SENIORS PLAN BREEZE ISSUE

Work on the special senior edition of the Desert Breeze, Las Vegas' high school paper, will start soon, according to Alice Doherty, editor of the Breeze, who will edit this special eight-page edition also.

The senior issue will make its appearance May 24.

The juniors are publishing the next edition of The Breeze, with Marion Dobrowsky as editor.

A magazine writer asserts that if insanity continues at its present rate, in 200 years there will not be a sane man or woman in the United States. What! Only one person going nutty every year!

DR. MAYO SAYS NATION LIKES DRY LAW BEST

Famous Surgeon Asserts Good Water is One of Rum's Greatest Foes.

(L. A. Examiner)

"Only the froth of society is opposed to prohibition; the general mass of the population is pretty well satisfied."

Dr. William J. Mayo, of the famous Mayo brothers of Rochester, Minn., made this statement today in his suite in the Biltmore hotel, following his arrival on a cross-country automobile tour.

"Prohibition is only a matter of education," commented the distinguished medical visitor, expressing the belief that "wets" are causing people to believe there is more dissatisfaction with prohibition than is really the case.

"Prices charged for intoxicants prove liquor is not plentiful," he said.

From the point of view of public health, Dr. Mayo said there was no question but that abstinence from the drinking of liquor would prove of great benefit.

In connection with prohibition, Dr. Mayo directed attention to a much-neglected factor in the cause mentioned, in illustration, Vienna, where, he said, with the creation of an adequate supply of pure drinking water consumption of alcoholic drinks fell off 40 per cent in 10 years.

Dr. Mayo said that provisions for supplies of good drinking water throughout the United States has also been partly responsible for better health of Americans. But the increase in the span of life in this country has brought about a misunderstanding as to the increase of human afflictions, such as cancer.

"The average life in the time of Queen Elizabeth," he remarked, "was 20 years. Now, it is 58 years. We live" he went on, "to the time when the degenerative disease develops."

ASTOR WOULD BAN WILLS WHICH BAN SECOND WEDDINGS

LONDON, April 30 (AP)—Wives and husbands who, in their wills, penalize their spouses for re-marriage, would not be able to control from the grave the destinies of the living, under a bill introduced in the House of Lords by Lord Astor.

The measure aims at insuring proper provision for surviving spouse, children and other dependents of a deceased person and forbids penalization of a widow who re-marries by the cutting down or the elimination of her inheritance.

Recently there have been several striking instances of posthumous penalization in wills. Sir Ernest Victor Buckley Rutherford bequeathed to his widow the use of his house and furniture and seven-tenths of the residue of his estate, valued at \$635,000, provided she remained a widow. But if she contracts another marriage she would receive only an annuity of \$1250.

A Liverpool merchant bequeathed \$180,000 to his widow but she must give up all except \$5000 if she takes another husband.

The most discussed example, however, was that of Thomas Hardy, the novelist. He had been twice married but his will directed that an annuity of \$3000 to Mrs. Hardy should be halved if she remarries again.

Instances are not lacking in which women left similar restrictions upon widowers but generally it is the widow who is thus restrained. Mrs. Pethick Lawrence, the suffrage leader, states further that English widows have no redress under present law, even if left penniless by well-to-do husbands.

KID CHOCOLATE PUTS K. O. ON TOMMY RYAN

NEW YORK, April 29 (AP)—Kid Chocolate, the stiffpunching Cuban, knocked out Tommy Ryan of Buffalo in the first round of their scheduled ten round bout tonight.

TEXAS BROAD JUMP STAR USES LEAP FROG ABILITY

HOUSTON, Texas, April 30 (AP)—Briggs Manuel is on Rice Institute's track squad because he was adept at playing leap frog.

Broad jumping as a sport never had occurred to Manuel until this spring. He was satisfied with getting exercise at leap frog. Ernest Hjertberg, Rice track coach, saw Manuel and decided he was a "natural."

Now the coach considers his new broad jumper one of the most promising he has seen in years.

WALKING STICK GROWS TO BECOME HUGE TREE

FAIRFIELD, Me., April 30 (AP)—Sixty-five years ago Increase Kendall thrust a willow stick he had cut for a cane into the ground and forgot it.

That was back in the days when this town was known as Kendall's Mills and saw mills were its chief industry. The willow stick took root and today has grown to a tree which is 24 feet in circumference near its base.

WATCH HOMER HONORS, SAYS HACK TO BABE

CHICAGO, April 30 (AP)—Hack Wilson, puddy Cub home run merchant, promises himself a bumper crop of four-ply clouts this season.

Batting fifth, behind Rogers Hornsby, Hack sees great opportunities for circuit bangs.

"The pitchers will strain themselves against Hornsby, and let up against me," said Hack, "and that will make it softer for me."

The Wilsonian reasoning was true during the Cubs' training season. Wilson led in home runs and topped his teammates in general hitting average.

WHITE RUSSIAN EXILES PROBLEM IN SHANGHAI

By MORRIS J. HARRIS (Associated Press Correspondent)

SHANGHAI, April 30 (AP)—Shanghai, the city of exiles, has almost a major problem in the more than 9,000 white Russians within its limits.

Czarist Russia still survives in the thoughts and hopes of many of them. They fled here from the revolution of Lenin and Trotzky, thinking it would be only a matter of a year or two before they could return to a land restored to the old order. Now, after a decade of waiting, they have assigned the home-going to their children.

There are two sides to the local Russian picture. About a fourth of them have settled down to become good "Shanghaianders" in a colony within the French concession. The others are largely homeless wretches eking out a bare existence at odd jobs. The dens of Shanghai impunity have taken toll of the remainder.

The colony in French concession embraces, besides dwelling houses, about 65 shops. Few of the prosperous proprietors came here with any previous experience in trade and practically none had capital.

But they were not the sort to be easily beaten. They borrowed small sums and began their commercial careers unostentatiously. One man for example obtained \$25 from the Russian Benevolent society two years ago. On this capital he started making and peddling chocolates. Now he has a flourishing confectionery.

The community also has social and intellectual organizations. There are charitable and religious societies, a commercial school and a hospital. An amateur dramatic society is among the best of Shanghai's theatrical companies and four newspapers are published in Russian.

Outside this colony the Russian picture is unpleasant. Some of the more than 7,000 residents in other quarters have regular salaries, but of only about \$15 a month. The odd job men are numerous and those of them who get chalice to keep watch aboard a tug or barge receive 50 cents for 12 hours. Many families exist on the earnings of women who work in bars and dance halls and make from \$20 to \$75 a month.

The need for food has driven numerous Russians to take jobs as strike breakers. This has caused much friction with Chinese and cases of assault have been numerous. There is no redress nor real protection for the Russians in such circumstances.

MOVE MADE TO BRING CHEAP CURRENT

MODEL T FORD

THE Ford Motor Company is making a new car, but it is still proud of the Model T. It wants every owner of one of these cars to run it as long as possible at a minimum of trouble and expense.

Because of this policy and because of the investment that millions of motorists have in Model T cars, the Ford Motor Company will continue to supply parts as long as they are needed by Ford owners.

So that you may get the greatest use from your Model T, we suggest that you take it to the nearest Ford dealer and have him estimate on the cost of any replacement parts that may be necessary.

You will find this the economical thing to do because a small expenditure now will help to prevent costlier repairs later on, increase the value of the car, and give you thousands of miles of additional service.

For a labor charge of only \$2.60 you can have your generator put in first-class condition. A new universal joint will be installed for a labor cost of \$3. Overhauling the carburetor costs \$1.50; steering gear, \$3.50; radiator, \$7.50. A complete overhauling of the rear axle assembly runs between \$5.75 and \$7 for labor. An average price of \$22.50 covers the overhauling of the motor and transmission.

These prices are for labor only because the need and number of new parts depend on the condition of each car. The cost of these parts is low, however, because of the Ford policy of manufacturing and selling at a small margin of profit.

Increase Resistance

But medical science is meeting the new situation by seeking to increase the resistive powers of the body, said Dr. Mayo, stating that investigators in the medical field have found that lessening of the body's resistance is to be considered in the development of cancer.

"There is no reason why we should not have come to that conclusion long ago," remarked Dr. Mayo.

Dr. Mayo will remain in Los Angeles about 10 days, at the end of which time he will journey to San Diego to attend a meeting of the Oregon Medical Society and still later he will journey to England for a British Medical Association gathering.

He is accompanied by his wife. "In 30 years of married life," he mused, "I doubt if we have been separated a week."

AMERICA EATS MORE BANANAS EACH YEAR

WASHINGTON, April 30 (AP)—The consumption of bananas in the United States is running ahead of the increase in population.

The department of commerce makes no attempt to explain why the country has been eating from 1,000,000 to 3,000,000 more bunches of bananas each year since 1923.

In that year the number of bunches brought into the United States was 44,000,000. The figure for 1928 was 61,000,000. Honduras and Jamaica are the principal sources of supply.

Legislator O. B. Whitaker of Missouri, who lost his voice recently and has found it an advantage to have to commit his sentiments to paper, thinks it might be better if all legislators were dumb. But you might think from hearing them talk that most of them were.

MORE SKYSCRAPERS FOR NEW YORK CITY

NEW YORK, April 30 (AP)—When construction now under way has been completed the highest buildings in New York will be the Bank of the Manhattan Company, Chrysler, Woolworth, Chanin, Metropolitan Life, No. 1 Wall street, Lincoln, 10 East Fortieth Street, Singer, New York Life, Municipal, New York Central, Hotel Warwick, Equitable Trust, Transportation, Ritz Tower and Bankers Trust.

They range from 840 feet to 539 and from 68 stories to 39. The first six, if piled on top of each other, would be a mile high.

The highest building in the country is the Chicago Apparel Mart structure, 880 feet high.
