Wedding Is Said Charming Affair

The marriage of Miss Dorothy Burnell, daughter of Judge and Mrs. Charles S. Burnell, 2117 Virginia road, to George Linney Bloedel, son of Mrs. Sana L. Bloedel of Las Vegas, Nevada, was solemnized Friday at 3 p. m. at the Little Church of the Flowers, Glendale, with Rev. James Whitecomb Brouger, Jr., officiating.

Given in marriage by her father, the bride was lovely in a white satin gown with pink meline hat, pink mittens, and she carried pink rosebuds and lilies of the valley. Misses Vada Vern Scott and Ann Fanchon Davis, attended the bride, and were followed in green and orchid sateen and carrying bouquets of pastel shades of sweet peas. Little Joan Hart, in a frock of pink chiffon, was flower girl. William Bloedel served his brother as best man and Judd Scott, and Kendall Nungesser were ushers. Mrs. Burnell, brother of the bride, wore a gown of pastel blue crepe with lace hat and a corsage of pink rose buds and lilies of the valley.

Mrs. Bloedel attended the University of California at Los Angeles and the University of Southern California, and is affiliated with Kappa Alpha Theta sorority. Mr. Bloedel attended the University of Nevada.

After a dinner for the bridal party, Mr. and Mrs. Bloedel left for a honeymoon and will make their home in North Hollywood on their return.—Los Angeles Times.

4 Killed As Train Plunges Thru Bridge

MOBILE, Ala., Feb. 25. (AP)—The Cincinnati passenger train of the Louisville & Nashville railroad plunged off the open end of a draw bridge over the Mobile river near here early today.

Four members of the train crew were drowned when the engine and a baggage coach were submerged in the river. The dead were: Arthur E. Ingram, engineer; Ezekiel Crumpton, negro fireman; J. Nick Vaughn, baggage master; L. Woods, negro porter.

Details of the wreck were given by Dr. Seidon H. Stephens, Mobile physician, who headed a relief party to the scene of the wreck, 18 miles northwest of here.

The accident occurred in an isolated section without immediate means of communication. It was two hours before the first relief train bearing doctors, nurses and medical supplies was dispatched from Mobile.

An hour later, at 3:40 a. m., a second train with a diver, Charles Nelson, on board, left for the scene of the accident.

A 28 m. officials of the Louisville & Nashville line here said all passengers and trainmen were safe and accounted for excepting the four dead.

H. P. Hearson, assistant superintendent of the Mobile-New Orleans division, said the track in the section where the accident occurred is equipped with an automatic block system and the engineer on the train should have been warned of the open draw bridge more than a mile from the river.

Later reports received here said the draw bridge had been opened to permit passage of a tug boat. Traffic over the line was closed and trains were routed over the Mobile & Ohio lines through Meridian thence to Montgomery. A wrecking crew dispatched with the relief party was clearing away the wreckage.

Dictatorship For Britain Is Asked

LONDON, Feb. 25. (AP)—A benevolent dictatorship ruling with the consent and approval of the people was advocated today by Sir Oswald Mosley, young leader of the left wing Laborite who is agitating for a movement which, if successful, would split the Labor party.

"On the continent," Mosley said in an interview, "there are several instances of dictatorship which are governments without the consent of the people. In some instances they may have the support of the people but in principle they govern whether or not they have that support."

"Such dictatorships have the advantage of rapid execution of action which democratic governments usually lack. Consequently in a period of economic crisis, when action is the prime necessity of the hour, many countries incline to prefer a dictatorship with strong executive action despite its defects as a government which governs."

Thursday, the 12th day of March, 1931, at two o'clock P. M. of said day, at the front door of the Court-house, in the City of Las Vegas, County of Clark, State of Nevada, I, Sale and Decree of Foreclosure, sell the above-described property or so much thereof, as may be necessary to satisfy plaintiff's judgment with interest and costs, to the highest and best bidder for cash, in lawful money of the United States.

Dated this 17th day of February, 1931.

Commercial Air Trip, New York To L. A. Lowered

LOS ANGELES, Feb. 25. (AP)—Apparently unaware that he had made the fastest commercial air trip from New York to Los Angeles on record, Lieutenant Allan Van de Mark arrived here late today with three passengers.

The trip required 15 hours 45 minutes. A four hour stop was made at Amarillo, Texas.

Captain Frank Hawks holds the speed record for the trip, 12 hours and 35 minutes. With Van de Mark were his employer, Wm. H. Lee of Lockport, N. Y., and the latter's wife and son.

Ruth To Fight For 1931 Crown

By DIXON STEWART (United Press Staff Correspondent)
NEW YORK, Feb. 25. (AP)—Babe Ruth's effort to regain his home run laurels, and incidentally to earn renewal of his \$80,000 contract, promised added color for the 1931 baseball season.

It was a decided blow to Ruth's pride when Hack Wilson of the Chicago Cubs won the 1930 crown with 56 home runs to his 49, and he is determined to prove Wilson a mere pretender.

Adoption of the new "dead" ball virtually ended Ruth's hopes of surpassing his own major league record of 60 in a single season—a feat he believed he would have accomplished last year if he had not been handicapped by injuries—but he is supremely confident that he can regain baseball's slugging honors.

Babe believes the "dead" ball has made his 60 mark safe for all time, and critics agree. Even if the new ball should turn out to be as lively as the old, they say, the larger stitching and heavier cover will improve curve ball pitching and handicap the free swinging home run slugger.

However, Ruth maintains that the changed ball will be less handicap to him than to his rivals. "I hit homers before the rabbit ball was introduced," he said. "I still will hit them with the new ball, but the wild swingers who have been dumping homers over short fences will find plenty of trouble."

Desire to regain the home run crown has influenced Ruth to start training far in advance of other players. He took an intensive six weeks gymnasium training course and now is in Florida playing golf.

When he reports for official training with the Yankees early in March he expects to be in the best condition of his career.

Actress Must Pay Gambling Debts

LOS ANGELES, Feb. 25. (AP)—Hilda Beesy, Hungarian actress, must pay her gambling losses incurred at Agua Caliente, Mex., according to an order signed by Municipal Judge Lucius P. Green.

The actress was declared to have cashed five checks totaling \$181 at the Agua Caliente hotel between July 24 and 28, 1930, according to a suit brought against her by an assignee of the claim. The checks, said to relate, were returned marked "account closed," evidence showed.

"Miss Beesy filed an answer to the suit claiming that as the checks were given 'in a gambling game' they could not legally be collected.

But she failed to appear in court to contest the action, and a default judgment was ordered entered against her.

Federal Agent To Face Possible Murder Charge

SAN FRANCISCO, Feb. 25. (AP)—Willard A. Long, a federal prohibition agent, faced a charge of assault with a deadly weapon today as the aftermath of a battle in a waterfront soft drink parlor in which Manuel Perry, 49, was wounded, possibly fatally.

If Perry dies, Long will be charged with murder, police said. An assistant, Long admitted firing the shot, said he did so in self-defense. Perry made what was termed a "lying statement" in denial of the dry agent's claim.

"Two men entered my place. Another man, Tony Avila, opened the door. Long first shot at Tony behind the bar," Perry continued, "and then he said to me, 'move over there.' I started to walk over to the wall and was shot in the back by Long."

Millions Spent To Save Citizens Loss of Work

(Continued from page 2)
cal service for particular groups of the population. It was hoped that by finding out where the patient's dollar goes and what it buys light might be thrown on what adequate medical services should cost and how it might best be paid for.

Even this brief enumeration shows in what a chaotic condition the "health industry" is. Information on which a national health policy might be based was either completely lacking, was inadequate, or was uncoordinated. But the committee set to work with no program other than to secure the facts and, as it announced at the beginning of its labors, with "no intention of arriving at any conclusions, until the facts have been secured."

There is no doubt that existing rates of sickness, of mental and physical disability and of premature death can be greatly reduced if we apply to them more thoroughly the knowledge we already possess.

By WALTER P. BOWERS, M. D., Editor, New England Journal of Medicine. Chairman of the Committee on the Costs of Medical Care

With the development of what we like to call civilization there arose many conditions which were and are bad for people's health. Men crowded together in cities, lived and worked indoors more than they had done before, and built themselves an artificial world to which their bodies were not naturally adapted.

Until almost the beginning of the present century sanitation was primitive. Then the tide turned. The causes of any of the epidemic diseases were discovered, together with means to prevent or control them. Smallpox, diphtheria, malaria, yellow fever and typhoid fever, to take five notable instances, need no longer occur in any civilized community.

The death rate from all causes has dropped. Twenty years ago there were annually about 15 deaths for every thousand men, women and children in the United States. The corresponding figure is now less than twelve. But if we compare the state of health to which we might, as a nation, attain with that which we actually have reached, our complacency begins to diminish. With all our boasted progress we have not yet succeeded, as a people, in applying anywhere near all the knowledge we now possess. A glance at a few sober but unavoidable facts stated by Alden B. Mills, of the Committee on the Costs of Medical Care, will suggest what this means.

Yearly illness
"The people of the United States, on the average," Mills said, "suffer from one to two disabling illnesses a year, males generally having about one case and females closer to two cases. School children seem to have an average of over two cases each per school year. Seven to nine days a year, on an average, are lost by male workers and approximately eight to twelve days a year by females. Children lose an average of seven or more days per child in a school year.

"About two-thirds of all the deaths in the United States are caused by diseases of the heart, pneumonia and influenza, cancer, nephritis, cerebral hemorrhage and softening of the brain, tuberculosis and various congenital or acquired diseases, or malformations of nearly infancy. The names are given in the order of their importance. Some of these ailments we do not know how to prevent or to cure. Some can be prevented by proper living habits.

Attitude of Fear
"For centuries the attitude of the generally of mankind toward disease has been one of fear. We now have sufficient knowledge to put the emphasis on health instead. If we cannot yet guarantee an individual against sickness, we can at least guarantee that an average number of individuals in every hundred thousand who now fall ill or die in a given year, will remain alive and healthy for undetermined periods. Almost every day some new discovery in medicine or surgery adds to our knowledge. Why do we not use this knowledge more widely?"

Prof. William F. Ogburn, of the University of Chicago, has called it "cultural lag." Mankind is deeply imbedded in habit. We hate to change our habits, even when change is for our own good.

It is to do something toward overcoming the "cultural lag" that the Committee on the Costs of Medical Care organized three years ago under Dr. Ray Lyman Wilbur is devoting its researches. The committee has endeavored to find out how much sickness there is in the United States, how it is being cared for at present and what suggestions may be made toward giving proper care to all sick persons at a reasonable cost.

SCHOOLGIRL CROONER AT 16 LIFTED TO FAME BY VALLEE

LAKELAND, Fla., Feb. 25. (AP)—A 16-year-old high school crooner suddenly blossomed into national attention as guest radio artist of Rudy Vallee at New Orleans.

"A voice with the qualities of a Ruth Etting or a Marion Harris," was Vallee's tribute as he introduced Frances Langford, whose "Moanin' Low" has gained attention on national networks.

The brunet schoolgirl who had never had a music lesson in her life outside of the public schools, received her invitation from Vallee when he was playing in Miami. He had heard her broadcast from a Tampa station some time ago.

Enthusiastic over the possibilities of a career before the microphone, Miss Langford was too excited to discuss anything else when seen here at the home of her parents, Mr. and Mrs. Basco Langford.

"Right now I am too thrilled over the opportunity Mr. Vallee has brought me to think of anything but the future," she said. "I have been offered a contract by a broadcasting company. I do not know what it contains, and until I find out I shall make no further plans.

"I may continue appearing before the microphone. Possibly I shall go to some musical school. But I may social agency, he said.

Crime Costs U. S. 16 Billion Annually

KANSAS CITY, Feb. 25. (AP)—Crime costs the United States \$16,000,000,000 annually. Dr. Ray O. Wyland, New York, director of the National Boy Scout educational department, said her in an address before 4,000 Scout troop leaders and assistants.

"One criminal takes as much money from the American public every year as it would cost to give character training to 160 normal boys and girls for a whole year," Dr. Wyland said. "It would be cheaper to add to the annual budget for teaching American youths the right habits."

The Boy Scout movement has been commended for its effectiveness in training and building character more often than any other social agency, he said.
