In his speech at Ely, Senator Newlands declared that Nevada built the first San Francisco, and he was more than half right, says Goodwin's Weekly. California was poor when the Comstock was discovered. The cream of her placers had been skimmed. The great panic of 1857 had left the whole nation crippled. In California agriculture had made little progress and fruit raising was not a factor. Her merchants were in serious arrears in the East; Frazer river has been an immense drain with no returns. It was Nevada that vitalized her business, gave to San Francisco a new impetus, gives a market for all her imported and native products; caused her people to take on new hopes, and really was to California what the discovery of gold to California ten years previous was to the nation.

Buy Mining Shares

Bradstreet seconds Mr. Guggenheim in warning people against indiscriminate investments in mining stocks. It closes its article, which is a cautious one, in these words:

"Of course, there are good mining stocks, but the main point is that the general public should develop a fine sense of discrimination in purchasing only the stable and meritorious ones in mining shares."

That is good advice. If applied to all the acts of men's lives, what a fine old conservative world this would be.

Suppose that had been the rule when Mohawk was 10 cents a year

ago; would it ever have reached \$15 a share?

Do not men sometimes buy eagles to arrive?

What can men invest in to insure them great profits?

Is there not an element of uncertainty in every investment, except in interest bearing securities?

Of course, men should use all the prudence possible in buying anything on speculation, but mining is no longer a blind experiment. It is growing to be about as exact a science as any other. Where the formation is all right and the ore assays well on the

surface, the chances that it will make a mine when developed are more certain than to buy in April Jersey peaches for delivery in July.—Salt Lake Telegram.

Johnnie Con.

The Johnnie Consolidated Mine is now down 700 feet in ore and on the lower level drifts have been run north and south that expose a ledge from 16 to 18 feet wide averaging \$20. On the Minnie Mae Claim, owned by the same company, the leasers have been very successful. The Frost and Bowler leases have made the best showing, and vein in these treasure holes assays from \$500 to \$5000.
