Out Our Way

WHY MOTHERS GET GRAY. OUT FOR THE COUNT.

STREET PAVING JOB

IT IS SAID that the contractor for the street paving job is making a demand for damages from the city on the plea that the work is being delayed by the necessity for lowering water pipes. It is possible that he may be suffering delay on that account.

But, in the opinion of the Age, there is no justification for the ruthless damage to property which the cuts on Fourth, Bridger and other streets has caused. It appears to us that the Fourth street "canal" is absolutely without engineering justification. And it seems that his deep cutting, in some instances at least, is what causes the trouble with the water pipes.

The Age has been the most strenuous supporter of the paving project from the start. We wished to see the work done, but in such a way as to best serve the interests and the convenience of those whose abutting property must pay the bills.

The Age is disappointed beyond measure at the sorry muddle into which the paving project seems to be degenerating. There is widespread criticism and dissatisfaction with both the engineering and the construction.

We may enumerate some of these causes for dissatisfaction which are being voiced as follows:

The deep cutting of streets which damages the value of abutting property and necessitates in the near future rebuilding of expensive concrete walks.

Poor concrete in the curbs and crooked, uneven alignment of the same.

Inadequate wetting, rolling and compacting of the subgrade.

Poor and uneven mixture of the oil and gravel surfacing material.

Inadequate thickness, less than specified, in the finished surface.

Lack of proper inspection.

It is with regret that the Age is forced to become critical. We had hoped that things were not quite so unsatisfactory as the complaints indicated.

But a comparatively cursory examination of the work in various places has convinced the Age that the property owners are not getting good value for that which is costing them so dearly.

We are not criticizing the board of city commissioners. In approving the specifications and letting the contract they believed they were providing for a satisfactory job. Members of the board, it may be, are as much dissatisfied with the situation as any one else.

At any rate, in the interest of all concerned, the whole matter should be investigated. If it is all right and according to specifications someone should make it clear. If the property owners are getting a job which is according to specifications they would like to know it.

And, while it is too late for a remedy, we notice that more of our shade trees are coming down.

TUESDAY MORNING, MAY 28, 1929.

A DUTY TO JUSTICE

DISTRICT ATTORNEY HARMON is faced with a solemn and an unpleasant duty.

Most serious charges have been placed before him concerning the alleged delinquencies of a well known citizen.

It is obviously the duty of the district attorney to carefully study the evidence submitted to him and if he finds here is no reason to believe a crime has been committed and that the conduct of the person against whom charges were made was ethical and in accordance with moral and civil law he should dismiss him with his blessing.

On the other hand, if it appears from the evidence submitted, that the attorney has been guilty of criminal conduct; the fact that he is a prominent citizen should afford no protection.

And it is obvious that the cry of "frame up," so universally resorted to in these days by those caught in unfavorable messes, verges very closely on admission of guilt.

If the district attorney has one particle of evidence of frame-up which would justify ignoring a charge supported by the testimony of several reputable witnesses he should make it public. The "frame up" in which one is induced by wiles and connivance to commit a crime is abhorrent. Every right thinking person condemns it. That is the very reason why offenders so often resort to that cry. So we say again in all seriousness that if there is the slightest evidence of frame up in the case in mind, the facts, if any, which would justify ignoring an offense should be made public.

The unsavory case being now considered by the district attorney has thoroughly aroused the community. The public temper is in no mood for any course which does not adhere to the rules of strict justice. Fear, favor or friendship should have no place in determining the course of those charged with the administration of the law.

Teachers Tell of Their Plans For Summer and Next Term

What teachers of the Las Vegas school system are going to do this summer and next year is of interest not only to students but to the community at large. It has been pointed out.

Miss Maude Frazier, principal, will "plow" a bunch of administrative work which is the natural aftermath of the term's end. Some of the plans of other high school teachers are as follows:

Coach Frank Butcher will stay in Las Vegas.

Wedding Expected Mrs. Hensler and Miss Wilma (rumored soon to become Mrs. Carlson) will not teach next year, the latter to make her home in Stockton, California.

Lewis E. Rowe will leave Monday for his ranch in Southern Utah for the summer.

Laura Wilson will go to Berkeley for the summer.

Sara Wilson will go to summer school.

Ruby J. Newton will return here from Texas after a short visit.

J. Harold Bradley will go to Pleasant Grove, Utah, to spend part of the summer with his parents.

P. W. Bell will go to Fallon, San Diego, and Texas.

W. E. Barr will also spend the summer in Texas.

Miss Bertha Aiken will go to San Francisco.

New H. S. Teachers New high school teachers next year will be: Miss Angie Riosa of Elko, English and Latin; Lionel Scott, Reno, English; George B. Harris, Los Angeles, science; Miss Mildred Scott, Colfax, Illinois, mathematics.

Grammar school teachers who will not be in the system next term are Miss Myrtle Titcher, who will go to Michigan Valley, Kansas, Miss Agnes Cropper, who will go to Laramie, Wyoming, and thence to her home in Kansas; Mrs. Ada Hampton, who will spend part of the summer with her family at Carson City, Mrs. Myrtle Morshead Smith, of Las Vegas, Mrs. Harriet Hemphill, who will probably remain here and Mrs. Fern Reynolds Olive, who also probably will remain in Las Vegas.

New Grade Teachers New grammar school teachers will be: Wendell Robinson, Alamo, Nevada, upper grades; Elfrida Cropper, Tonopah; Thelma Cropper, sister of Agnes Cropper, and from Cody, Wyo., special primary and Veronica Dewdney.

Grammar school teachers' activities for the summer will be as follows, with the exception of K. O. Knudson, principal, will spend several weeks here and at Mt. Charleston and part of the summer at Reno.

Mrs. Arthur Sant, Chino, Idaho, home, possibly summer school later.

Albert Edwards, will visit his parents at Panaca, and then attend the summer session at the Southern Branch of the University of California.

During the past ten days two cars of high grade concentrates have been shipped and the shipments are expected to increase in volume as operations get into full swing.

The camp at Goodsprings is looking up since its big property again began operations and the stimulating effect is felt all through the district.

Jess Knight has leased the Goodsprings hotel to Mr. and Mrs. Gardner who recently came to Goodsprings from Utah.

Mr. Everett, one of the owners of the old Keystone mine, arrived in Goodsprings Saturday on business connected with the property.

LINDY MARRIED THANK GOODNESS, Lindbergh is at last safely married. What becomes of him now is his own business.

But we men owe him one large debt of gratitude: This is the first marriage in history so far as we are concerned, in which the poor groom received more notice than the bride. We men may amount to something some time after all.

BUILDING ORDINANCE THE CITY OF LAS VEGAS is greatly in need of a building ordinance. At present there is practically no restriction as to the type of material with which a building may be constructed. In some instances construction is being permitted which does not meet the approval of good architects and contractors.

The safety of the future city of Las Vegas requires that some definite requirements as to types of buildings and materials be made without delay.

By Williams Noted Engineer Praises Golden Ace Properties

Walter Gordon Clark L. A. Consulting Engineer, Makes Study of Carrara Mines.

The following are the recommendations made by Walter Gordon Clark consulting engineer of Los Angeles, California, in submitting his report and recommendations on the Gold Ace mine:

"First, that the formations in which the values occur on your property are indicative of a continuation of valuable ore bodies to considerable depth.

"Second, that the formation holding values is well defined and under carefully supervised operations may be followed without difficulty.

"Third, the exposed ore bodies on your property are, so far as can be determined, the apex of the system of veins and fissures, and the property is sufficiently extensive, so in my opinion you are fully protected against any possible litigation.

"Fourth, the showings on your property fully warrant the expenditure required, property to explore the ore bodies now in evidence or indicated on your property.

"Fifth, the exposed ore and the probable indicated ore bodies warrants the expenditure of \$50,000, out of an opinion that a lesser sum, expended under proper engineering supervision and direction will disclose extensive ore bodies.

"Sixth, the low grade ore at present in sight, warrants the installation of a cyclone plant of limited capacity, to be installed in such a manner that it may, without change or alteration, be extended as the available ore warrants.

"Seventh, the record of the property and examination of ore bodies present in sight indicates that the mine may be expected to yield a considerable tonnage of high-grade ore, therefore, the ore should be selected as mined, the high grade ore shipped for smelting and the low grade extracted at a mill located on or near the property.

"This is a property of unusual promise, and I am of the opinion that under proper direction and development, can be made to yield a very satisfactory profit."

(Signed) Walter Gordon Clark. The property of the Gold Ace consists of twenty-four claims, approximately two hundred fifty acres; full equipment of machinery, including hoist and air compressor is on the property or in transit to the property, it is stated.

Farewell Party For Anglemeyers

A surprise farewell party for George Anglemeyer, retiring superintendent of the U. S. Gypsum company's plant at Arden, was held at Arden school last night, attended by a host of Arden and Las Vegas friends who expressed great sorrow at his departure from this vicinity.

Mr. and Mrs. Beckley and Mr. and Mrs. P. M. Ferguson were among those present to wish the couple Goodspeed.

Mr. and Mrs. Anglemeyer left for Los Angeles immediately after the party, and will go to Pennsylvania after a visit in California.

Their plans for the future are not definitely known. Mr. Anglemeyer has been superintendent of the plant for some eight or ten years.

It is said, and Frank Sing, foreman under Anglemeyer, will take charge of the plant.

Anglemeyer has been one of the school district trustees for a number of years.

Nevada Oil Field Display in Las Vegas

A display of Nevada oil and oil shale and a miniature derrick on the front lawn of the Senator Pitman place, Fremont and Fourth streets, is attracting considerable interest among the number of people who stop there.

The display is in charge of J. E. Amenda, president of the Elipah Petroleum Syndicate.

The holdings of the company are located in White Pine county, Nevada, about 37 miles west of Ely. Several attempts at drilling have been encouraging. The well now being drilled was started last year and has reached a depth of 1302 feet, according to Mr. Amenda.

The company has been reorganized during 1928, the Reno Trust company acquiring control of the Elipah Petroleum Syndicate, the White Pine Oil & Gas company and the California-Nevada Oil company, which controlled 29,000 acres covering the entire area.

The officers and directors of the Reno Trust company are J. E. Amenda, Reno, president; J. E. Stites, Reno, vice-president; Dr. F. E. Nichols, Fallon, second vice-president; E. B. McGowan, Reno, secretary-treasurer and Fred B. Balzar, governor of Nevada.

RYLAND G. TAYLOR WILL BRING FAMILY TO VEGAS

Ryland G. Taylor, of the law firm of Ham and Taylor, will drive to Tonopah this week end to bring Mrs. Taylor and his son, Russell, to Las Vegas.

The family home will be established in the Pete Keegel house at 718 South Fourth. He expects to return to Las Vegas Sunday.

Taylor made a hurried trip to Tonopah last week-end, arriving back in this city at midnight Sunday night.

J. P. KING HAS ILLNESS

J. P. King, county road supervisor, has been in bed ill for a week at his home at Sixth and Linden streets, but is improving. It is reported, and is expected to be about again around the latter part of the week.

Dr. P. M. Ferguson is in attendance.

BID ASK

Table with columns for stock names and bid/ask prices. Includes entries like Calif. Bank, Merchant Natl. Bank, Natl. Bank Com, etc.

Gold Ace Annex

The Gold Ace Annex company, operating on Callicott hill at Carrara has a force of five men at work and now that a road has been completed to the property, development will go forward and plans have been made to carry on the work in an intensive manner for an indefinite period.

The Annex has what is considered one of the most desirable properties in the district, and rich pinnings have been secured from a ledge uncovered at the surface.—Tonopah Times.

Associated Metals, Inc.

Will make a shipment of high grade ore from Potosi mine this week.

NEW YORK, May 27—(UP)—

Further sweeping declines were scored on the stock exchange today as many stop loss orders were touched off by persistent hammering of the list by bearish professional.

Declines ranging from one to 10 points were made in all sections of the list with many leading stocks getting into new low ground for the year in the final hour of trading.

General Motors, Montgomery Ward, Nash, General Electric and Radio were hammered down to further new lows for the movement or longer, while high price issues like Case Threshing Machine and Allied Chemical broke precipitately.

Trading was swelled by the heavy selling and tapers ran from one to ten minutes behind the market.

The market was under severe pressure toward the close. The declines however, was orderly except for some demoralized selling the final hour.

Call money held easy at 6 per cent, while extremely favorable news reports were published over the week end.

Metals and copper were under severe pressure at the close. General Motors closed at 70 1/2, Chrysler 73, Ford 34 1/2, Studebaker 74, off 1 1/2; Hudson 91 1/2, off 1 1/2; Packard 135 1/2, off 7 1/2, and Yellow Truck 37, off 3 1/2.

Amacoda closed at 99 1/2, off 1 1/2; American Smelting 94 1/2, off 3 1/2; Green Cannanea 137 1/2, off 4 1/2; Cerro de Pasco 90 1/2, off 1 1/2, and Kennecott 78, off 4 1/2.

NEW YORK, May 27—(UP)—

The cotton market closed steady, July 18 1/2; Oct—old, 18 1/2.

Grain Review

CHICAGO, May 27—(UP)—May wheat sold below the dollar mark for the first time since 1915 today without arousing any particular buying sentiment on the decline. Tone was weakest at the close and all deliveries finished at the day's low figures. The bearishness of wheat and better crop weather took a heavy cut from corn. Futures selling at lowest on the crop. Oats were influenced by action in major pits.

At the close wheat was 2 1/2 @ 2 1/2c lower, corn was off 2 1/2 @ 2 1/2c and oats were 1/4 @ 1/4c lower. Provisions were unchanged to sharply lower.

Cash wheat prices were 1/2 @ 1/2c lower. Cash corn prices were 1/2 @ 1/2c lower. Cash oat prices were 1/2 @ 1/2c lower.

NEW YORK, May 27—(UP)—

Foreign exchange closed steady. Demand sterling 84.84 1/2; Montreal .921; Franc 0390 9-16; Lira 0523 off 0.000 1/2; Belgia 1388; Mark 2332; Sweden 2612 1/2; Yen 4444.

NEW YORK, May 27. (UP)—

Liberty bond closing prices: Liberty 3 1/2 @ 96.22; first 4 1/2 @ 98.04; fourth 4 1/2 @ 98.15; treasury 4 1/2 @ 105.28; treasury 4 @ 102.18; treasury 3 1/2 @ 99.29; treasury 3 1/2 @ 93.19.

Miscellaneous group activity featured a loss of 1/2 in Pacific Finance and 1/2 in Trans-America on sales of 200 each, with prospective quotes of 110 and 137 1/2.
