Scholarship Saves Mona Kay a Year

Now Valedictorian Can Go to University

All-State Honor For Las Vegas Girl

Valedictorian of her class and still she couldn't plan to attend University of Nevada until she worked a year!

Then suddenly she learned that she was going to get to go this year after all, and that she had been selected for this boon, half of a \$500 scholarship, from among all the girls graduating from Nevada high schools last year.

And today Mona Kay is the happiest girl in the state of Nevada.

The James Ward German and Katherine Morrison German scholarship selection for this year fell in part upon Miss Kay, as the result of her high scholastic average and the splendid work she did in extra-curricular activities during her high school career, according to Miss Maude Frazier, high school principal.

Mary Trudelle, of the Carson high school, shares the scholarship with Miss Kay, because of the unusually high records of both girls.

Every other year this scholarship falls to one Nevada graduating high school boy, and every other year to one girl. The fund is split into two units of \$250 each, and paid out over the first two years, it was explained yesterday.

Miss Kay planned to work for the next year before going to college, it was learned yesterday, but this scholarship will make it possible for her to go right to the University of Nevada.

The selection of the winner for this scholarship was made by Walter E. Clark, president of the University of Nevada, from information submitted by the principals of all the high schools concerning their graduates.

Miss Kay is the daughter of J. O. Kay, who is a railroad man. She was editor of last year's Boulder Echo, yearbook. She was a member of the debate team, and was active in girls' athletics, basketball, soccer, swimming and tennis.

Mona's sister, Nina, was valedictorian of the graduating class here last year, but that was the year for selection of a boy, and therefore she was not eligible as a candidate for the scholarship.

Buy Golden Ace

A proven mine that is shipping high grade ore and has a large tonnage of mill ore in sight.

Mill and cyanide plant are being assembled.

By October 1st mill should be completed and in operation, and at that time we expect to see the company making a net profit from shipping and milling ore of at least \$85,000 per month and the shares selling at several times the present market price. We regard Golden Ace as a potential \$10,000,000 to \$15,000,000 mine, and it is right in the back yard of Las Vegas.

The round trip is an easy day's drive. Go and see for yourself. Everything is open for inspection.

We would like to have at least 100 stockholders in Nevada. The men working in the mine and the people of Beatty are buying. They know the property, and they are confident that it is going to develop into another big Nevada gold mine.

Golden Ace Mines Company Shares at 50c Each

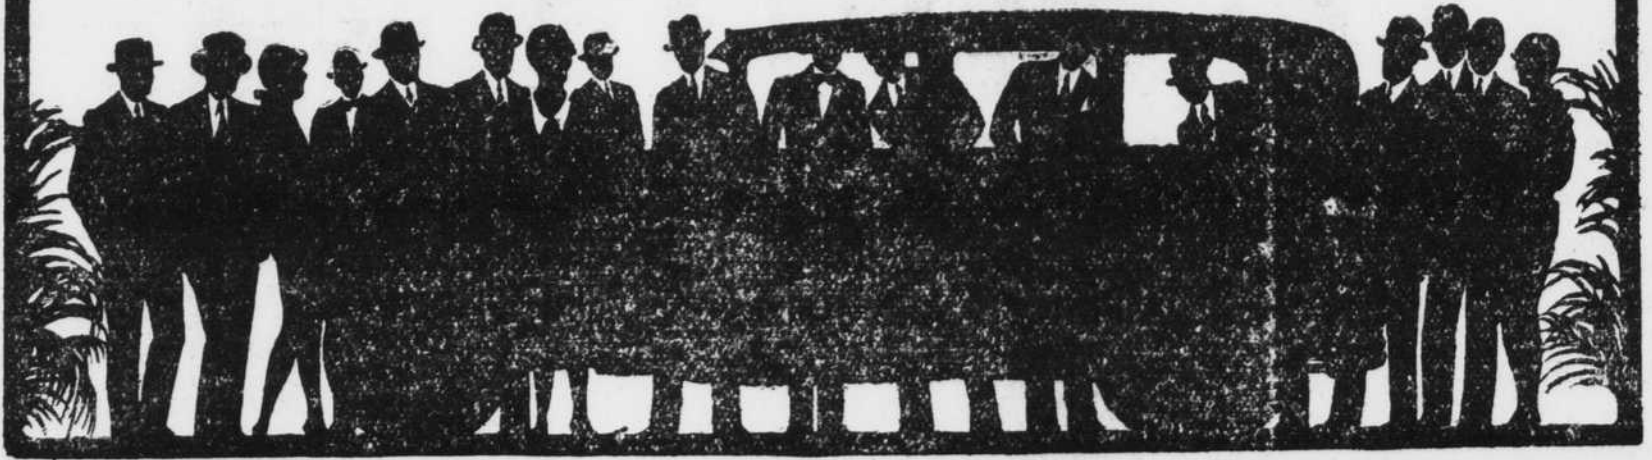

in our opinion are the best mining investment on the market. We will sell you Golden Ace at 50c per share cash or at 52c per share on the installment plan, one-fourth cash and the balance in three equal monthly payments.
