SCORPION BITE ON FIRST VISIT

On August 5, 1906, there landed in Las Vegas a young doctor, not long out of medical school, who was looking for a place in which to light and grow up with the community. He found a cubby hole

for an office, and without much else than an instrument case and a box of pills, started in business. This was Dr. Roy W. Martin, now president of the Chamber of Commerce and live wire citizen. On August 15th, ten days after his arrival, the young physician had a patient in the person of George D. Vickers, who had been stung on the thumb by a scorpion. Being of the east and unaccustomed to frontier desert towns, to say nothing of scorpions, Mr. Vickers suffered considerable fright as well

as pain. After several hours of treatment by Dr. Martin, the thumb showed unmistakable signs of improvement, and Mr. Vickers went his way, leaving town almost immediately, so that the doctor did not see him again. Yesterday George D. Vickers and his son arrived in Las Vegas and hunted Dr. Martin up at once. They have announced their intention of locating here and growing up with the country.

WARNING!
The Sheriff's office warns all automobile owners to lock their cars before leaving them parked on the city streets. Better be safe than sorry.
