SATURDAY MORNING, OCTOBER 12, 1929.

ASKING QUESTIONS.

DEAN ROBERT Stewart of the University of Nevada, in an article in Plain Talk on "What Will Boulder Dam Irrigate," asks some questions about the Boulder Dam project.

It is praiseworthy to ask questions. We acquire information that way. But for a dean of the University of Nevada to ask questions which seem to be for the sole purpose of discrediting the Boulder Dam project is far from praiseworthy. In this case it is pitiful because the questions expose ignorance of the subject inexcusable in one whose calling requires that he have information.

Just how Dean Stewart came to allow himself to be put in the position of backing up the threadbare arguments used for years past by those interests seeking to defeat the Boulder Dam project it is difficult to imagine.

Had Dean Stewart sought information before writing his articles, he would have found the highest authorities in the engineering world ready to answer his damaging insinuations in the negative. He would have found that those questions he asks: "Is the land which it is proposed to irrigate adaptable for agricultural purposes?" and "Will the water to be stored at Boulder Canyon be suitable for irrigation?" have been the subjects of years of research by engineers of the highest standing and that both questions have been answered emphatically many times in the affirmative by scientists who have investigated and have the scientific facts.

Whether Dean Stewart's motive was to do harm to a project which will help Nevada or whether he simply desired to assist the small remnant of power trust opposition which remains we cannot tell.

But the Dean's questions and covert inferences are beyond doubt injurious to the state whether intended that way or not, even though so devoid of real thought as to be powerless to influence the progress of the Boulder Dam project.

MORE MISINFORMATION.

TO WRITE on the Boulder Dam project seems to have become rather of a fad with many. In many newspapers and magazines we find articles on the subject. Most of them are written with the idea of imparting information and fairly well fulfill their intent. But many written with the best of intentions are full of inaccuracies.

Our attention has just been called to an article by Karl Vooght in the November number of Popular Science Monthly, which in the main is reasonably accurate. But in one place the writer says:

"Water allowed to escape through the dam will be used to produce power, but that too, is incidental. It cannot be transmitted economically to any industrial area. Some will be used, doubtless, by industries which spring up at the dam site."

Some of these fluent writers on Boulder Dam would do better justice to their subject if they would first talk with some of the Las Vegas school children, almost any of whom would know better than to say that the power from Boulder Dam cannot be transmitted economically to any industrial area.

Of course everybody ought to know that the economic transmission of power 300 miles has long been done and that with the perfection of the science long distance transmission of power is becoming quite commonplace.

MAKING PROGRESS.

WHILE WE are sitting around the cracker barrel arguing about this and that and the Boulder Dam, we do not lose sight of the fact that the project is going ahead as fast as the complications of the preparatory work permit.

At Washington, Monday next, Secretary of the Interior Wilbur will confer with those who desire to use Boulder Dam power with the object of bringing the details of the big problem closer to completion.

In Las Vegas also the project is advancing. What is really the very first work of a physically constructive nature has been completed. The building for the testing plant, built by the Reclamation Service is ready for the machinery. A carload of machinery has arrived and is being installed, materials are being gathered out of which careful tests will select the various things which will be used in the construction of the big project.

Perhaps this is considered a small matter, but the matter of testing prospective materials of which the greatest engineering project of the age will be constructed ranks high in importance.

We are apt to move too fast in our thoughts and to forget that all these preparations must be carefully made. And when we feel inclined to complain at the seeming slowness of the progress, we should remember that the whole matter is being pushed just as rapidly as the resources of the United States government can push it.

TWO LETTERS.

IN ANOTHER column the Age today publishes two letters each complaining of a different thing, and both fully justified by the facts.

One letter calls attention to the fact that stock is allowed to run loose on the highways in the city. It is something that most of us have noticed and protested against (to ourselves). Perhaps this letter will serve to provoke a remedy.

The other letter calls attention to the damage done to the pavements by allowing water to run constantly into the streets. This comes, doubtless, from pure carelessness. Attention being called to the matter people will, we believe, be glad to cooperate in stopping the unnecessary flow of water, which will surely add much to the life of our pavements.

LETTERS TO THE EDITOR

In this department of the Age letters on topics of general interest will be published regularly. Names of authors must accompany letters, although they will be withheld from publication if this is requested. Letters must be reasonably brief and to the point.

THOSE DANGED HORSES

Editor, The Age: Somebody's horse is going to be killed one of these days. And it will serve the owner right. Hate to think of a poor dumb beast being killed. And I hate still more to think that human beings may be killed at the same time and probably an automobile wrecked into the bargain.

But so long as a group of horses is allowed to run loose on the highway right of way toward Tomopah, inside and outside the city limits, there's danger of a serious accident.

I've noticed horses at various times along the road toward Lorenz's resort. I don't know to whom they belong, but the collision with in the past week a few miles out on the highway should make such owners think twice.

Some horse is going to start across the road about the time some automobile is traveling past the same point, and the owner of the horse is going to be sitting on a certain's inquest before he knows it.

If there is no city ordinance against letting livestock run on the roads in the city limits, there should be one. If there is one, it should be enforced.

How about it, city officials? —A CITIZEN

WATER INJURES PAVING

Editor, The Age: While driving about the city recently, I have been appalled to dis-

By KIRK SIMPSON WASHINGTON — Now that Mr. Frank B. Kellogg's justly celebrated peace pact has gone into effect with much eclat, the Bystander wonders what became of the "peace stamp" movement launched in Minnesota to aid Mr. Kellogg's plan.

It was fostered by the "World Peace Postage Association," with headquarters in St. Paul, and contemplated inducing every nation to issue a peace stamp supplemental to its regular postage stamps.

They would be obtainable by users of the mails on request as a substitute for the regular stamps, and the association figured that each stamp so requested and used would be visible evidence of a "peace ballot" by the mailer.

J. W. Hamilton, secretary of the association, said some months ago he had received favorable reports from Canada, Cuba, Mexico, Germany, England and other countries as to reception of this novel idea of mobilizing the mail users of the world as an expression of public opinion for peace.

Not Sneered At What the effect might be of such a bit of world-wide peace propaganda no man can tell. Any observer of the forces that brought the Kellogg pact into being could not sneer at the notion that the peace stamp method might create such a gale of public demand as would bend politicians and statesmen to its will in any international emergency.

It cannot be challenged that public opinion in most countries was the force that overcame reluctance of statesmanship to embark on the peace pact adventure.

Nor can it be seriously questioned that Mr. Kellogg himself, had he been able to escape public opinion at home, would never have seized on the universal anti-war declaration idea as an answer to Premier Briand's troublesome proposal for a bilateral Franco-American pact of that nature.

The American public demanded action on the Briand proposal, and it got it in the Kellogg pact.

If you don't believe that the voice of the public resounds loudly in the ear of statesmen and politicians, go back and look at the record of the senate's vote ratifying the Kellogg pact.

Read what slighting things a surprising number of senators had to say about that plan for keeping nations from each other's throats; then see how they voted on the showdown. They voted "aye."

Effective And as to effectiveness of the peace pact, there already is considerable evidence that could be said. The Bystander previously has noted that it was the only bit of diplomatic machinery which lent itself to instant use in efforts to avert a Russo-Chinese war over the Chinese Eastern railway dispute.

Look also at the Anglo-American naval conversations. The peace pact was made the jumping-off place in attempts to get rid of the involved snarl over relative cruiser fleets by both governments.

President Hoover and Prime Minister MacDonald both appealed to the spirit at least, of that pact to justify their efforts.

And out of those conversations, even before a cruiser accord could be formulated, grew MacDonald's declaration to the world that Britain never would build against the American fleet.

Credit another hit, or at least a timely sacrifice, to the peace pact.

Dance Tonight at Lorenz's Resort—8-piece orchestra.

cover just how many residents have carefully allowed the water from irrigating hose to overflow into the streets.

If they would but stop and think, surely they would realize how extremely detrimental this is to the street surface. There are several very rough corners in the city which are due, mainly, to the fact that the streets have been soaked with water from the yards, and while in a very soft condition, have been driven over by cars, leaving great deep ruts. I have also been informed, on good authority, that the constant standing of water along the curbs leads to rapid deterioration of the street, and the consequent increase in cost of maintenance and higher taxes.

Not alone do the streets themselves suffer by reason of this, but the dispositions of pedestrians are also affected. A woman in dainty light shoes, approaching a crossing where water is standing, perhaps in a pool too wide to step across, and in many instances she must travel a considerable distance up or down the block in order to cross. A car, with a newly cleaned and polished body comes down the street, and the water splashes over it, leaving its streaks on the shining surface.

I firmly believe that if the people at large were fully aware of the damage they are causing by their negligence, that there would be an immediate cessation of such heedlessness, and we would be spared the sight of muddy corners and streets.

—OBSERVER.

NEW YORK, Oct. 11. (U.P.) John Gilbert and Ina Claire, returning on the Berengaria today from their European honeymoon, called the report that their romance was on the rocks "ridiculous."

"Why, we love each other as much as when we started," Miss Claire said.

"We love each other more than when we started," Gilbert corrected.

A young man who recently won a swimming prize of \$25,000 has put the money in the bank. This is one sure way to be able to keep in the swim.

They say that silence is golden and that we never knew of any oysters that had a big bank account.

Dinner Menu Savory meat loaf Baked potatoes Escalloped Onions Corn Muffins Butter Cabbage and Green Pepper Salad Gelatin Whip Coffee

Savory Meat Loaf

(Leftover can be served cold or used in sandwiches) 1 pound round of beef, ground 1-2 pound round of veal, chopped 1-4 pound sausage 1 cup bread or cracker crumbs 2 tablespoons chopped onions 1-4 teaspoon salt 1-4 teaspoon paprika 1-4 teaspoon celery salt 1 egg 1-2 cup milk

Mix the ingredients and shape into a roll 2 inches in diameter. Place in a small roaster and add 1-4 inch of water. Cover and bake in a moderate oven for 45 minutes. Baste frequently. More water may be needed.

Cabbage and Green Pepper Salad

Serving Six 3 cups shredded cabbage 1-2 cup chopped green peppers 1 tablespoon celery seed 1-2 teaspoon salt 1-4 teaspoon paprika 1-2 teaspoon sugar 3 tablespoons salad oil 1-4 cup salad dressing Mix the ingredients. Chill. Serve. Gelatin Whip (With Cake) 1 package cherry flavored gelatin mixture 11-2 cups boiling water 1-3 cup orange juice 1-2 cup sliced oranges 1 cup cake, cut in 1-2 inch pieces 1 cup diced marshmallows 1 egg white, stiffly beaten

Four the boiling water over the gelatin mixture and stir until it has dissolved. Add the orange juice. Cool and allow to thicken a little. Beat until frothy and beat in the rest of the ingredients. Pour into a mold and chill. Serve plain or with whipped cream or custard sauce.

To increase the flavor of your stuffings for fish, fowl or meat rolls add 1-8 pound of ground sausage to your regular stuffing recipe.

To give a tasty covering to baked custards, sprinkle cake crumbs over the top and when baked the top will be well flavored and a delicate brown color. This is a good suggestion for using stale cake.

Pennington Rites Very Impressive

The remains of Fred S. Pennington were laid to rest Thursday afternoon with elaborate rites.

Services were held in Christ Episcopal Church where Rev. Arthur S. Kean read the service of the church.

The American Legion post was present in uniform and its guard of honor surrounded the casket, which was draped with the stars and stripes.

The Ladies' Auxiliary to the American Legion attended in a body, each member bearing a basket of beautiful flowers.

Delegations from the Elks' Eagles and Odd Fellows Lodges and from the Rotary Club were also present.

The vocal music consisted of a solo by Warren Parker, "Lay My Head Beneath the Rose," a duet, "Beautiful Isle of Somewhere," by Mr. and Mrs. Gildner; and a duet, "My Savior Knows," by Rev. and Mrs. Polman.

The funeral cortege was headed by the American Legion post which acted as escort and was probably the largest in number of following cars ever seen in Vegas.

At the grave, where again a wealth of beautiful flowers had been placed, Las Vegas Lodge No. 1488 B. P. O. E. performed the rites of its burial service.

The American Legion Post concluded the service with the ritualistic burial service, followed by the crash of musketry in salute and taps.

And in the gathering dusk of evening the throng returned again to their homes bearing with them only memories of their friend and comrade, Fred S. Pennington.
