Writer's Cynical Justification of Mean Piece of Work

A certain gifted writer of whom it was once said that he wouldn't recogaize his wife if he met her on the street wrote a charming love story not so long ago, and it was printed in a popular magazine. His friends and all those of the circle in which the author moved recognized the story as an exact and recent transcript from the life of the writer, involving a very beautiful young woman, also well known in the same set. One man, coming across the author, took him to task for it.

"What in the world did you write up that affair with Miss Blank for?" he demanded.

The author looked at him unmoved and with the same exquisite calm and clearness that characterized his work,

"I needed the money."

BIG NEW SHOE BUILDING.

It is Dedicated by the W. L. Douglas Co. at Brockton.

The dedication a short time ago of the new administration and jobbing house building erected by the W. L. Douglas Shoe Co. as a part of its mammoth manufacturing plant at Montello was marked by the thoroughness and attention to detail characteristic of the firm in all its undertakings.

The dedicatory program included open house from 11 a. m. to 8 p. m. with concert by the Mace Gay orchestra and the presence of a Boston caterer to attend to the wishes of all. The building itself afforded a feast for the eye, especially the offices, which are marvels in many ways. Fifteen thousand invitations were sent out, including over 11,000 to the retail dealers in the United States who handle the W. L. Douglas Co. shoes, the others going to shoe manufacturers and all allied industries in Brockton and vicinity. Mr. Douglas will be glad to have anybody who is interested call and inspect the new plant, and says "the latch string is always out." All departments of the plant were open for inspection, the three factories as well as the new building, and visitors were received and escorted through the industrial maze by ex-Gov. Douglas, assisted by the heads of the various departments.

Under the present system all shoen are manufactured to order, and customers sometimes lose sales waiting for shoes to arrive. With the new jobbing house they will be enabled to have their hurry orders shipped the same day they are received.

The new building is 260 feet long and 60 feet wide and two stories in occupy the entire lower floor, while the offices will occupy the second floor. The jobbing department will carry a complete stock of men's, boys', youths'. misses' and children's shoes, slippers, rubbers and findings equal to any jobbing house in the country. Buyers are especially invited to come here to trade, and every effort possible will be made to suit their convenience. There will be a finely appointed sample room on the second noor, with an office in which both telephone and telegraph will be installed, with operators, both Western Union and Postal Telegraph wires to be used. There will also be arrangements for the receipt and despatch of mail.

Veterans Rapidly Passing Away. Veterans of the civil war are dying now at the rate of 100 a day, according to records of the United States pension office. The monthly reports for several months past have shown the death rate among the old soldiers to be in the neighborhood of 3,000 a month. Pension office officials who have watched the figures closely and know the tendency of the death rate are of the opinion that the number of civil war pensioners has reached the maximum and that hereafter each succeeding month will show a de-

The University of Notre Dame, it appears, has some features that can not be duplicated in any other school. It is one of the old, well-established colleges, with settled traditions reaching back sixty-four years, with a distinguished staff of professors and excellent library and laboratory equipment. Its discipline is of the paternal kind-strong without being eppressive; and as it embraces in its scope the grammar school, high school and college work, its appeal is as broad as it is potent. Perhaps the most remarkable feature of the famous Indiana University, however, is the fact that it has arrived at its present marvelous development absolutely without endowment. An announcement of the courses provided at Notre Dame appears on another page.

Drawing the Line. We have followed the plow, wielded the hoe, served time on the public roads under an austere overseer, swept the backyard, worked the garden, churned the butter, washed the dishes, nursed the baby and performed other various and sundry disagreeable tasks in our times without a murmur, but when it comes to cleaning streets inder three lady bosses—excuse us, please. Three women to boss you. Freat Caesar's ghost! Just the houghts of such a catastrophe is enough to give a man the "buck-ague."

ANYTHING FOR FILTHY LUCRE HAD WORKED HARD

APPLICANT'S REFERENCES SAT-ISFIED THE HOUSEWIFE.

Better Than Any Documentary Evidence She Might Have Carried Was Mute Testimony Offered by Cook.

She was a gaunt, middle-aged woman, in a clean but faded calico dress. Her hair drawn into a tight knot at the crown of her head left her rugged features and furrowed cheeks unrelieved and her little black straw hat cocked at a humorous angle on top of her head transformed her into a living caricature.

Mrs. Torrance opened the door to her with a sigh. All day long she had been answering the doorbell and examining specimens from the intelligence office, and her nerves had about reached the raw edge of endurance and were ready to jump over. Such specimens! Mrs. Torrence shuddered at the thought of letting one of them into her dainty, well-ordered little flat. Yet you can't do your own housework and have time to make yourself lovely and charming for a young and discriminating husband, too. Mrs. Torrance simply had to have a maid.

At sight of the latest comer her heart sank. The big Irish woman impressed her more unfavorably than any of her predecessors. Mrs. Torrance was almost beginning to tell her that she hau been suited already and to turn her away, when a wistful look in the woman's eyes made her ask her to step in.

"I was sint by the intilligence, mum," said the woman, briefly. "Have you a reference?" Mrs. Tor-

"There, Mum," She Said Quickly, "Thim's Me Riference!"

she had determined that she would take no one until she had looked her up and found her well recommended. The Irish woman looked taken back

nt. Then she stretched out two big, hard, rough, red, knotted hands. The veins stood up upon them in purple lines and the finger nails were worn to the quick. The skin was calloused and chapped until it looked ready to peel.

"There, mum," she said, quickly, "thim's me riferince." "I'll take you," said Mrs. Torrance,

impulsively That night, as Mr. Torrance sat down to the best dinner he had eaten for months, he looked his congratulations across the table to his wife. "Well, you have a jewel!" he ex-

claimed. "How did you find her?" "Oh, William," said Mrs. Torrance, "I don't know where she comes from nor anything about her. I just took her on circumstantial evidence."

Ram and Dog in Combat.

A prize ram, belonging to John W. Larrick, of Chambersville, this county, the other day defended a flock of sheep attacked by dogs, and lost his life after a desperate battle with a fierce Great Dane. The ram and the dog fought for

three-quarters of an hour, deep holes being torn in the sod where the encounter took place, but the superior size and strength of the dog proved too much for his weaker adversary, and the ram was finally killed. Four ewes were killed before the dogs were beaten off.

After a chase of nearly five miles, Mr. Larrick and his sons killed the dogs, six shots from a revolver being required to put an end to the Great Dane. - Winchester correspondence Richmond Times-Dispatch.

Dripping Pan on Tombstone.

One frequently comes across curious epitaphs, but we have never before heard of that useful and necessary kitchen requisite the "dripping pan" figuring upon a tombstone. The following curious lines, however, are to be found in Wooditton churchyard. near Newmarket, England, and let into the head of the stone is a dripping

To the memory of William Simonds, who died March I, 1763, aged 80 years. Here lies my corpse who was the man That loved a sop in dripping pan But now believe me I am dead See here the pan stands at my head Still for sop to the last I cried
But could not eat and so I died
My neighbors they perhaps may laugh
Now they do read my epitaph.

Set Fashion in Surgery. Confined at St. Luke's hospital, Den-

ver, having recently undergone an operation on one of her fingers, which had become deformed from a break and which was straightened, is Miss Mary H. Gartside, who, according to the Times of that city, has the dis-tinction of being the first person on record to have the vermiform appen-

It was because of this operation. which was purely experimental and which was resorted to in the last ex-tremity, that the possibility of removSORES ON HANDS.

Suffered for a Long Time Without Relief-Doctor Was Afraid to Touch Them-Cursd by Cutlcura.

"For a long time I suffered with ores on the hands which were itching, painful and disagreeable. I had three doctors, and derived no benefit from any of them. One doctor-said he was afraid to touch my hands, so you must know how bad they were: another said I never could be cured; and the third said the sores were caused by the dipping of my hands in the water in the dye-house where I work. I saw in the papers about the wonderful cures of the Cuticura Remedies and procured some of the Cuticura Soap and Cuticura Ointment In three days after the application of the Cuticura Ointment my hands began to peel and were better. The soreness disappeared, and they are now smooth and clean, and I am still working in the dye-house. Mrs. A. E. Maurer, 2340 State St., Chicago, Ill., July 1, 1905."

As a rule, a divorced woman acts as though she had been born that way.

All creameries use butter color. Why not do as they do-use JUNE TINT BUTTER COLOR.

It may be true that all men are fools, but they are not reminded of it so often if they remain single.

Intoxicants in Vegetables. Vegetables not only contain stimulants but are capable of producing an intoxicating influence on those who depend on them exclusively for food. according to an investigator. He cites a case in which some young people of his acquaintance suffered from partial intoxication as the result of a purely vegetable meal.

Foreign Born Men of Fame. Of the 300,000 Canadians engaged in business or following professional pursuits in the United States many hold prominent posts. "Who's Who in America" mentions 245 Canadians, Allowing one-eighth of those born in Great Britain but brought up in and therefore rightly to be credited to Canada, the number of Canadians be comes 276, or 2.3 for every 10,000 Canadians in the United States. With this may be compared the British rate per 10,000 of 2.2, that of 2.1 for the Dutch, that of .5 for Swedes, and that of .9 for native Americans (black and white), or 1.9 for native white Americans.

Convenient English.

"We become accustomed to phrase," observed an educator at a teachers' convention, "but when we introduce a new one along exactly the same lines, it startles the hearer. "A number of ladies were seated in

a hotel parlor, and one of them, commenting on a woman who was standing in the hallway, said:

"'Mrs. Loraine seems unusually happy this morning."

"'Yes,' answered a companion knowingly, 'the ladles of Newark gave a tea in her honor yesterday. But doesn't her husband look gloomy and dejected?"

'That is true,' admitted the first speaker. 'I presume the gentlemen of Newark gave a beer in his honor last night."

Chamois Skin of Commerce.

Charles C. Druedling, of Philadelphia, has written an article for the American Journal of Pharmacy on the subject of chamois skins. What is known in the market as chamois skins, he says, is really an oil-tanned sheep or lamb skin lining. The supply of skins from the chamois animal is very limited-enough could not be obtained in a year to supply the United States for more than a single day. He made special inquiry on a recent visit to Switzerland about the annual crop of the chamois skin and ascertained that from 5,000 to 6,000 skins would be a fair average yearly crop. This skin is heavier than the skin of the sheep or lamb, also much coarser. For strength and durability the chamois skin is preferable, but for ordinary use and appearance the oil-tanned sheep skin lining would, in most instances, be preferred.

A WINNING START.

4 Perfectly Digested Breakfast Makes Nerve Force for the Day.

Everything goes wrong if the breakfast lies in your stomach like a mud What you eat does harm if you can't digest it-it turns to poison.

A bright lady teacher found this to be true, even of an ordinary light breakfast of eggs and toast. She

"Two years ago I contracted a very annoying form of indigestion. My stomach was in such a condition that a simple breakfast of fruit, toast and egg gave me great distress.

"I was slow to believe that trouble could come from such a simple diet but finally had to give it up, and found a great change upon a of hot Postum and Grape-Nuts with cream, for my morning meal. For more than a year I have held to this course and have not suffered except

when injudiciously varying my diet.
"I have been a teacher for several years and find that my easily digested eakfast means a saving of nervous force for the entire day. My gain of ten pounds in weight also causes me to want to testify to the value of Grape-Nuts.

Grape-Nuts holds first rank at our

Name given by Postum Co., Battle "There's a reason." Read the little book, "The Road to Wellville,"

Harden Metals by Alr.

The latest proposals for intensifying the oxidizing action of air on metals is that of M. Harmet, and has for its object the treatment of cast iron, producing a refined from or steel. Molten from is caused to flow through a fine channel surrounded by an annular air-biast, which thus forms a turpere, driving the metal forward in a fine spray. This spray is collected and allowed to flow together again in a receiving chamber, from which the molten steel can be tapped.

Hand-to-Hand Fight With a Tiger. On Monday last a villager pluckily attacked a tiger that was lying on the railway line near the Mosul station. It was a life and death struggle; the villager was only armed with a cudgel, with which he made a desperate attack on the tiger, but was eventually overpowered by the infuriated brute, which tore and bit him all over and then retired. The unfortunate man has since succumbed to his injuries at Arkonam.-From the Hindu.

Gila Monsters Increase.

Since the Indians have been thinned out the gila (heela) monster is overrunning the Southwestern territory. The only antidote known for the glla's poison, which is fatal in about thirty minutes, is a secret of the Hualipis'indians, in Mexico, who think it godgiven, and never have divulged it, although government officials and scientists have lived among them for the purpose of discovering it.

Cuts Off English Novelists. The British Weekly, London, says: 'Only a very few among the foremost of our novelists can have their stories published in serial form in America. Eight or ten years ago the English novelist of standing could count on receiving more than half his income from America, and now he can count on practically no returns at

Ambidextrous Society.

A society for the promotion of ambidexterity has been formed in London. That the left hands of the majority of adults have grown up in a state of very limited usefulness and of compartive weakness and awkwardness, while the motor centers of the brain supplying them have been left partially developed, must be admitted.

Long-Lived Trio.

There died in Paris recently Count Emile de Keratry, who could boast that his grandfather, born in 1699, was a page in the household of Louis XIV. The former page married his second wife at 70 years of age and had a son, who was Emile's father. 1852. Three lives bridged 205 years.

Armor Piercing Shells.

The fuse in an armor-piercing shell is so constructed that when the projectile strikes a ship's armor-plate, the delay in action is just enough to let it pass though the plate. Should the shell strike a thin plate like the shell of a torpedo-boat, or strike a glancing blow it will always burst within ten

Fire Gongs in London.

The London fire department is trying the experiment of having gongs on its apparatus, but the cockneys find that these gongs "have not the electrical effect in clearing the streets which is produced by the firemens vocal 'Hi! hi! hi!"

New Fuel for Autos.

The discovery is said to have been nade in England of a new spirit, "un like either petrol or alcohol," and "not unpleasant" in odor, which is cheap and will take the place of petrol in running automobiles.

"AN OLD PAINTER'S IDEAS."

The autumn season is coming more and more to be recognized as a most suitable time for housepainting. There is no frost deep in the wood to make trouble for even the best job of painting, and the general seasoning of the summer has put the wood into good condition in every way. The weather, moreover, is more likely to be settled for the necessary length of time to allow all the coats to thoroughly dry, a very important precaution. An old and successful painter said to the writer the other day: "House owners would get more for their money if they would allow their painters to take more time, especially between coats. Instead of allowing barely time for the surface to get dry enough not to be 'tacky,' several days (weeks would not be too much) should be allowed so that the coat might set through and through. It is inconvenient, of course, but, if sone would suffer this light inconvenience, it would add two or three years to the life of the paint." All this is assuming, of course, that the paint used is the very best to be had. The purest of white lead and the purest of linseed oil unmixed with any cheaper of the cheap mixtures, often known as "White Lead," and oil which has been doctored with fish oil. enzine, corn oil or other of the adulterants known to the trade are used, all the precautions of the skilled painter are useless to prevent the cracking and peeling which make uses unsightly in a year or so and, therefore, make painting bills too frequent and costly. House owner should have his painter bring the ingredients to the premises separately. white lead of some well known relia-ble brand and linseed oil of equal qual-ity and mix the paint just before applying it. Painting need not be ex-pensive and unsatisfactory if the old painter's suggestions are followed.

HOG NEARLY BURNED CITY

Set Ablaze by Falling Lamp, Animal Unconsciously Gets Even with Man That Threw It.

The entire east side of town narrowly escaped being burned at night and nothing but prompt action upon the part of those present averted it, says a dispatch from Dresden, Tenn. Fate Perry, a clerk at Tuck's res-

taurant, went to his room upstairs over the restaurant about 11 o'clock to retire. He lit a lamp, which caught fire within, and Pery promptly threw it into the street. The lamp struck a town hog fairly in the middle of the buck and exploded, covering the hog with burning oil. The squeals of his hogship could have been heard half a mile away as he awoke to the situation and tried to get away.

The hog took a turn around a part of the public square and returned to where he was first assaulted and ran under the restaurant from which the lamp was thrown to get release from the flames. The blaze by this time had just begun to make extra good headway and soon set the floor and rubbish under the building afire. The alarm was raised and the entire fire force called out, but for some time they could neither get the hog out or reach the fire. Finally the floor was torn up and water poured through upon the hog, who took the relief of fered him without a grunt and the fire was finally put out. All losses, except the hog's, were covered by in-
