Bore Throat Develops Into Bronchitis Mrs. Addie Harding, 121 W. Bright-on Ave., Syracuse, N. Y., writes: "I have been a user of Peruna for the past twelve years. With me it is a sure preventive of colds and many other

"Two or three times a year I am roubled with my throat, a kind of raw peling, turning to bronchitis. I have ad the services of my physician in ach case. Two years ago, when I felt a spell coming, I tried Peruna to check it, and to my delight was not roubled with the smothered and chok-ng feeling and never have been since. can check it every time with Pe-

Wrote a Book.

"I have been told," said a man of periences, "that it is not unusual for men to spend much thought and toll over inventions of one sort and another, only to find when they took these things to Washington to be pat ented that the same ideas had lo before been worked out by somebod; else and that patents had already been issued on them. I had that ex perience, once, with a book.

"I spent fourteen years, once, writing a book and I had it all but com pleted. And then one day, stopping at a second-hand book stall, I picke up from among a lot of books offered at five cents each one that bore a title in the very words that I had decided upon for the title of my book; and the opening sentence in this book was almost identical with that in my own.

"Somebody else had had the same idea that I had worked over so long, and had written and published a book about it fifty years before."

Rubber Prices Go Up.

It is thought likely, says the Journal of the Society of Arts, that the present year may see a considerable further advance in prices for rubber, but it may be expected that before long the supply will be ample for all demands. Not only are there immense tracts of rubber which remain untouched in Liberia and elsewhere, me. I gave it a trial, although I but the cultivation of the thought at the time it would be just is being rapidly extended. but the cultivation of the rubber tree

Noiseless Paving.

The London County council has decided to pave with noiseless material the portions of street car tracks in front of churches and the education committee has proposed that similar material be laid in front of schools.

MANY YEARS OF LABOR LOST, SEXES DIFFER IN CURIOSITY

Development Result of Struggle for Racial Existence.

As to a woman's curlosity, it may be said at the outset that she is not so curious, by an infinite measure, as is man himself. Women, it is true, are persistently and assiduously curlous; but men also are not only persistently and assiduously but patiently and systematically curious. It is the character of female curiosity that makes it apparently contemptible. Scientific men of every kind have no raison d'etre for their infinitely patient research save pure curlosity alone; and their curiosity has no more purpose in it than has the curiosity of the woman who cannot rest until she finds out all discoverable facts about her neighbors, or the cause of a mysterious sound by night.

These two forms of curiosity, the male and the female, originated no doubt in the early needs of the race long before men appeared on the earth. The male animal is interested in the causes of remote things—things which upon being run down might turn out useful for food purposes. The female is interested in the quick investigation of near and small things which may turn out a menace to the lives of her young. The female watches with intense and lively interest the vicinity of the nest or lair; the male is prompted to look abroad-away from the lair, in or towards fields where his daily prey is found. These two kinds of curiosity were among the most potent instruments in the struggle for racial existence and in the ultimate development of man .- National Magazine.

Here. Why?"
"Because I heard old Mr. Dinken-kopf telling another man to-day that the Geyser Wil'telm was the great-

women of the whole world.

The Pinkhams had no money, and little credit. Their first laboratory was the kitchen, where roots and herbs were steeped on the stove, gradually filling a gross of bottles. Then came the question of selling it, for always before they had given it away freely. They hired a job printer to run off some pamphlets setting forth the merits of the medicine, now called Lydia E. Pinkham's Vegetable Compound, and these were distributed by the Pinkham sons in Boston, New York, and Brooklyn.

The wonderful curative properties of the medicine were, to a great extent, self-advertising, for whoever used it recommended it to others, and the deand gradually increased.

In 1877, by combined efforts the family had saved enough money to commence newspaper advertising and from that time the growth and success of the enterprise were assured, until today Lydia E. Pinkham and her Vegetable Compound have become household words everywhere, and many tons of roots and herbs are used annually in its manufacture. .

In 1843 she married Isaac Pinkham, a builder and real estate operator, and their early married life was marked by prosperity and happiness. They had four children, three sons and a Lydia E. Pinkham herself did not live to see the great success of this work. She passed to her reward years ago, but not till she had provided means for continuing her work as effectively as she could have done it

During her long and eventful experience she was ever methodical in her work and she was always careful to preserve a record of every case that came to her attention. The case of every sick woman who applied to her for advice and there were thousands—received careful study, and the details, includ-Mrs. Pinkham took a great interest in the study of roots and herbs, their ing symptoms, treatment and results were recorded for future reference, and characteristics and power over disease. She maintained that just as nature so bountifully provides in the harvest-fields and orchards vegetable foods of all kinds; so, if we but take the pains to find them, in the roots and herbs were recorded for future reference, and to-day these records, together with hundreds of thousands made since, are available to sick women the world over, and represent a vast collaboration find them, in the roots and herbs treatment of woman's ills, which for of the field there are remedies exauthenticity and accuracy can hardly be equaled in any library in the pressly designed to cure the various ills and weaknesses of the body, and

world. it was her pleasure to search these out, With Lydia E. Pinkham worked her daughter-in-law, the present Mrs. Pinkham.
