#### WORLD OF INTEREST.

"IIIS "DESERT STUFF" as it is often lightly termed, is 1 appealing more and more strongly to the wealthy class of tourist travel.

The country about Las Vegas, for example, contains a world of interest and beauty, quite in contrast with what may be found in other parts of the country.

A certain glamour attaches to "The Desert" because of the old dangers and the romance wound about it by our imaginations. Many are the stories we have read of the suffering and death from heat and thirst on the endless thrails; of the poison springs and slow starvation, to say nothing of the threat of savage Indians.

But now, fortunately, those dangers have been relegated to the past by the power and swiftness of the automobile and the many miles of improved highways reach-

cold shivers. It is safe to assert that a traveler over the desert highways is in less danger than if he were in the the were in the context for the year's best rider. crowded centers of population.

In the country about Las Vegas we have a world of unusual interest which, perhaps, even some of us here do not fully appreciate. To the traveler from the east it is a source of endles wonder.

There are the Joshua forests, wierd and uncanny; the Valley of Fire with its unimaginable contrasts in form and color; the endless many hued, constantly changing vistas of valleys and mountains; the Charleston Park region, a bit of Eden hiden away in the desert waste.

Even forbidding Death Valley has been robbed of its terrors and its dangers and made safe for the lovers of the unusual to visit.

The automobile has done much for mankind, but it can boast of no greater service than that it brings to the desert. In her desert scenery Las Vegas has an asset which will become increasingly valuable with the years.

#### GREAT HIGHWAY WORK.

FOR YEARS we of Las Vegas fumed about the refusal or I' neglect of Arizona to build its portion of the Arrowhead Highway. Passing for approximately 20 miles over the northwestern corner of that state, the road wound in and out, up and down, over hills and through canyons, narrow, and in some places dangerous.

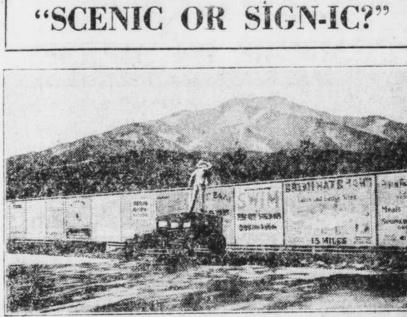

Soon that old source of complaint will have been forgotten. In its place, Arizona is building one of the finest Ol Company of California is now tor, National Park Service. ighways in the country. It sweeps through the rugged ountry with easy grades, broad curves through deep cuts a view to finding a solution of the and over great fills. It will be featured by great steel bridges and massive culverts and will prove a wonderful atraction to travel between Los Angeles and the east.

Thrill, Death In This Ride

CONTRACTOR OF THE OWNER

It is now safe and easy to reach those wild and woolly spots which a few years ago even to think about gave one cold shivers. It is not after the seconds after this picture was taken at Microed, Calif., the r perry Ivory, jumped and landed on his feet when the built hit corral fence. And a few seconds thereafter the built was shot a

aspection tour **Delay** Necessitated Branching off the main line bout seven miles south of Las egas, the Boulder Canyon Dam ne will extend twenty-two miles nd cost approximately \$750.000. ccording to specifications. Contruction work, according to arangements made by the Intertate commerce commission, was to egin October 1, next. However, due to incompleted details in charge of the Federal government, he railroad perforce will be comcelled to seek an extension of time for the commencement of the work. Mr. Gray said.

As planned, the branch line will proceed to the head of the canyon, where it will connect with a seven r eight mile extension into the anyon which will be operated by the dam builders. Providing ransportation for materials as well as tourists to what will be one of the most outstanding engineering feats in history, the branch line presages much for the ailroad. Mr. Gray initmated.

Beginning its tour from Omaha, headquarters of the Union Paciic System, the inspection party upon its return will have traversed the entire area covered by the railroad.

A decrease somewhat in corn and wheat crops in the middle West and in fruit and vegetable crops in Northern California have resulted in shipments below those reached at the peak of shipping activities last year, Mr. Gray said. Comparatively good climatic conditions east of California this year also have had a tendency to affect tourist travel to California during

The highway, being partly financed through federal id, is a very expensive one to build. It is scheduled to be completed in about four months.

In the meantime to view the magnitude of the new ork is alone worth the trouble of driving over the troublesome old road.

#### A HIGHER DAM.

I gestion that Boulder Dam be planned to rise above the tional prizes of \$200, \$100, \$75, \$50 pany at 225 Bush Street, San Franwater 575 feet rather than 550 feet which for some time and \$25 for the five best amateur cisco. has been assumed as the best and most feasible height.

The engineers at Denver are giving the matter carethe study and, if they approve the idea, the increase in It will be adopted as the plans. Whether this would quire an additional appropriation is not at this time tite certain. It would not, however, necessitate any delay in the beginning of the work because the preliminaries in either case would be the same.

#### SPOTLESS TOWN.

AS VEGAS will soon be bright and clean, according to Commisisoner Otis J. Smith. The new street sweeper will arrive within a few days and will be instrumental in keeping our pavements in much better condition than accommodate officials, engineers Authorities throughout the Sacraheretofore.
