## BRITISH EXPERT ANALYZES WAR SAVINGS WORK

Large Number of Investors Gives Greater Stability to Financial Situation.

Of the benefit to a nation of popular investment in government securities of small denominations, a student of the British War Savings movement writes:

"As the nation's power to save and accumulate capital depends upon an excess of income over necessary expenditure and as this power to save is obviously greater amongst the well-to-do, it is imperative that future propagandist work should be conducted amongst the upper and middle classes no less than amongst the wage earners.

"The work must also be continued amongst the wage earners, for obvious reasons. We all realize the advantages to be derived by the state from the more even distribution of wealth which an increase in the number of small investors implies. We all realize the greater stability which a large number of small investors must give to the financial situation. It is certain also that wise spending and saving amongst the masses of the people tends to increase their efficiency and develop their self-respect. It must also result in the growth of a more efficient race of producers in the next generation. In this direction wise spending may ultimately have no less beneficial effects than saving although not so immediately adding to the material wealth of the nation."

There is food for thought in this for the people of the nation with our War Savings Stamps so accessible.

## PRICES DOWN—MILEAGE UP

### Goodrich's New Adjustment

Having, on May 12, marked down tire prices, Goodrich next promptly marked up its adjustment mileage figures.

It lifted adjustments to 6,000 miles for Safety Treads, and 8,000 for Silvertown Cords, instead of 3,500 and 5,000 miles, respectively heretofore in force

Goodrich marked down prices in strict accordance with the Goodrich policy always to give the user the benefit of Goodrich economies of manufacture.

Goodrich marked up its adjustment mileage because the wonderful endurance and service Goodrich Tires are showing in actual service demanded adjustment that squared with performance.

Remember it's a Goodrich Adjustment, always safe and conservative, based on a greater mileage consistently given by Goodrich Tires

Goodrich knows its tires are brimful of mileage, and it wants every automobile driver to have a generous share of it.
