## NOTHING I ATE AGREED WITH ME

MRS. LEONORA BODENHAMER.

Mrs. Leonora Bodenhamer, R. F. D. Box 99, Kernersville, N. C., writes: "I suffered with stomach trouble and indigestion for some time, and nothing that I ate agreed with me. I was very nervous and experienced a continual feeling of uneasiness and fear. took medicine from the doctor, but it did me no good.

I found in one of your Peruna books a description of my symptoms. I then wrote to Dr. Hartman for advice. He said I had catarrh of the stomach. took Peruna and Manalin and followed his directions and can now say that 1 feel as well as I ever did.

I hope that all who are afflicted with the same symptoms will take Perana, as it has certainly cured me." The above is only one of hundreds

who have written similar letters to Dr. Hartman. Just one such case as this entitles Peruna to the candid considderation of every one similarly afflicted. If this be true of the testimony of one person what ought to be the testimony of hundreds, yes thousands, of honest, sincere people? We have in our files a great many other testimonials.

the most delightful humorist of America, offered to appoint Theoodre Hailman, a leading lawyer of Kentucky and a brilliant wit, a colonel on his staff. Hallman declined the honor on the ground that it was the most superfluous office in the world, but he intimated that he would accept the position of private on the governor's staff. The wit of the thing appealed to Knott's sense of humor, and accordingly he directed his secretary of State -"Quinine Jim" McKenzie was the man-to make out the commission and send it to Theodore, which was instantly done, and Hallman had the distinction of being a private on the staff of a governor, a position no other American ever attained and one to which no other American ever aspired.

#### Too Rapid Growth.

The minister's G-year-old son is of a very critical, literal turn of mind, and his father's sermons sometimes puzzle him sorely. He regards his father as the embodiment of truth and wisdom, but he has difficulty in harmonizing the dominie's pulpit utterances with the world as it really is. His parents encourage him to express his opinions and clear up his doubts as much as possible. So one Sunday at dinner, after a long period of thought, they were surprised when he said gravely, "Papa, you said one thing in your sermon today that I don't think is so at all."

"Well, what's that, my boy?" asked the clergyman.

"Why, papa, you said, 'The boy of to-day is the man of to-morrow.' That's too soon."-Pittsburg Post.

Italy's Dwindling Population. Some strikingly curious population sta-tistics are now being published in Rome. Some years ago the Italian population was one of the most prolific in Europe, and in one period of twenty years increased from 28,000,000 to 33,000,000. Now the tendency is strongly in the opposite direction, while, at the same time, emigration which now reaches a million souls year is leaving whole rural districts depopulated. The annual increase had declined from 7.38 per 1,000 in 1901 to 8.1 in 1906. In the flourishing industrial districts there is some progressive increase, but in the rural provinces, like Labuan, Apulia, Sicily and the Campagna, it dwindles down as low as 1.1 per 1,000 .- London Globe.

#### Device to Pack Butter.

Attention has been attracted in Ger many to a new method of packing butter which has been tried with satis factory results in connection with shipments from Melbourne to Kimberley. The method, which is said to have been already extensively adopted in Aus tralia, consists in placing the butter in a box formed of six plates of ordinary window glass whose edges are closed with gum paper. The glass box is covered with a layer of burnt gypsum (plaster of paris) six to seven millimeters (about one-fifth of an inch) thick and is then wrapped in specially prepared waterproof packing paper. As gypsum is a bad conductor of heat, a regular temperature is maintained within the glass box. At present the cases are made of sufficient size to contain 100 kilograms (220 pounds)

#### The Christian Sunday.

The keeping of Sunday, the first day of the week, as a sacred day in memory of the resurrection and of the descent of the Holy Ghost dates from the beginning of Christianity. It was called the Lords day in all the churches, but gradually acquired the name of Sun-day from the Romans, who called the first day of the week dies solis, or day sacred to the sun. The first official recognition of Sunday as a holy day is in an edict of the Roman Emperor Constantine in 321 ordering that all work should cease in the cities "on the venerable Sunday." but permitting necessary farm work to be attended to .- St. Louis Republic.

There are some oddities in Chile connected with the sphere of woman that deserve mention. One is that women act as conductors on the street cars. ### ES KEPT OPEN C FED AND BY IMPURITIES IN THE BLOOD

Whenever a sore refuses to heal it is because the blood is not pure and healthy as it should be, but is infected with poisonous germs or some old blood taint which has corrupted and polluted the circulation. Those most usually afflicted with old sores are persons who have reached or passed middle life. The vitality of the blood and strength of the system have naturally begun to decline, and the poisonous germs which have accumulated because of a sluggish and inactive condition of the system, or some hereditary taint which has hitherto been held in check, now force an outlet on the face, arms, legs or other part of the body. The place grows red and angry, festers and eats into the surrounding tissue until it becomes a chronic and stubborn ulcer, fed and hept open by the impurities with which the blood is saturated. Nothing is more trying and disagreeable than a stubborn, non-healing sore. The very fact that it resists ordinary remedies and treatments is good reason for suspicion; the same germ-producing cancerous ulcers is back of every old sore, and especially is this true if the trouble is an inherited one. Washes, salves, nor indeed anything else, applied directly to the sore, can do any permanent good ; neither will remov-
