MINES AND MINING

BOUGHT RICH ARIZONA MINING CLAIMS.

Former Senator Dorsey of Los Angeles Represents Powerful Franch and English Syndicate of Capitalists

Ex-United States Senator Stephen W. Darsey, owner of valuable acreage near Los Angeles and possessor of Mexican mining property, all producers, has become identified with a strong syndicate of Freuch and English capitalists.

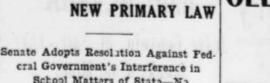

Senator Dorsey during the past twelve months has made two business trips to Europe, and has spent considerable time in New York and Washington.

Recently the senator closed deals at Clifton, Ariz., for 160 valuable mining harsh criticism and arraignment havclaims in the Clifton district. The pur- ing been eliminated. The difference chase, which is for the French and English capitalists, includes the Lezinsky group of thirty-four claims, the Stevens Copper company, forty-eight claims; the Eliott Walker group of twenty-seven claims and the Celtic group of twenty claims,

Development work has already commenced on some of these properties. The company when organized will be one of the strongest in Arizona and will be prepared to build railroads to the mines and erect concentrating plants.

Will Handle Low Grade Ore The great increase in the production of copper, which has put Mexico among the chief producers of this metal, is tude on the Japanese question failed of due to the properties in the state of Sonora and particularly in the district of Cananea, notes a Cananea (Mexican) correspondent. The greatest mine at this camp is the Greene Consolidated resolution was temperate. An at-Copper company. In eight years this tempt by Senator Sanford to amend company has grown from nothing to the minority resolution to contain a be one of the greatest works of its kind clause protesting against the naturalin existence, and it is now adding to ization of the Japanese was quickly the world's wealth of copper at the ruled out of order. rate of \$10,000,000 gold per annum. This Resolutions were is notwithstanding the fact that three- houses memorializing congress to refourths of its ore is of second grade and has to be concentrated. Develop- for the cities in California that were ment has been carried on beyond the ability of the surface equipment to fire. The one in the senate asks for handle the tonnage, but this is being the remission or rebating of the duties rapidly brought up to meet the re- for five years, while the resolution in anirements; the caving system is being the assembly specifies no period of introduced in the mines; an elaborate time. system of underground and surface Sen roads and ways, with electric traction, between the mines and mills has been installed; the concentrators have been increased by 1000 tons and brought up or not they can be fraudulently maniputo a daily capacity of 3500 tons; an ex- lated, and Senator Keane introduced a tensive system of belt conveyers, for bill to establish a state sanitarium for bedding the ores and feeding the furnaces from the beds, is about ready An to be put into operation; the fines and for. flue dust are being sintered by a patent process to relieve the work of the blast furnaces, and the eight blast furnaces now in commission are being replaced by larger furnaces, 50 by 180 inches, at the tpyeres, and with auto-matic feed; so that 1907 should see the present production of 6,000,000 pounds per month greatly increased. It is said that the company will be able profitably to handle ore running as low as 1 per cent copper by the new

and enlarged plant, with the practically PRESIDENT WOULD automatic equipment which cuts down

School Matters of State-No Compromise Measure

ASSEMBLY PASSES

Sacramento-The unanimous passage by the assembly of the proposed constitutional amendment providing for direct primaries and the adoption by the senate of a resolution bearing on the Japanese issue largely occupied the time of the legislature today.

After an hour's debate on the mi nority resolution it was voted down and the senate without debate adopted the majority resolution protesting against the intereference of the federal government in the school affairs of this state, requested the governor and nounced the gelatin industry and exattorney general to do all things necessary to protect and save the rights of the state and commended them for the action already taken by them.

Both resolutions were substitutes and in the nature of compromises, all was principally a matter of phraseology, the resolution reported by the Democrats protesting against "the Democrats protesting against president's interference," instead of 'federal government,'' as contained in the resolution adopted, and instructed the governor and attorney general to assert the sovereign rights of the state as guaranteed to it by the constitution.

Senators Change Front There was a decided change in the bellicose attitude of some of the sena-

tors who were supposed to be for more radical action and the expected arraignment of President Roosevelt and the federal government for their attidevelopment.

The development was mild and the language of the few senators who spoke in support of or against the minority

Resolutions were introduced in both move duties on all building materials shaken and burned by earthquake and

Senator Welch asked for the appointment of a senatorial committee to in vestigate the voting machines now in use in this state to ascertain whether the treatment of curable tuberculosis.

DYNAMITE EXPLODES; NINE DIE

Richmond, Va .- Nine men, all forigners, were blown to pieces by a dynamite explosion today on the Tidewater railroad near Perisburg, Va. The laborers were at dinner and a quantity of the explosive, which was being thawed in front of a fire, blew up.

TIONS

GELATIN MADE

Washington-In testimony given before the house committee on agricul-ture today Dr Harvey W. Wiley, chief of the chemistry bureau of the United Mayor Tait, who is injured, that the States department of agriculture, deposed the coll storage fallacy. Wiley said of gelatin: Dr.

"It is made from the scrapings from Those hides that smell to hides. heaven are treated and trimmed and these trimmings are used to make gelatin. The marine hospital service found tetanus germs in gelatin."

Dr. Wiley says the gelatin factories are the dirtiest in the world; that the hides used are treated with alkali, which is rubbed into them for shipment. He said this gelatin is some times made in glue factories, and that stuff that is not fit for glue is made into gelatin.

In reply to questions from Represen tative Baughn, Dr. Wiley said:

Used in Ice Cream

"Gelatin is used in ice cream and andies and for making the capsules that you take your medicine in. He added that there is no objection

to gelatin if properly made, and that there is plenty of wholesome raw material to make it of.

Dr. Wiley has been conducting experiments in the cold storage warehouses of Washington, and he gave the results of experiments with all kinds of foodstuffs.

"Milk begins to deteriorate right away and so does cream," said Dr. Wiley. "Eggs also begin to deterioate immediately. Fruit is improved and sometimes continues to improve for three months. Meat improves up to has reached the maximum and then it

begins to go down. I don't care how hard it is frozen.'' When asked for further explanation of the deterioration of meat frozen in

cold storage Dr. Wiley said: "We find that meats do not taste as well and they don't smell as well, as every time the jury can pick that which has been kept over three months. Take our quail. We have quail a year old and we have a tresh quail cooked at the same time. We cook them just An appropriation of \$150,000 is asked alike and every time the jury can pick out the frozen one blindfolded.'

Dr. Wiley stated that most foods im-

prove when properly kept for a short time, but he said the object of his experiments is to inform the public, and particularly the cold storage people how long they may safely keep food in He said that as yet he has storage. been unable to determine whether drawn or undrawn poultry keeps bet

COLD HAND GIRL

IS MOST ELUSIVE

perience

Long Beach-W. H. Hermann, the coung Canadian whose pocketbook and cash were filched from his overcoat pocket a month ago by a pretty blonde, "the girl with the cold hands," was in Long Beach last night and related a strange coincidence which occurred Saturday night.

"I was in a dance hall in Los An-geles," he said, "when a gentleman friend told me he wanted me to meet a chance acquaintance of his. He led me across the hall and introduced me to a blonde beauty, the very one whose cold hands were shyly stuck in my pockets in front of the Salt Lake depot some weeks ago. I threw it up to her at once. She denied that her hands had ever been in my overcoat pocket, or any of my other pockets for that matter, and said that a friend of hers had taken my coin. She said they had considered it a great lark and that they didn't suppose that I cared enough about a measly little \$12 to make a fuss about it.

"She said this friend of hers was at the dance hall and that she would bring her around. She further asserted that if I wanted the money back this Well, she lass would hand it over. struck across the floor, looking here and there, as if hunting her friend. Soon she was lost from my sight in the crowd. I waited for her to come back, and I am still waiting."

Hermann said that he would return to Winnipeg in a short time and that he would warn any of his friends conmanner at Butte, Mont., 9000 tons; at templating a trip to sunny Southern Bisbee 3000, and 700 tons at Cananea California to beware of "the girl with the cold hands."

> EXPECTS JAPANESE TROUBLE IN COURT

New Jersey Justice Believes Federal Interference with Schools of State Must Be Decided by Supreme Bench

New York-Justice J. Franklin Fort of the supreme court of New Jersey declared that he believed the courts of the United States had the right to settle once and for all the Japanese question in California.

the delivery of the copper. His affida-vit reciting the above facts is inclosed. The justice was one of the guests at the annual dinner of the Middlebury We submit that the present danger College Alumni association. In discussing the power of the judiciary under the constitution of the United States he said:

Plan For Big Smelter in Goldfied District

That the Goldfied district, in Nevada will have a smelter, both for the treatment of silicious and copper ores, within the next eight months is now an almost assured fact. This announcement was given out by Colonel O. P. Posey, the mining and smelter man, upon his return to Goldfied, a few days

ago from Los Angeles. Colonel Posey said that he and his associates had been accumulating copper properties in the Lida, Cuprite and other well-known Southern Nevada copper camps for the past year or more and that all of these properties were undergoing development work to determine the tonnage that could be produred. It has been demonstrated that a sufficient quantity of ore, suitable for the purposes stated above, can be obtained.

eral land office. "Goldfied has been selected as the place for the smelter, " said Mr. Posey, "The secretary of the interior: To prevent the fraud now practiced in the and when construction work comacquisition of public lands of the mences everything will be arranged for and no time will be lost in completing the plant. The smelter will have a capacity of from 300 to 500 tons per day, and in addition to the ordinary blast furnaces for silicious ores it will have reverberatories for the treatment of copper."

FAMISHED -PROSPECTORS, RE-PULSED BY WATER-HOLE OWNER

El Paso, Tex .- In a fight for water, which meant life to them out on the Arizona desert Friday, one prospector was wounded and the owner of the water hole, with his slender and insufficient supply of water, in that barren region priceless, was killed. After two weeks' prospecting for gold on the desert two young brothers, Bill and Lynn Desplain, nearly perishing from thirst, came upon a wider hole known as "Bears wells," twenty-five miles from Salome, Ariz.

An old man named Jones had taken possession of the water hole and forbade the prospectors filling their empty kegs. Refusing to obey him they continued to replenish their supplies from the hole, when Jones seized his rifle agricultural districts, or when characand opened fire upon them and the fight ter has been fixed by investigation and classification." began. When it was over Jones was dead and Bill Desplain was badly wounded.

FAMOUS LOVERS'MEETING PLACE COMES TO BAD END

Rome-The palace at Verona at whose balcony Romeo made love to turies, so many other means of locomo-tion having been found. In fact, the Juliet was recently turned into a garage for automobiles and now the Malaprofessor holds the opinion that man ing between Pablo and Francesca, de-scribed by Dante in the "Divina Com-media," is supposed to have taken place, has become a macaroni factory.

In response to inquiries from Repre sentative Haskins as to the advisa-Aroused by Continued Activity of bility of freezing oysters to preserve them for shipment Dr. Wiley said: "They ought not to be frozen. That ruins them and as soon as they thaw they are dangerous."

He urged that oysters be shipped alive and in the shell. Dr. Wiley said the oysters sent out in tin cans are all right.

FIREMEN BURIED UNDER ICY MASS
