

Vacation Time at Grandpa's. My school books dull have been packed

away. and I've nothing to do but play and Just romp and frolic the livelong day.

In vacation time at Grandpa's.

I've no more lessons to think about, No more sums to be all worked out; I'll soon forget them, without doubt, When I get up to Grandpa's.

We ride in the cars one whole day through.

"Don't we get tired ?" Well, yes, we do, Tired and hot, but we like it, too, That long, long trip to Grandpa's.

There at the station is Uncle Fred, With carriage and horse, and the old dog

Ned: How he scampers and barks and runs ahead,

When we say, "Gee up for Grandpa's."

We drive and drive till the sun's most down,

the big white meeting house. Past through the town, And out by the school house old and

brown. That is only a mile from Grandpa's.

I'd like to tell how we spend the day, How we ride the horses and rake the

hay. There's really no end to what I could say Of vacation-time at Grandpa's. -Anna P. Chandler.

# Pendulum Lawn Game.

A pleasant lawn pastime is the pendulum game, which, as its name indicates, is played with a pendulum and with rings, says the Philadelphia Record. The rings should be eight inches in diameter and there should not be more than six. Each should have its color and its value and should be fitted with a prong several laches long, so that it may be made to stand upright in the ground.

The pendulum is a heavy ball fastened to a piece of rope eight feet long and suspended from a ring, which moves on a wire stretched between two posts eight feet high and set in the ground six feet apart. It is between these posts that the rings are set at regular intervals.

Each player chooses a ring and the object of the game is for each to so swing the pendulum that it will fall through his chosen ring and pull it from the ground. If it does this successfully the player scores the number of points marked on his ring and conthues to play until he fails, scotling the points on each ring that he successfully pulls from the ground.

A line may be drawn on the farther side from the players and if a Tingois thrown beyond that line it may score. double its value.

If in the first play a player hits a

ton. Mamma sent the clothes to a laundry, and the twins played in their roof tent, had their luncheon on the little table, and took their naps in the hammock when it was warm .-- Youth's Companion.

The Study of B. and P. swarm of tat, lazy young BBB Set out to disturb the sweet PPP. When U asked them, "Y?" With a wink of the I. They said, "Oh, we're quite at our EEE."

I said, "If you harm those dear PPP, Or continue the sweet things to TTT, Then the first little B That I happen to C Shall be banished straight over the CCC!" -Youth's Companion.

ELECTRIC PLANT FOR PEAT.

Current Passing Through Disintegrates but Preserves Calorific Power. An electric process for the treatment of peat has lately been adopted in England at the Johnson & Phillips works. The peat is transformed into a hard combustible which is well adapted for use under boilers. The operation is said to last two and a half hours and the guaterial costs less than ordinary coal. The combustible which is thus produced has a high calorific value and gives scarcely any smoke. A plant on a large scale is shortly to be installed in Ireland, and if suc-

cessful it will be an important move in the direction of utilizing peat as fuel under the best conditions. In the present process the peat as it comes

from the bogs is placed in cylinders which revolve at a high speed, while a set of air fans is used to drive off the water, which forms about 80 per cent of the total.

A set of electrodes is placed in the cylinders and connected with a dynathe mass of the peat between the electrodes. The resistance which the peat offers to the current causes a considerable heat and the latter breaks up the peat and pulverizes it, but without causing it to lose any of its properties. In order to increase the conductivity of some kinds of peat they add certain chemical products. After this process the peat is treated by a set of

kneading rollers which give it a plastic" consistency so as to enable it to take may desired form. From here it passes to an automatic press which forma it into briquettes. It is then ready for use and is taken to the storeroom.

It is to be remarked that although the passage of the cutrent through the peat gives rise to a heating effect, the results obtained in this way are quite different from those which another method of heating would produce. By fire keat the particles of the peat lose their different constituent matters, while the electric heating causas them to disintegrate, thus freeing their cellular material and distributing oit throughout the entire mass of the peat. Thus all the particles become adapted

for combustion. To obtain a harder material the disaggregated peat is given a harger treatment with the current. The air is kept out by a tight cover, and the mass is under the brim of her huge black hat. then treated with an adhesive solution so as to unite the particles. The experiments have been made with the process on a large scale and at a great expense, and it is said to have been to make a reputation in his profession greatly improved in the details and while continually thinking about medi-

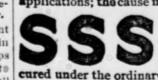

Those afflicted with Eczema know

more than can be told of the suffering imposed by this "flesh fire." It usually begins with a slight redness of the skin, which gradually spreads, followed by blisters and pustules discharging a thin, sticky fluid that dries and scales off, leaving an inflamed surface, and at times the itching and burning are almost unbearable. While any part of the body is liable to be attacked, the

hands, feet, back, arms, face and legs are the parts most often afflicted. The cause of Eczema is a too acid condition of the blood. The circulation becomes loaded with fiery, acid poisons that are forced through the

Eczema made its appearance on my left limb the size of my thumb in 1893, and spread until it was large as my hand, burning, itching and paining me, and for which I could get no relief, until seeing the other cures advertised by you I wrote and secured the advise of your physicians, commenced S. S. S. and it cured me. J. H. SPENCE. Mayetta, Kan.

glands and pores of the skin which set the flesh aflame. Since the cause of the disease is in the blood it is a waste of time to try to cure it with local applications; the cause must be removed before a cure can be effected. S. S. S.

has no equal as a remedy for Eczema; it enters the blood and forces out the poison through the natural channels, and builds up the entire system. The skin becomes smooth and soft again, and the Eczema is cured. Cases that have persistently refused to be

Conquest of the Great American Desert

Has Nevada always been an arid and desert region? Its geological records, s indelibly carved in sandstone and granite, showing the shore lines of ancient lakes, proclaim that it has not, but that at one time a vast body of water, as greats in area as Lake Erie, covered a portion of the State. Today, however, the aridity of the country is unquestioned and the 350,000 acres, to part of which Uncle Sam is to apply water, will practically double its well irrigated area and its agricultural population.

Nevada's ancient inland sea is known as Lake La Hontan; it was one of several great prehistoric lakes istributed over the Great Basin of he arid region, among them Lake Bonneville, of which the Great Salt Lake was the deepest portion. Its area was nine times greater than the Great Salt, or almost as large as Lake Michigan, and much deeper.

The contracted remains of Lake La Hontan in Nevada are found in Pyramid Lake and a number of other small enclosed lakes which were the deepest portions of the ancient lake. Since land-locked and did not overflow, it follows that the rainfall which fed them was much heavier than it is Mr. Williams operformed the ceredown in the shade of that chestnut to-day.

Should conditions revert, many of the important points situated in the Great Basin would be hopelessly flooded, such, for instance, as the Morfarmer who started for the West and mon Temple, which would stand in fifty feet of water, while 700 miles of

These prehistoric lakes are said to be of very recent origin-that is, recent by the geologists' count-perhaps 30,-000 or 40,000 years old. Fossils have been found showing the presence of primitive man along their ancient shores and embankments, which in many instances are as perfect in contour and as distinct as if the waters his wife. had receded only a few years since These lakes included such arid and Meekun. fear-inspiring localities of to-day as the Black Rock Desert, Skull Valley, Death Valley, and a score of other places where the bleached bones of man and animal attest to an awful lack of water.

When the State was admitted to the Union, in place of receiving the usual donation of alternate school sections-16 and 32 in each townshipshe secured a flat grant from the government of two million acres of public land to be located wherever her lawmakers saw fit. The State Legislature passed as much as desired of this great and valuable resource into private ownership of stockmen, at as low a figure as 25 cents an acre. These ands have been located up and down the sides of every river and stream and around every spring and water

And you know why, too. It's those gray hairs! Don't you know that Ayer's Hair Vigor restores color to gray hair? Well, it does. And it never fails, either. It stops falling hair also, and keeps the scalp clean and healthy. Do not grow old too fast!

"I have used Ayer's Hair Vigor for many years and I should indeed be sorry to be ob-liged to do without it. It keeps my hair from turning gray, and also keeps my scalp clean and healthy."-E. S. PENFIELD, Canyon City, Oregon.

#### Marrying on Account.

Rev. Mr. Williams was the Congregational minister in the village of Winslow, Me., several years ago. One evening, says a correspondent of the Boston Globe, four young people called these large prehistoric lakes were at the parsonage. Two of them wished to be married.

The papers in the case were legal, so mony. The other couple acted as bridesmaid and best man. The groom was the son of a well-known man in the town, and as the happy couple were leaving the parsonage the young man whispered to Mr. Williams:

"Just charge it to father, parson. It will be all right."

Mothers will find Mrs. Winslow's Soothing Syrup the best remedy to use for their children during the teething period.

Not So Presumptious as That.

"What are you doing with that sheet of paper, Orville?" sharply asked "I am making a wish," answered Mr

"A wish?"

"Yes, my dear. In your presence 1 shall not presume to call it a will."

age. It was during his own latter days that he sat on the seaward porch of Mrs. Cottle's boarding house and laid down the law to the other boarders, all "foolish young landlubbers." One day the captain made a statement in regard to the location of Japan which one of these young persons ventured to question.

As the captain regarded him with silent scorn, the young man went into the house, up to his room, and presently returned with a large atlas.

"Now, see here, Captain Lane," he said, stubbornly, "I want you to look at this map, please."

"Why, young man." said the captain, indignantly, "do you calculate I'm going to put on my specs to look at a picture-book got up by a man that, so far from follering the sea, never made so much as a single v'yage, more'n likely?"

By the German Dressmaker. A young woman author recently hired a German dressmaker to do some work for her. The German came to the apartment daily, and after a consultation or a fitting the writer would leave to go about her own business. "I could see that she was trying to place me," said the author, in telling the story. "When she first came and

saw so many pictures and sketches about the house she asked me if I could paint, and I replied in the nega-

"Then she looked around for a piago, and seeing none, asked if I could sing. Again 1 told her no, and of course it was quite evident that I knew nothing about dressmaking.

"On her last day I decided to end her suspense, so after a little friendly conversation I informed her in vague but impressive terms that I wrote, mentioning one or two things that she recognized. Her honest German face was raised in wonder to mine. "'You don't say so, now! You do all dot? But I always thought it took a

### Irrigation in the East.

That irrigation may be employed as usefully in the humid portion of the United States as in the arid section 1announced by the Department of Agriculture. A bulletin has been issued, showing the results of many experiments in this field, in which a steady water source was drawn on as an auxiliary to an irregular rain supply.

Near Poughkeepsie, N. Y., where rain is ordinarily bountiful for the crops, a grower of strawberries has found that the addition of a plant for irrigation enables him to insure a perfect stand and rapid growth of new plants. Spraying, and irrigation be- m-marriage. tween the rows, put in fine condition for lack of rain at the critical moment first you wanted to borrow money. had colored and hardened without sweetening.

Market gardeners in many other parts of the East are having similar results. The experts at Washington believe that as the country becomes more compactly settled and more intense gardening is required it will be found necessary to depend more and more upon irrigation as an insurance against drought and consequent crop failure.

## By Leased Cable.

The anarchist had just hurled the bomb.

Simultaneously the democratic head of President Loubet and the royal pate of Alfonso XIII. ducked to avoid the flying fragments.

"M. le President," muttered the boy king, "which one of us do you think that fellow was after?"

With true Gallic politeness, Loubet disclaimed the honor.

"After you, my dear Alfonse," he murmured, bowing deeply .-- Cleveland Leader.
