Box 321, DeGraff, Ohio. Dr. S. B. Hartman, Columbus, Ohio.

Dear Sir: I was a terrible sufferer from pelvic weakness and had headache continuously. I was not able to do my housework for myself and husband. I wrote you and described my condition as nearly as posisble. You recommended Peruna. I took four bottles of it and was completely cued. I think Peruna a wonderful medicine and have recommended it to my friends with the very best of results.

Esther M. Milner.

Very few of the great multitude of women who have been relieved of some pelvic disease or weakness by Perana ever consent to give a testi-

monial to be read by the pubilc.

M There are, however, a few courageous, self-sacrificing women who will
for the sake of their suffering sisters allow thier cures to be published.

Mrs. Milner is one of these. In her

gratitude for her restoration to health A GRATEFUL she is willing that the women of the LETTER TO whole world should DR. HARTMAN know it. A chronic invalid brought tack to health is no small matter. Words are inadequate

BENGAL'S PREMIER PRINCE.

Ruler Over 2,000,000 People Is Only 27 Years Old. Mahtab III, Maharajah Adhiraj of

Burdwan has come into public notice because of his recent elevation to the throne of Burdwan, thus becoming the premier noble of Bengal and the ruler of 2,000,000 people at the age of 25.

This youth, whose official title is Maharajah Adhiraj Bijay Chund Mahtab Bahadur, succeeded the late ruler of Burdwan in 1887. He was the adopted son of his predecessor on the throne, and was born in 1881. His accession to the throne proper was delayed because of his youth and until his education was concluded. Now he has been installed amid the pomp and magnificance of the East and in full power over his multitudinous subjects by the Lieutenant Governor of Bengal, and

MAHARAJAH OF BURDWAN.

his sway extends over a territory of 4.194 square miles.

Mahtab III is the only Krhattriya prince in India, and is the head of that community. His fortune is vast, even for an Indian prince, and he supports at his own cost a college at Burdwan, where free education is imparted to "So you've been sitting on a dozen the youth of his realm up to the first eggs for three weeks and only batched arts standard; a high school at Kalna and a free Sanskrit college and a girl's school at Burdwan.

The prince also maintains at a great cost annually many temples at Burdwan and Kalna. At these the poor are fed daily. He also supports almshouses, where rice and flour are distributed daily to all who apply.

CHINESE AND THE COMPASS.

Very Probable that They or Some Other Asiatics Discovered It.

Some Asian people, perhaps the Chinese, discovered, many centuries ago. that a kind of iron ore possessed a very pecul ality, says a writer in Uan per's

The Ball in Lawn Tennis.

It is a curious fact that every book written on lawn tennis cautions the player to keep his eyes on the ball at the moment of striking it, yet there are very few expert players who do so. A rifle shot looks at his target, a bowler looks at the pins, and a billiard player generaly locks at the object ball, not the cue ball. I have found it next to impossible to carry in my mind, while moving rapidly to play a flying ball, the exact height of the net, the direction of the lines of my opponent's become second nature with me and by the press agent of the real estate with most other players to look up in owner.

the direction that the ball is to go "Oh, I am the 'oldest inhabitant' that this is recessary in golf that lawn ten- with sunken cheeks. his players have so much trouble in mastering the old Scotch game. NEW ELECTRIC LIGHT.

Cheap Substitute for Present Fila-

ment Wires in Bulbs.

A new electric lamp, which threatens to revolutionize the present system of lighting by means of the electric current, has been devised by an Austrian chemist-Dr. Hans Kuzel-who has occupied many years in studying the principle involved in his invention. He has succeeded in devising a lamp which he calls the Syrius lamp, and which promises to reduce the price of electrica! lighting to a wonderful degree, says the New York Tribune. As is well known, incandescent gas lighting is much cheaper than electric light under the present systems, because the filament wires of the latter are very expensive, and the glass bulbs soon wear out in service. Dr. Kuzel has invented a substitute for the glow thread, by forming out of common and cheap metals and metalloids colloids in a plastic mass, which can be handled like clay. and which, when dry, become as hard as stone. Out of this mass very thin wire threads are then shaped, which are of uniform thickness and of great homogeneity. These two characteristics are of great value in the technics of incandescent lamps.

The Kuzel or Syrius lamp requires scarcely one-quarter of the electric current which the ordinary electric lamp with a filament wire requires. Experiments have shown, it is asserted, that the new Syrius lamp can burn for 3,-500 hours at a stretch. Another advantage claimed for the Syrius is that the intensity of the light always remains the same, the lamp bulbs never becoming blackened, as is the case with the ordinary bulb.

No Chance to Talk.

"When you are tempted to speak harshly to your wife, do you always stop to think?"

"Yes, indeed. She does the talking and I do the thinking."-Cleveland Plain Dealer.

How to Exercise the Bowels

Your Intestines are lined inside with millions of little suckers, that draw the

Nutrition out of food as it passes them. But, if the food passes too slowly, it decays before it gets through. Then the little suckers draw Poison from it instead of Nutrition.

This Poison makes a Gas that injures your system more than the food should have nourished it.

You see, the food is Nourishment or Poison, just according to how long it stays
