He noticed during the progress of the work that a contractor's clerk came back from the railway station bringing with him a walking stick bearing a label addressed to his employer, says Pearson's weekly. This always happened on a Friday afternoon, and he became curious to know the reason.

When he asked for an explanation a spring in the handle, screwed off a headpiece and, turning the stick upside down, rolled out on the table a heap of sovereigns.

It appears that the nearest local bank could not be used in time for weekly pay. Accordingly the contractor had the stick made, the interior of which was hollowed out in order to take the sovereigns. The precious freight amounted to £100, and was dispatched every week as an ordinary parcel. During the whole time it never ulscarried.

Possibly a more remarkable savings bank was found during an inquest held in London recently. It was discovered that the deceased had a wooden leg, within which were a number of sovereigns wrapped in a kid glove. Surely a wooden leg is one of the most peculiar banks imaginable.

A short time ago an old miser died at Brescia. She lately revealed a singular hoarding place for treasure. She had always lived as one in deep poverty, and had carefully excluded all neighbors from her apartment.

When she was taken ill and felt the approach of death she sent for a notary, to whom she confided the hiding place of her money. She had lived in constant dread of

robbery or loss, and so for years had preserved the whole of her money in a hollowed out leg of a certain table in the room. When search was being made before properly accredited witnesses a sum of £5,000 was brought to keep a cook so long? Do you treat her tion?" light in money securities.

gain. After this arrangement had been going on for some time it was discovered that the contractor was selling the refuse at £6 a ton. Then the ordnance officials took the matter into their own hands and issued proper tender forms Then the firm which had been used to paying 3s. 4d. a ton offered f5 to f6 a ton, while eventually as much as f7 7s. 6d. per ton was offered for the waste ashes. This means a revenue of f10 core as the system. Take Hall's Family Pills for constipation of £10,000 a year, which hitherto had beer, thrown into the ash pit. Actually, it is estimated that a quarter of a million pounds has been wasted by the military officials who thoughtlessly threw the refuse away. A sum of £8,000 was found in the mud at Liverpool a short time ago. This was in the mud behind the landing stage water, where a cash box was found containing a number of bank notes and about £8,000 in securities.

# SORES THAT DO NOT HEAL

Whenever a sore or ulcer does not heal, no matter on what part of the body it may be, it is because of a poisoned condition of the blood. This poison may be the remains of some constitutional trouble; the effect of a long spell of sickness, which has left this vital stream polluted and weak or because the natural refuse matter of the body, which should pass off through the channels of nature, has been left in the system and absorbed into the circulation. It does not matter how the poison became intrenched in the blood, the fact that the sore is there and does not heal is evidence of a deep, underlying cause. There is nothing that causes more discomfort, worry and anxiety than a festering, discharging old sore that resists treatment. The very sight of it is abhorrent and suggests pollution and disease ; besides the time and attention required to keep it clean and free from other infection. As it lingers, slowly eating deeper into the surrounding flesh, the sufferer grows morbidly anxious, fearing it may be cancerous. Some

of those afflicted with an old sore or Licer know how useless it is to expect a cure from salves, powders, lotions and other external treatment. Through the use of these they have seen the place begin to heal and scab over, and were congratulating themselves that they would soon be rid of the detestable thing, when a fresh supply of poison from the blood

I have had a crippled foot all my life, which compelled me to use a brace. By some unaccountable means this brace caused a bad Ulcer on my leg, about six years ago. I had good medical atten-tion, but the Ulcer got worse. I was in-duced to try S. S. S., and am glad to say it cured me entirely, and I am convinced that it saved my leg for me. I have, therefore, great faith in S. S. S. and gladly recommend it to all needing a reliable blood medicine. Bristol, Va.-Tenn. W. J. CATE. would cause the inflammation and old discharge to return and the sore would be as had or worse than before. Sores that do not heal are not due to outside causes; if they were, external treatment would cure them. They are kept open because the blood is steeped in poison, which finds an outlet

through these places. While young people, and even children, sometimes suffer with non-healing sorcs, those most usually afflicted are persons past middle life. Often, with them, a wart or mole on the face inflames and begins to ulcerate from a little rough handling ; or a deep, offensive ulcer develops from a slight cut or bruise. Their vital energies and powers of resistance have grown less, and circulation weaker, and perhaps some taint in the blood, which was held in check by their stronger constitutions of early

life, shows itself. It is well to be suspicious of any sore that does not heal readily, because the same germ that produces Cancer is back of every old sore and only needs to be left in the circulation to produce this fatal disease.

PURELY VEGETABLE. There is only one way to cure these one sores and ulcers, and that is to get every particle of the poison out of the blood. For this purpose nothing equals S. S. S. It goes down to the very bottom of the trouble, cleanses the blood and makes a permanent cure. S. S. S. enriches and freshens the circulation so that it carries new, strong blood to the diseased parts and allows the place to heal naturally. When this is done the discharge ceases, the sore scabs over and fills in with healthy flesh, and the skin regains its natural color.
