

"That was in December of 1903. To my surprise, a change in my condition took place right away. The pains grew less intense and the acute attacks were further apart, as I kept on using Dr. Williams Dish.

further apart, as I kept on using Dr. Wil-liams' Pink Pills. The improvement be gan with the first box, and when I had used six boxes I stopped. My cure was complete and has lasted ever since."

Mr. Charles H. Porter lives at Raymond, N. H. He is one of many grateful people who have found that Dr. Williams Pink Pills will cure diseases of the nerves that have stubbornly resisted every other remedy tried. Not only neuralgia, but sciatica, partial paralysis and locomataxia yield to them. They are sold by all druggists, or may be obtained directly from the Dr Williams Medicine Co., Schenectady, N. Y.
