**A REVIVAL OF HOPE.
PROSPERITY FOR FARMERS.
IMPORTANT "CROP NEWS."
NATURE'S WISDOM.**

There is revival of the hope that President Coolidge will consent to run for a second election this year. Everybody knows he meant it when he said "I do not choose." Everybody knows he means it when he says now he does not want any of his friends to lift a finger to nominate him.

But the oil scandal makes a difference in the situation, and everyone of intelligence reserves the right to change his mind.

Cotton "pickers and strippers," replacing human fingers with machinery, are now working in northwestern Texas.

This is good news. Prosperity for farmers depends on machinery, on doing with the earth's products what Ford, first, did with automobiles.

In the Gary rolling mill half a dozen men roll out steel rails that ten thousand could not have produced with old sledge hammer methods. No human hand touches the iron, until a tall young Scandinavian runs his keen blue eye along the finished rail and signals another man, who straightens it. Machine dig the ore, put it in ships, unload it, handle it, cold and hot.

Six men, some day, will run a 1,000-acre farm, and multiply its crops by ten. Don't worry about over-population.

The infant death rate is down in Pennsylvania and New York. And that's the most important "crop news" this year.

If only civilization took as much interest in babies as it does in young calves, pigs, boll weevil and corn borers.

Consider Nature's limitless fecundity.

Mr. Ringling shows you this year a sea-elephant weighing four tons that eats 5 per cent of his weight, or 200 pounds of herrings, at one meal.

Any one of a dozen fishes in one generation would fill all the oceans and seas of the world solid with fish if they and their descendants all survive. The elephant, on the other hand, lives a hundred years and only has two or three children at most. Wise nature.

Canada has hanged George McDonald, forger, confidence man and murderer. His young wife, saved from the noose by public appeals, sent the word, "I shall never cease praying for you." She, poor woman, will have time to keep that promise in her life imprisonment. In Canada it MEANS life imprisonment.

Sparing that woman is a step toward civilization. Once thousands a year were hanged for petty crimes. Hence the expression, "As well be hanged for a sheep as a lamb." Children were hanged and quartered in Franklin's childhood.

"Civilization" has stopped hanging children, and gradually will stop hanging women, and finally will STOP HANGING. And men, astonished, will see crime diminish.

Tom Wise is dead, Shepherd of the Lamb's Club, and a good actor. Years ago William A. Brady asked this writer to see Tom Wise in a play called "A Gentleman from Mississippi" that Brady was producing.

This writer told Brady, "You have a first class play, and there is in it a young actor playing a minor part, jumping over chairs, etc., that is going to make a success. You ought to make a contract with him." The young man's name was Douglas Fairbanks.

What Cooper wrote about the last noble red men will soon be written of the last wild horses. Not long afterward, thanks to the motor truck, will come the last of the tame horses.

In the State of Washington a thousand wild horses yesterday were being driven toward Yakima, their hides to be sold, their flesh fed to fox farms, or fed to dogs and chickens. The carcasses are worth \$3 each.

A big candy factory is closed in New York City, called "a menace to health" by Commissioner Harris.

Buy pure candies from shops and manufacturers with established reputations. All sorts of trash is fed to children. A certain clay mixed and flavored and a little inferior chocolate is sold for pure chocolate. That crime should mean twenty years in jail.

About Your Health

Things You Should Know

by John Joseph Gaines, M. D.

OLD REMEDIES

Old friends, are by virtue of their lasting qualities, usually the best; and so it is with medicines—there are few better or safer than the time-tried. Some of our most valuable agents for healing the sick may be said to be hoary with age—yet we know their action much more thoroughly than that many of the new remedies, thus we find them trustworthy.

I have before me a patriarch in medical literature—a book 115 years old; it is interesting to note the

medicines in use today that were utilized then, and the list is not short. Camphor is one; opium, the good servant and the bad master; alcohol (spelled "alkohol") of which the same may truly be said—mercury, then called "quicksilver," and two of its derivatives, calomel and belladonna, and such like, unless "mass of quick-silver." These and many others remain in use today, and doubtless will live when most of the modern, highly-commercialized synthetics are forgotten with the expiration of the patent or copyrighted label.

The poultice and the liniment so popular then, and the much-used "salve" are fast becoming unheard of, and, perhaps, wisely so. The old-fashioned smear, grime, and stain, as well as the nauseating bolus have been relegated to the rear, and we rejoice thereat. The alkaoid of science has about replaced the crude drug. Medicine has held pace with world-advancement very creditably.

May I suggest here that when you clean house this spring you neglect not your household remedies; brighten and fill the castor-oil bottle, the camphor flask, the iodine container, the stearate-of-zinc shaker, the carbolated vaseline jug. Be ready for most emergencies, with

good, old, time tried remedies that you know the most about; it will make the doctor's task lighter if you are compelled to summon him. A roll of adhesive tape comes in handy when needed. Don't keep active poisons on hand, such as strychnia tablets, aconite, calomel, belladonna, and such like, unless with full knowledge and advice of your physician.

Millions of Model T Fords are still in active service

FOR nearly twenty years, the Model T Ford led the motor industry and it still is used by more people than any other automobile. More than eight million Model T Fords are in active service today—an indication of their sturdy worth, reliability and economy.

Because of the tremendous investment which people have in these cars and because so many of them will be driven for two, three, and even five more years, the Ford Motor Company will continue to make replacement parts until, as Henry Ford himself says, "the last Model T is off the road."

For the Ford Motor Company has always believed that its full duty consists not only in making a good automobile at a low price, but also in keeping it running efficiently for you as long as possible at a minimum of expense.

No matter where you live, therefore, you can still buy Model T Ford parts with the same assurance as formerly, knowing that they will give you the kind of service you have a right to expect, and at the same time protect the money you have invested in your car.

All Ford replacement parts, as you may know, are made of the same materials and in the same way as those from which your car was originally assembled, and are low in price because of the established Ford policy.

So that you may get the greatest use from your Model T Ford over the longest period of time, we suggest that you take the car to the nearest Ford dealer and have him estimate on the cost of any replacement parts which may be necessary. You may find that a very small expenditure will maintain the value of your car and will be the means of giving you thousands of miles of additional service.

"Putting the Cart Before the Horse"

Borrowing money and not paying it back when due is like putting the cart before the horse, it gets you nowhere. "Easy Money" has hurt more farmers than it has helped. It is important to borrow money when you need it, but it is equally important that you pay it back when due. That builds credit standing with your bank.

We are always ready and eager to lend money to responsible farmers. But we must make good loans and established credit gets most favorable attention.

You are cordially invited to avail yourself of our banking Service.
