ones. Every street of a certain width is entitled to a row of trees on either side; while every street of a certain greater width has a double row.

If you go to Conference be sure and use the Salt Lake Route.

Get a Friend to Try This.

If the individual attacked has perlect nerve, and will stand perfectly still and hold his hand out, a dog, wever savage, may take the hand into his mouth but will not bite it, if it remains entirely immovable.-

CATS PREFERRED TO HUSBANDS

Chicago School Teacher Gives Reasons for Her Theories.

We forget who it was that coined the phrase, "all big things come from Chicago," but we would like to add that occasionally some big thoughts are also born in hat metropolis of the West.

A Chicago teacher, who we may add is at yet heart and husband free. evolved the interest na theory that as a life companion a cat is far more preferable than a may

After enumerating the faults of an average husband, she proceeded to tell of the high qualities of a cat, and when she came to that part in her oration when comparisons became necessary, poor husbands had not a leg to

The three strongest points that she made were that cats trim their own whiskers, never complain and, if they happen to come home late in the wee small hours, they do not invent excuses, and though guilty of misbehavior, they never walk diagonally across the room, chewing a secondrate cigar and vainly endeavoring to make themselves understood.

Well, it seems as if the cats had Paris spends \$100,000 a year to keep the better of it, and so far no deher trees in order and to plant new fender of poor downtrodden man has appeared on the scene.-Exchange.

#### A Spring Suggestion !

Take Garfield Tea in the morning or be-fore retiring; its use insures pure blood and a natural action of the liver, kidneys, stomach and bowels. It has a beneficial effect on the entire system. It is made of Harbs

Water a Drug.

Is distilled water a drug? Mr. Plowden has decided that it is within the meaning of the act which makes it an offense to sell drugs in an impure condition to the prejudice of the purchaser.-London Chronicle.

THE WHOLE LOT

If we don't heed prevention, we will need a cure, The Old-Monk-Cure

IT CURES ALIKE THE WHOLE LOT.

St. Jacobs

ROOMY HOUSE.

Designed So That all Complete, Cest Would Be \$1,450.

Will you give a plan for an in axpensive dwelling house, the main part to be about 24 feet by 28 feet, with an addition of suitable size. The main part is to be two stories bigh with square pitch of roof. I desire a medium sized kitchen, fair sized dining room as well as a large bedroom down stairs. Would like to live

It is a fact conceded by all poultry

men that chicks need no feed for 40

to 60 hours after they hatch, except

a little fine grit. The first thing I

give them is a very little fine grit.

The first feed I give them is rolled

pats, and I have had very good suc-

cess feeding them nothing else for the

first two weeks, with an occasional

light feed of fine meat scraps, not

more than twice a week and not this

often if they have free range. A

great many people have good suc-

cess with chicks feeding bread crumbs,

Chickens are omnivorous-hoggish-

ly so. They don't know when they

have enough; so it is for the keeper

to use brains for them and decide the

matter. In a wild state they are not

troubled with indigestion. In the do-

mesticated state they would not need

a charcoal corrective if they were fed

properly. We are responsible for most

Some people begin when they are

hatched to stuff them with sour,

slushy musses, and because they are

greedy for it we give them all they

crop bound, have bowel trouble, get

the cholera and quit. Some people

compel their older chickens to go with-

out teeth, and they, too, have dyspep-

withheld they cannot digest and assim-

It is a debatable question whether

or not chickens should be fed mashes.

Poultrymen have success both ways.

But it seems to me that the person

would be on the safer side if he used

the dry feed method. Poultrymen do

not allow the chicks to overeat the

mashes, nor do they allow them to eat

sour, spoiled mashes. Everything is

kept sweet and clean. They are there

to feed more frequently and feed less

at a time than the farmer is apt to

do. Watch an old hen that has hatch-

ed a brood out under the bushes. She

does not give them ideal care, but she

does give them a diet that agrees with

them. She scratches out a bug, picks

up a seed, walks about considerable

for the little she does get and then

each chick only gets a fraction of it

all. You wonder as the days go by

where they get water. You are famil-

iar with seeing hand raised chicks fill

up on drink until their crops looked

like bladders. Your chicks get sick

and die. Hers do not. They thrive

and grow. They are lean but lively

and full of vigor. It is a worm here,

of grass, a scrap of fruit, an endless

variety, but in very limited quantity,

no sour feed, nothing but a good pro-

Homemade Incubators.

Every once in a while we see in

some exchange a description of how

to make a homemade incubator or a

homemade brooder. We have never

taken much interest in such informa-

tion; for the reason that it is better

for a man to buy a machine known to

than to attempt to make from a writ-

ten description a machine that may or

may not be serviceable. A man in

making a homemade incubator or

brooder must spend considerable time

He must purchase thermometers and

the machine. A large part of this

time will be wasted, for the reason

that h ewill have lacked the experi-

ence. If the machine, when he has

finished it, is filled with eggs he may

imperfections in the machine. The

and the value of the eggs will be

found to more than equal the value

of an incubator or brooder made in

an economy not to spend money. The

cate process. The heat must rus from

99 to 102 degrees through a great deal

of the time and it is no easy matter

to construct an incubator that will

give this amount of heat with cer-

tainty. If it were so very easy to con-

struct incubators, it would not have

required so many years of experimen-

tation for the manufacturers to get in-

cubators that would be satisfactory.

There are many things on the farm

that may be constructed safely on the

farm and money can be saved thereby.

But in most cases this does not in-

clude the incubator. The only farmer

that can make a home-made incubator

with the certainty of having a good

machine is the farmer that has been

intimately associated with the use of

A nurseryman gives this advice;

"Don't plant out trees unless you in-tend to care for them, for they never

will amount to anything, and you will have all your work for nothing."

That's good advice about anything we

of the troubles chickens are heir to.

but I prefer rolled oats.

Ground Floor.

:hree bedrooms upstairs, each one to open into the hall?

In the plan here given, the main pody of the house is 24 feet by 30 feet. and two stories high. Both stories have 10 foot ceilings. The kit hen is 16 feet by 18 feet and 12 feet high, can hold. It is little wonder they are the ceiling 8 feet 6 inches. There is a cistern under the kitchen and an entrance to cellar. Over the ditchen there is a bath and a tank could be built in the roof to receive water from sia and refuse to lay eggs. The feed the roof of main building, the overmay be ever so good, but if grit is flow emptying into the cistem.

The house would cost all complete about \$1,450. There will be required for the foundation 9 yards stone, 33 barrels cement and 33 yards gravel. The lumber bill would be as fol-

who is not skilled in poultry-raising 80 pieces, 2 in. x 10 in. x 11 ft. main. 26 pieces, 2 in. x 10 in. x 18 ft. kitchen

> 13 pieces 2 in. x 8 in. x 12 ft. 4ills. 52 pieces 2 in. x 6 in. x 14 ft. ceiling

> 50 pieces of 2 in. x 6 in. 18 ft. rafters.

The laying hen or the growing chick 4,000 feet clapboards. needs plenty of exercise, no mashes, 2,000 feet roof boards. 2,500 feet inch flooring. tein ration .- J. G. Grady, Iowa County, 15 M. shingles.

11"x11"6"

1,280 laths. 10 rolls sheathing paper.

in addition there would be the inside fittings and material for 16 windows and 22 doors.

Cement and Fillers.

If the proportion of six to one is used how many barrels of Fortland cement will be required for 300 cubic vards of wall?

With concrete mixed six parts gravel to one part cement it would take, 33714 barrels of cement when no stone fillers are used. But if fillers in studying out the details. He must are used it would take, cement 270 then invest some money in materials, | bbls., gravel 240 yds., stone fillers 60 because he must have good materials. yds. You can estimate the amount of material required by the followlamps, and then he must put a great ing. A barrel of cement contains four deal of time into the construction of cubic feet. When mixed six to one this would build 24 cubic feet of wall, When small stone fillers are used. figure on one-fifth of the whole wall for stone. Should large fillers be used in size, say, from one cubic yard down lose the entire lot of eggs because of to a cubic foot, figure two-fifths of the whole. Thus for 300 cubic pards of wall built with gravel and cement, cement 3371/2 bbls., gravel, 300) yards, with small stone fillers, cement 270 bbls., stone 60 yards, gravel, 240; with the factory by men who have spent large stone fillers, cement 2021/2 bbls., years at that work. It is not always stone 120 yards, gravel 186 yards. Care must be taken to thoroughly bed operations of an incubator have to be all fillers and keep the large filers at

perfect because incubation is a deli- least six inches apart. Rubber Cement. A very good and easily made rubber cement is the following: Digest some finely-shredded caoutchouc (India rubber) with about four times its volume of naphtha or carbon bisulphide for several days in a well covered vessel. Another good cement may be made by softening and dissolving shellac in ten times its weight of water ammonia. A transparent mass is thus obtained, which, after keeping three or four weeks becomes liquid, and may be used without requiring heat. When applied it will be found to soft-en the rubber, but when the ammonia is evaporated it forms a kind of hard coat, and causes it to become impervious both to gases and to liquids.

> Material Required. How much Portland cement and sand will it take for a wall of cellar 10 ft. x 10 ft. to be 10 ft. high and one foot thick?

> It will require 10 barrels of Portland cement, 16 barrels gravel and 4 yards e fillers mixet eight parts gravel

EVERYDAY FORM OF GREETING.

There Are Many Kinds of Hands and Many Ways of Shaking Hands.

Did you ever notice the difference in hands and handshakes? Well, there is a difference, and it's mighty

One person will offer you a big. brawny hand that gives a good, hearty shake, while another hand that is just as big and brawny will feel like a log.

Some one else will offer you a hand that you could reach around with your little finger, and yet the grasp is warm and sympathetic, while the same hand worn by another will feel like a slender tcicle, and the quicker you let go the better. Then, there are the fat hands, the

long hands, the short hands (not stenographically speaking) and many other kinds of hands, but it all depends on how the wearer uses them as to whether or not you care to shake again.

The manner of shaking is worth noticing also. Some folks come to you with a straight arm jab, others us, a cherry picking movement and make you reach up to a level with your forehead, others grab your hand as low down as possible, while there are others who hend their arms so that you not only shake again, but you rub arms from the elbow to the

And then there are those who shake hands naturally and gracefully. -Abilene Chronicle

Ever Hear of "Scotty" and His Record-Breaking Ride?

The story, briefly told, is this: Walter Scott, the Death Valley gold miner, made the trip from Los Angeles to Chicago last summer on a special train over the "Santa Fe" in less than 45 hours. That whirlwind train cost him more than \$6,000. It was the fastest long distance run over mountains and plains ever made on any American railway. It demonstrated beyond dispute that the Santa Fe track, equipment and employees are of the dependable kind. Probably you wouldn't care to ride so fast. You prefer the luxury of our three trains from Utah and Colorado to Everywhere East and Southwest.

AMERICAN WOMEN FIND RELIES

How many women realize that it is not the plan of nature that women should suffer so severely.

Thousands of American women, how ver, have found relief from all monthly suffering by taking Lydia E. Pinkham's Vegetable Compound, as it is the most thorough female regulator known to medical science. It cures the condition which causes so much discomfort and robs these periods of their terrors.

Miss Irene Crosby, of 313 Charlton Street, East Savannah, Ga., writes:

"Lydia E. Pinkham's Vegetable Compound is a true friend to woman. It has been of great benefit to me, curing me of irregular and painful periods when everything else had failed, and I gladly recommend it to other suffering women."

Women who are troubled with painful or irregular periods, backache, bloating (or flatulence), displacement of organs, inflammation or ulceration, that "bearing-down" feeling, dizziness, faintness, indigestion, nervous prostration or the blues, should take mmediate action to ward off the serious consequences, and be restored to perfect health and strength by taking Lydia E. Pinkham's Vegetable Compound, and then write to Mrs. Pink-ham, Lynn, Msss., for further free advice. She is daughter-in-law of Lydia E. Pinkham and for twenty-five years has been advising women free of charge. Thousands have been cured by so doing.

JUDGE'S KEEN SENSE OF SMELL

Had Suspicion He Could Locate the Missing Pig.

In a recent case before Judge Feely of the twelfth judicial court of Rhode Island, at Woonsocket, a great dea! of fun was created by the different descriptions of a pig that the defendant was charged with stealing, but which he claimed to have bought and placed in a pen with other piga

There were such varied descriptions of the pig that finally the counsel for the defendant announced that the pig in question was within reach and could readily be produced in court. The air in the court room, which was pretty well crowded, had become rather foul by this time. As the lawyer made this announcement, Judge Feely leaned forward and whispered to the clerk: "Say, Charlie, I taink I smell that pig."

Queen Bees Protected.

Modern beekeepers lo not leave the rearing of queens to their bee colonies. Left to themselves bees rear queens only when they want to swarm, when their queen is accidentally killed or when, on account of her age or from some other reason, she does not lay enough eggs. In nature, when the young queens come out of their cells there is a battle royal among them, the final survivor being accepted as queen of the colony. But this is a waste of good material which the modern beckeeper can not permit. So his artificially-reared queens emerge into little wire cages, or nurseries, where they can neither kill their neighbors nor be themselves
