lease of a lot or lots for business or residence purposes.

Since the laying of water mains and sewers and the paving of streets will be in progress, it is not expected that permittees will be able to begin business or erect new buildings before September, 1931, and possibly later.

LEASES FOR BUSINESS OR RESIDENCE PURPOSES

6. The land in the reservation owned by the United States, and during the period of construction of the dam and until thereafter determined otherwise no land will be sold.

Under conditions approved by the Secretary of the Interior, leases until June 30, 1941, covering the approximate period of dam construction and the necessary adjustment period thereafter, will be granted for business and residence purposes. The approval of an application for a business permit will carry with it the privilege of leasing the necessary land on which to conduct such business and also for residence use. Other things being equal, preference will be given to applicants for permits who will establish homes in Boulder City.

Leases for residence use will be granted to any responsible persons of good character.

The average annual rental for a business lot approximately 40 by 120 feet, will be about \$300, the rental being more or less than that in accordance with the desirability of its location. Water and electricity will be additional. For residence lots the average annual rental will be about \$120. Rentals will be payable quarterly in advance. Land may be used only for the purpose stated in the lease, and assignment or subletting only with the approval of the government.

Upon expiration of leases on June 30, 1941, they may be extended or the land may be sold as may hereafter be determined by the government, through legislative action or otherwise.

Each lease will provide for its forfeiture upon violation of the penal laws or of the regulations, including the laws and regulations against gambling, manufacture or sale of alcoholic liquors and narcotics, prostitution, etc., or upon use of the premises for any such purpose.

No lease for business purposes will be granted until after the granting of a permit for the business.

WARNING TO ALL INTERESTED PERSONS

7. All persons interested are warned: (a) That the probable population of Boulder is more limited than is popularly imagined.

(b) That as the surrounding country is undeveloped desert, there is no outside population from which patronage may be expected.

(c) That the contractor will, through its commissary and other facilities, furnish goods and services in competition with permittees.

(d) That the amount of business to be derived from tourists or other visitors to the town is uncertain.

(e) That the future of the town after 1938 is likewise uncertain.

(f) That climatic conditions may not be suitable to everyone.

The government does not represent to anyone that a profit can be made under any business permit it may grant at Boulder City. Although the government will temporarily place limits upon the number of permits granted, it does not represent and can not know that all or any of the permittees will be able to conduct their business at a profit. Later when the limit on the number of permits in class B is removed, ordinary conditions of competition will largely prevail.

Each applicant should carefully investigate and consider before submitting an application and a personal inspection of the town site will give a much better understanding of conditions. But because of the expense involved in such a trip, no one living at any considerable distance should go to Boulder City depending upon any expected grant of a permit and expecting to remain. Already more than 3,000 persons in all parts of the United States have expressed a desire to engage in business at Boulder City, and it is apparent that only a small per cent can be granted permits or could possibly succeed if all were granted permits. The purpose of the government in limiting the number of permits at this time is to guard against wholesale bankruptcy which would otherwise result from the extravagant overdevelopment of the business hopes rather than information. But it can not assure anyone that the limit is sufficiently low to guarantee success to all permittees of any kind. If an application is approved, the applicant will then have opportunity to go to Boulder City before finally committing himself and this will be advised. It is to be noted, however, that although the permits in many cases be granted in July, the permittees will not be able to get on their residence location until the following September or later.
