padding than those of the other (t.p. encased in thicker padding.

boxing association.

The divot problem is a chief worry of most greenskeeners. Colfers tear up the sod about 200 yards from the tees until the grass looks like a man's face after a bad case of smallpox, and it isn't always a mark of a dub to fail to replace divcts. It is often done by the careless golfer-both professional and amateur.

It is a well known horticultural fact that grass turned over and cut away by a whirling iron club will grow back in place when properly replaced. Those big toupees dug up on the course and left upturned to the sun soon dry out and leave an ugly hole in the fairway How many times has your ball

rolled into one of these divot holes, spoiling a good shot and giving you a bad lie when you were entitled to a fair shot at the ball? Some golfer playing ahead of you was careless!

Replace your divots! "Replace the sod or re-sod the the National Greenskeepers Asso- quartz monogrammed in black. ciation. It is a mark of a real dyed-in-the-wool golf lover always

Champion Will Wrestle in Las Vegas; Papionas Wants to Be Challenger, Lewis May Make Appearance.

Ira Dern, world's light heavyweight wrestling champion, will meet a challenger in Las Vegas on May 22, instead of at an earlier date, it was announced yesterday by Jack Harbertson, promoter of the bout.

Leo Papionas, west coast marvel, is going to try to maneuver his schedule of bouts so that he can appear here at that time, for ha wants to get a start in Las Vegas, it was stated.

If. however, Papionas' other bouts make it impossible for him to appear, either Sailor Jack Lewis, of Phoenix, or George Cotsonoras, of Los Angeles, will meet Dern, according to Harbertson.

are selecting a davenport or any other overstuffed furniture. You want to be sure of durability-you want to know that the product you are buying is going to be just as beautiful and comfortable years from now as it is today.

You are assured of this when you see the Sanoweb label. Extra deep spring units rest upon a support of heavy canvas, which is stretched on coppered wire and joined to the hardwood seatframes by high-tension helical springs which absorball strain. Indestructible, noiseless, no ropes to get out of order-furniture that holds its shape indefinitely. A dozen men can jump upon a Sanoweb bottom at one time without injuring it. Available in a variety of attractive coverings. Before purchasing overstuffed furniture of any kind, insist upon seeing the Sanoweb Construction.
