If any republican had been so discourtuous as to speak of Senator Newlands in the sneering tone adopted by the pin-feather politicians recently, poor old Mother Democracy would hold up her holy hands in horror. Sic 'em, Tige!

The action of the gosling wing of the Nevada democracy in jumping on Senator Newlands for daring to ask a hearing for the interests of the people who elected him, puts us poor republicans in the hole again. We don't know who to hit at now.

Talking of the lobby at Washington, when the Secretary of the Interior, acting, of course, with the approval of the President, issues an order saying that the government will recognize publications made only by newspapers "whose political principles are in harmony with the administration," that is certainly some big stick.

The painful effort to make it appear that there is or was a controversy between the school board and the teachers has resulted in nothing. It appears that the board had a perfect right to refuse to give the teachers all they asked and the teachers a perfect right to go where they could do better if they had the chance. Everybody appears to be happy and satisfied.

We have heard the action of Secretary of the Interior Lane in issuing his order to the U. S. Land Office officials to patronize democratic newspapers only referred to as frankness. It sure was. It reminds one of the darky arrested for robbing hen roosts. When brought to trial and asked if he was the defendant in the case he answered frankly, "No, sah, I is de gen'man what stole de chickens."

WAGES AND PRICES.

Sugar Beet Farmers and Workers Get Much Higher Rates Here.

The difference between the conditions under which beet sugar is produced in the United States and Europe is strikingly shown by a report just published as a United States senate document. Summarizing 117 reports from various European countries, this document shows that 65 cents a day was the highest rate earned by men working in the European beet fields, while 46 cents was the average rate. In all the European countries, however, the greater part of the field labor is done by women and children at wages ranging from 10 cents a day for children in Russia to 36 cents a day for women in Denmark. To these poor laborers the \$2.60 a day, which represents the average earnings of field workers in the United States, must appear a princely income.

Among the factory workers engaged in beet sugar production the difference is equally striking. The men working in the factories of the great European sugar making countries, France and Germany, receive an average daily wage of 84 cents, according to official figures published by their own governments. The average American wage for employees in the beet sugar factories, \$2.99 a day, is more than three times as great.

Likewise the farmers who grow the beets in Europe receive only \$4 to \$4.50 a ton for their crops, although they pay four to five times as much rent for their land as the American farmer does.

While these figures serve to show why it is that Europe can produce sugar cheaper than the United States and why the present tariff on 10% sugar is necessary to enable American factories to continue these high rates, it is an interesting fact that the only important country of Europe where the people are able to buy sugar cheaper than in the United States is England. Even in England the price paid for the sugar most generally used is as high as the prices paid here. On the whole the lot of an American sugar beet grower or worker must be considered far preferable to that of his European competitor.

SIMPLE ADDITION.

Filth and stagnant water breed flies and mosquitoes. Filth and mosquitoes breed death and disease. See the point?

Mining Troubles.

Suit was brought Thursday by Frank A. Clark of this city against J. B. Jensen to recover \$355.40 and costs of suit due to supplies furnished to said Jensen for use at the Potosi mine.

The complaint alleges that the Ed. W. Clark Forwarding Co. sold to defendant goods to the amount of \$296.95 between April 4 and April 9, 1913, and that W. D. Worrell sold goods to the amount of \$48.45 between April 8 and May 17, 1913, both of said claims having been assigned to plaintiff, Frank A. Clark on June 19th.

An attachment was issued, and the "99" mine, a copper property in the Yellow Pine district, was attached to satisfy the claim. Stevens and Van Pelt represent the plaintiff.

THE CLEANUP CURE.

EVERY single fly in a house is a danger to the health and even to the lives of the occupants. People do not realize this. For a fly to drop into a jug of milk and to crawl across food, cooked or uncooked, is such a commonplace and simple thing that we do not realize the danger of it.

But if we could follow up the life of a fly for a single day we should be appalled at the filthiness of its habits and the pestilential character of its peregrinations.

Flies love the vilest filth, and they are attracted alike to the sweetest and daintiest of food-stuffs. Just as in the house no fly can be kept away from the food, so outdoors no garbage is ever seen in the summer without its attendant flies. It can be taken for granted that every fly in a house has but recently come from feasting in the vilest filth to be found in the neighborhood. It is well known that flies multiply in exact proportion to the amount of garbage and filth in a locality. In a locality that is kept tidy and clean and sweet there are very few flies, but wherever filth exists there flies multiply by myriads. The more filth the more flies, the more flies the more disease.

Let us, therefore, instead of crying "Swat the fly!" clear away all garbage or dirt in the vicinity of our houses and thus prevent the plague from multiplying.

Cautious.

Jeweler—Shall I mark the ring "From George to Grace?" Engaged Young Man—No; I guess you had better make it "From G. to G." You see, Gertrude is the name of my second choice.—Washington Star.

Not of Much Account.

The lord chief justice of England used to sing in the choir of a parish church. A woman once asked the verger to point out Sir Richard Webster as he then was. The verger replied, "Well, ma'am, that's the vicar and them's the curates and I'm the verger, but as for the choir, as long as they does their dooty we don't inquire into their hantecedents!"

Fireworks Notice.

Notice is hereby given that by a resolution of the Board of City Commissioners of the City of Las Vegas, Clark County, Nevada, passed June 4th, A. D. 1913, no fireworks of any kind will be allowed within the limits of Clark's Las Vegas Townsite on the 4th day of July, A. D. 1913, or any other time.

Witness my hand and seal of the City of Las Vegas, Nevada, this 5th day of June, A. D. 1913.

W. E. HAWKINS, Mayor.
[SEAL] HARLEY A. HARMON, City Clerk.

Notice.

Notice is hereby given that an ordinance of the City of Las Vegas prohibiting obstructions of the streets, alleys, sidewalks and sidewalk spaces by fences and other obstructions, and providing for the removal of the same, was read for the first time before the Board of City Commissioners at their regular meeting held June 4th, 1913, and will come up for second reading and passage July 2nd, 1913.

Notice.

Notice is hereby given that an ordinance requiring that all persons who, within the limits of the City of Las Vegas, buy, sell, exchange or otherwise deal in or with second-hand goods as a business shall keep a register, was read for the first time before the Board of City Commissioners at their regular meeting held June 4th, 1913, and will come up for second reading and passage July 2nd, 1913.

A Complete Map.

Complete, sectionized map of Las Vegas Valley, showing all land entries, owners' names, artesian wells, school districts, etc. Something brand new. \$4.00 each. J. T. McWILLIAMS.

THE FAMILY WASH MADE SCIENTIFIC

Every Housewife Should Know That the Health of Her Family Depends to a Large Extent Upon Proper Laundry Work.

EVERY housewife knows that the health of her family depends to a very large extent upon the proper drying of the weekly laundry. Not only will gray and dingy looking sheets and clothes result from improper airing, but more than one bad cold has been traced to contact with garments that have not been thoroughly dried.

Therefore for the sake of health as well as the appearance of the weekly wash every woman who runs a house should understand thoroughly the best way in which to dry clothes. Perhaps stockings suffer more than anything else at the hands of the unscientific laundry. Unless due warning is given there seems to be a natural instinct that makes the laundress hang up stockings with a peg at the toe. The mischief only becomes apparent when the hosiery is in the hands of the mender. It may be easily proved by any one that a small hole in the toe is turned into a larger one by the pressure of the peg, that a thin place is turned into a hole through the same means, and therefore it may be argued that even new hosiery is similarly weakened, although the damage is not immediately in evidence.

Holes Made Larger.

Shirts, vests and nightgowns should be hung by the shoulders. Combations should be hung with about twelve inches of each leg passed over the line. If the waist part hangs downward less space is occupied, and, moreover, the garment dries more quickly, as there is less chance of the heavy part being lifted up by the wind and entangled with the line.

Curtains and sheets require to be spread out straight upon a line, for if they dry away they are very difficult to iron. Many housewives dry their curtains so that they do not need to be ironed. When curtains of uniform size are employed in the house they have a frame of wood made the same size as the curtains. Small pegs along each of the four sides serve to keep the curtain tightly stretched, and when it is dry it is ready for hanging at the window. When not in use the frame is taken apart at the four corners and is stored without taking up much room.

Yet another way of drying curtains so that they need not be ironed is to cover the carpet in a spare room with a sheet and spread out the curtains with pins along the edges until they are thoroughly dry.

No Absolute Rule.

No absolute rule can be given for the length of time required for drying clothes, since so much depends upon the weather. If the garments are to be perfectly smooth when they have been ironed or mangled they must be fairly damp and, moreover, evenly dampened, which can only be insured by allowing them to be several hours after they are folded.

In good drying weather the garments dry so quickly that they are too dry when they are brought in from the drying ground and need to be sprinkled with water. Water as hot as can be borne should be used, for when rolled up after the sprinkling the steam from the hot water makes the dampness more equal than when cold water is used.

When the weather is bad for drying it is not necessary thoroughly to dry calico and linen garments, but discretion must be used, and experience will soon teach how damp a garment can be when folded so as to get the best results.

CULINARY KINKS.

Timely Hints For the Clever Housewife.

In cooking beans and peas their flavor will be much better if they are cooked in as little water as possible. To use sour milk for griddlecakes never add baking powder, but instead an even teaspoonful of baking soda to each cup of milk.

If you rinse a plate with cold water before breaking the eggs on it add to them a pinch of salt and then stand where there is a current of air and you will have no difficulty in beating them to a froth.

On taking cakes baked in a tin out of the oven stand the tin on a wet cloth for ten or fifteen minutes. The cakes can then be turned out without the aid of a knife and will not stick to the tin, as frequently happens.

To test milk dip a well polished knitting needle into a pitcher of milk and quickly withdraw it in an upright position. If the milk has only a small proportion of water this will prevent even a drop of milk adhering to the needle.

For Tired Feet.

Many persons who are compelled to be much upon their feet suffer greatly with swollen, tender feet. Relief will be found in a hot foot bath containing a tablespoonful each of borax, spirits of ammonia and alcohol, a teaspoonful each of witch hazel and camphor. Keep the feet in the water about ten minutes. In the morning rub talcum powder or some other good preparation on the feet and wear high shoes which have broad soles and low heels.

Horace Greeley once said, "The way to resume is to resume."

In this H. G. was right. He usually was.

The way to do anything is to do that thing.

For example:

THE WAY TO BOOM IS TO BOOM

This does not mean running around in circles and yelling your head off.

The only thing boomed by that method is the dippy house.

The way to boom a town is by intelligent and united effort.

Organize a board of trade, a commercial club or some similar body whose chief business it shall be to make the little town grow.

Use printer's ink and Uncle Sam's postoffice.

TALK for the town, WRITE letters for the town, get the local papers to ROOT for the town.

Write to individuals and firms seeking a new location. Tell them what advantages this burg has to offer.

Publicity Means Progress.

Let the world know this town is on the map.

REMINGTON UMC METALLIC CARTRIDGES
Made by the Foremost Ammunition Concern in America

THE biggest name in the ammunition and firearms world today is Remington-UMC. Whether your arm is a Remington or any other standard make, whatever its calibre and the load you need, you want Remington-UMC metallics—not because they are necessarily stamped with the same name as your firearm, but because they give more accurate results.

This Company has been making ammunition for fifty years. We produce metallics for every standard make of arm—and every Remington-UMC cartridge is tested in the arm for which it is made.

There is a dealer in this community who can give you Remington-UMC Metallics for your rifle, your pistol. Find him. Ask him for them. Look for the Red Ball Mark on every box of metallics and shot shells you buy.

Remington Arms-Union Metallic Cartridge Co.
299 Broadway New York

NOTICE FOR PUBLICATION

Serial 01982.
Department of the Interior.
U. S. Land Office at Carson City, Nevada,
May 23, 1913.

Notice is hereby given that Perry L. Smith, of Las Vegas, Nevada, who, on July 26, 1906, made homestead entry No. 01982, for the W½SE¼, NE¼SW¼, and SE¼NW¼ of Section 31, Township 17 South, Range 56 East, Mount Diablo Meridian, has filed notice of intention to make five year proof, to establish claim to the land above described, before Peter Buol, United States Commissioner, at Las Vegas, Nevada, on the 14th day of July, 1913.

Claimant names as witnesses:
Harry E. Matthews, Las Vegas, Nevada,
Joseph G. Laravey " " "
James H. Ladd " " "
Edward W. Griffith " " "

LOUIS J. COHN, Register.
Date of first publication, May 31, 1913.
Date of last publication, June 28, 1913.

SUMMONS

In the District Court of the Fourth Judicial District in and for Clark County, State of Nevada.

Grace M. P. Tunstall, plaintiff, vs. Whitnell Pugh Tunstall, defendant.

Action brought in the District Court, Clark County, State of Nevada, and the complaint filed in the office of the clerk of said county.

The State of Nevada sends greeting to Whitnell Pugh Tunstall, defendant.

You are hereby required to appear in an action brought against you by the above-named plaintiff in the District Court of the Fourth Judicial District of the State of Nevada, in and for the County of Clark, and to answer the complaint filed therein, within ten days (exclusive of the day of service) after the service on you of this summons, if served within this county; or, if served out of this county, but in this district within twenty days; otherwise, within forty days; or judgment by default will be taken against you according to the prayer of said complaint.

Said action is brought to secure a decree from said court dissolving the bonds of matrimony now and heretofore existing between the plaintiff and the defendant, on the ground and for the reason that for more than one year last past the defendant has wholly and fully failed and neglected to supply and furnish the plaintiff with the common necessities of life and that such failure and neglect are and were not the result of poverty on the defendant's part which could not have been avoided by the practice of ordinary industry and that such failure still exists, all of which more fully and at large appears from the verified complaint of the plaintiff on file in said court and to which reference is hereby made.

And you are hereby notified that if you fail to appear and answer said complaint, as above required, said plaintiff will apply to the court for the relief demanded in said complaint.

Given under my hand and the seal of the District Court of the Fourth Judicial District of the State of Nevada, in and for the County of Clark, this 31st day of May, A. D. 1913.

[SEAL] HARLEY HARMON, County Clerk and ex-officio Clerk of the District Court aforesaid.
First publication, June 21, 1913.
Last publication, July 26, 1913.
