

### BANDITS SLAY EACH OTHER IN RAIDED HOUSE

(Continued from page one) evidence on which his verdict was returned was conclusive. A short time after Harry Young escaped from the home of his sister, the brothers appeared at the home of J. F. Tomlinson, 50, a carpenter, and rented rooms.

Tomlinson, reading newspaper accounts of the Springfield killings, recognized the pictures of his roomers as those of Jennings and Harry Young.

He left the house with his family and told police of his suspicions. The raid followed. Harry apparently was in bed when the officers approached. When found he was clad only in his underwear and trousers. Jennings was fully clothed.

In the pockets of Harry, the officers found \$200 in cash, and a number of cartridges for a revolver.

A. P. Singleton, a carpenter, was an unwilling witness of the seizure at close range. He went to Tomlinson's home to see about work he was to do. Just as he approached the door, the cars of officers arrived.

**MANACLED TO TREE**  
Singleton ran down the walk and officers seized him. He was handcuffed and tied to a tree until the battle was over. Then he established his identity and was released.

A crowd gathered about the house while the battle was in progress. Police lines kept the spectators out of the range of gunfire. After the bodies were taken to the morgue, hundreds surged about the building, attempting to get a glimpse of the dead outlaws. All but those on official business were denied admittance.

Death of the Young brothers marked the climax of the most intensive manhunt the Southwest has known in years. Murder of Sheriff Hendrix and his five companion officers at Springfield started hundreds of police, sheriff's deputies and members of the American Legion on a search of the entire Ozark region of southern Missouri.

**TIME TO PRAY**  
Aided by their knowledge of the country, the brothers evaded their pursuers, stole an automobile and drove south. They escaped from the farmhouse home of their mother just as dusk fell last Saturday, an hour after the massacre of the peace officers.

**SPRINGFIELD, Mo., Jan. 5. (U.P.)**—Six relatives of Harry and Jennings Young were held in the Greene county jail here tonight, charged either directly or indirectly in the murder of six Missouri peace officers here by the dead brothers. Harry and Jennings killed each other in a Houston, Tex., cottage rather than surrender to officers who had surrounded them.

"It's terrible," sobbed their mother, 66-year old Mrs. Willie Young. "It was best for them to die before they were captured. I hope to God they had time to pray."

### SOUTHWEST IS HIT BY SNOWS

**KANSAS CITY, Mo., Jan. 5. (U.P.)**—Snow storms, bearing a flood threat to Oklahoma and tying up motor traffic in Nebraska, swept into the southwest tonight. Storms were prevalent over sections of Nebraska, Kansas, Missouri, Oklahoma and Texas. Residents along central Oklahoma rivers were warned that the Washita river basin had spilled over its banks. Water stood several inches deep in the town of Pauls Valley.

### TRAIN HITS SLIDE, 1 DIES

**SALLISAW, Okla., Jan. 5. (U.P.)**—A Kansas City Southern passenger train was partially derailed here today, crashing into a rockslide and plunging the locomotive and baggage car into the Sallisaw river. The engineer was killed and five passengers injured. Engineer E. Benjamin, of DeQueen, Ark., was killed, his body into the cold waters with the engine. All of the injured will recover, it was believed.

### N. Y. GRAFTING QUIZ IS AT END

**ALBANY, N. Y., Jan. 5. (U.P.)**—Termination of the Hofstadter committee's investigation of the New York city administration was asked tonight in a lengthy open statement by Charles F. Kerrigan, assistant to Mayor James J. Walker. The statement was addressed to Speaker Joseph A. McGinnies of the assembly and Senator George R. Fearon, Republican leader of the upper house, on the eve of the legislative session.

### GIFT OF FALSE TEETH FAILED TO WIN HUBBY

**CHICAGO, Jan. 5. (U.P.)**—Miss Mabel Caughey, 34, wants back the set of false teeth she gave to Samuel Bestow, 40, a married man. Miss Caughey told Judge John J. Rooney today that Bestow once promised to marry her. That, she said, was before she learned he already was married. But, she said, she kept on seeing him and gave him presents in the belief he would divorce Mrs. Bestow and marry her. Now, she says, he seems determined to go on living with his present wife, so she wants her presents back.

### POST OFFICE WORK URGED

At the meeting of the Las Vegas Chamber of Commerce yesterday noon, the greater portion of the time of the meeting was occupied by O. A. Kimball, who indulged in a discussion of what he termed "the building trades racket," having reference particularly to an account rendered him for electrical work and supplies in a building owned by the speaker.

Ryland Taylor reported that his committee on relations between Boulder City and Las Vegas would have a report to make next meeting.

E. G. McGriff reported that he expected his committee to meet with the board of county commissioners to discuss the matter of arranging for an exhibit of prehistoric Indian relics which are being rapidly removed from the county.

James Cashman reported that his committee expected to confer with the county commissioners on the matter of improving the road to Deer Creek.

Secretary Nye Wilson read a message he had sent to the secretary of the treasury relative to the progress of work on the Las Vegas federal building.

After a slight discussion a motion to discontinue payment for the use of a telephone in the Union Pacific eating house was carried. The phone has for several years been paid for by the Chamber and the Rotary club, half each.

Secretary Wilson stated that the Chamber is invited to send delegates to the final meeting of the Boulder Dam association, to be held at Fullerton, Calif., some time during January. President Yates was authorized to appoint such members as signify their intention of attending the meeting as delegates to represent the Las Vegas Chamber of Commerce. The Boulder Dam association was for about ten years one of the active and powerful influences in shaping Boulder dam policies and rousing public opinion in the southwest.

### GUARD SINKS RUM RUNNER

**EDGEMERE, LONG ISLAND, N. Y., Jan. 5. (U.P.)**—The 45-foot launch Patricia, an alleged rum runner, was sunk in the Atlantic ocean five miles off the beach here tonight after a coast guard patrol had taken five cases of liquor and three prisoners from the launch.

The coast guard reported that patrol boat No. 2991, in command of Boatswain Thomas Coombs, discovered the Patricia and gave chase for five miles before catching up with the launch. Several warning shots were fired by the government boat.

The patrol boat finally drew alongside and the three men aboard the Patricia and the liquor were taken aboard. A volley of tracer bullets was then fired into the Patricia, which caught fire and sank.

### TEACHERS REACH LAS VEGAS AFTER FIGHT WITH SNOW

The Tonopah-Las Vegas highway was reported open again today after having been blocked by huge drifts of snow since Saturday. Both Goldfield and Tonopah summits were reported blocked by drifts Sunday, heavy winds driving the snow across the highway as fast as it was cleared.

Motorists southbound were delayed in Goldfield two days. A party of Las Vegas school teachers, Miss Eva Adams, Miss Freda Humphrey, Mrs. Cuddy, and Harvey Dondero, were snowbound in Goldfield until yesterday morning, when they followed a snowplow over the Stonevall summit and out of the long gulch to the Goldfield-Beatty road. They reached Las Vegas early Tuesday morning.

### CHRYSLER PLANT AT L. A. PLANNED

**LOS ANGELES, Jan. 5. (U.P.)**—Plans for construction of a \$3,000,000 Chrysler automobile and truck assembly plant were announced today by the Los Angeles chamber of commerce. The Los Angeles plant will be the Pacific coast headquarters for the automobile concern, and its construction and operation will provide employment for hundreds of people. Date for start of the project was not announced.

### CANCER CELLS GROWN IN "GLASS HOUSES" HELP SCIENCE IN COMBATING DISEASE

By HOWARD W. BLAKESLEE (Associated Press Science Editor)

**NEW YORK, Jan. 5. (U.P.)**—Search for a cancer cure begins 1932 with new and promising ammunition in the form of little, round glass dishes in which living cancer cells are grown artificially.

This is the first opportunity of medical science to study live cancer cells uncontaminated and unobscured by other substances. The cancer cells are grown artificially at Columbia university and Johns Hopkins by a method recently perfected at the latter institution by Mr. and Mrs. G. O. Gey.

At Columbia in the Crocker institute of cancer research, Dr. Francis Carter has observed these cells moving about in their glass homes. This confirms the previous belief of experts that the cells are alive. Furthermore it is observed at Columbia that some cells can move more rapidly than others. The speedier cells are usually those belonging to the worst types of cancer.

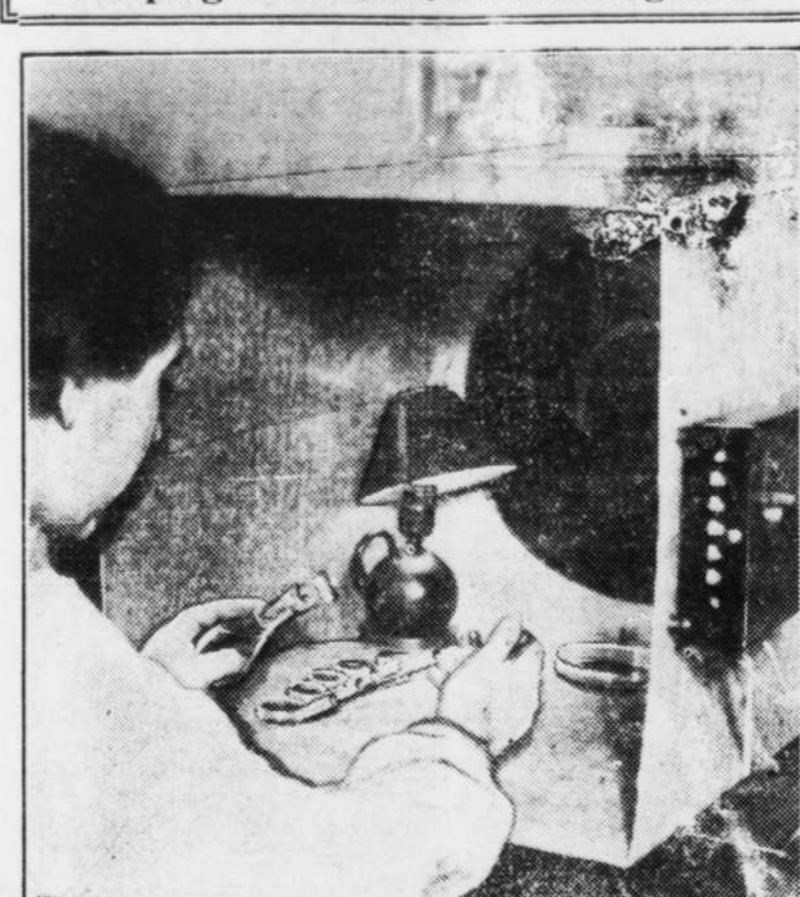

There are not merely a few different kinds of these cells, but scores, possibly hundreds, each different in some respect. This verifies what has been learned previously by other methods, that cancer probably is not a single disease, but something fundamental, which produces a great variety of forms.

Some of the cells in the glass dishes at Columbia die quickly under X-rays, while others resist. The differences range all the way from cells as difficult to kill as healthy flesh to some so sensitive that they die under only 15 per cent of the X-rays needed to destroy normal flesh.

The cells come originally from cancer patients in hospitals. They are placed in shallow glass dishes containing a water-clear substance called plasma. It is made of salts and parts of blood of cattle. The work is exacting. If even one of the germs ordinarily floating everywhere in the air gets into a cancer dish, it ruins the entire growth. So the cells are fed in specially washed air, with a sterilizing flame at hand for all instruments.

The operators may not even talk when feeding the cells. Between meals the glasses are sealed against contamination. These cancer cells are not especially dangerous to the scientists who keep them alive. When Dr. Gey went on vacation last summer he had no one to care for some valuable cells. So he carried them in one vest pocket and their meals in another. The first steps are to observe all the different kinds of cells. Their processes of multiplying rapidly, which is considered the real reason why cancer is a dangerous disease, can be seen under the microscope. Some kinds have been found which survive artificially only a few months. Others seemingly can be kept alive indefinitely.

### Keeping Cells Alive Is Exacting Job

Cancer cells grown at Columbia university are aiding medical science in its hunt for a cancer cure. A research worker is shown feeding the cells which are contained in the row of button-like dishes between her hands. In her left hand the feeder holds a large tube containing the special liquid diet and in her right a glass tube which places a drop of liquid in each dish. The cells are fed every 48 hours in washed air.

These cancer cells are not especially dangerous to the scientists who keep them alive. When Dr. Gey went on vacation last summer he had no one to care for some valuable cells. So he carried them in one vest pocket and their meals in another. The first steps are to observe all the different kinds of cells. Their processes of multiplying rapidly, which is considered the real reason why cancer is a dangerous disease, can be seen under the microscope. Some kinds have been found which survive artificially only a few months. Others seemingly can be kept alive indefinitely.

### TUESDAY IN CONGRESS

By UNITED PRESS

**SENATE**  
President Hoover's two-billion-dollar reconstruction finance bill approved by sub-committee. LaFollette-Costigan relief committee heard new evidence of disbursements in Birmingham, Ala., and Seattle, Wash.

Clarence Dillon, of Dillon, Read & Co., denied before finance committee that his firm bribed officials of foreign governments to get business. **HOUSE**  
Considered emergency deficiency appropriation bill pending submission by ways and means committee of Democratic tariff bill.

Vinson bill for construction of 120 new warships over period of ten years endorsed by Secretary of Navy Adams and Admiral William V. Pratt.

John Barton Payne, chairman of American Red Cross, told agriculture committee his organization was prepared to distribute 40,000,000 bushels of farm board wheat voted yesterday by senate. Chairman Hobbs of President Hoover's Muscle Shoals commission urged leasing of plants to farm organization for manufacture of fertilizer, in appearance before military affairs committee.

**MISS WELLS BETTER**  
Miss Frances Wells of 118 North Eighth street, who has been in Los Angeles receiving treatments, is reported as recovering.

### Haemophilia Victim May Yet Live, Believe Surgeons After Operation

**SAN FRANCISCO, Jan. 5. (U.P.)**—Constantly guarding against the reopening of wounds that are slow in healing because their patient is a victim of haemophilia, physicians attending Thomas F. Sanford, 65, well-known English professor at the University of California, expressed new confidence tonight in his ability to recover completely from a major operation.

Only the quick response by former students of Professor Sanford to an appeal for donations of blood, and the vigilance of his doctors, have kept the educator alive during the past week. From the thousands of scholars who passed through the class room of Professor Sanford during the 40 years he taught at the university, thirty men volunteered to give up part of their blood.

Haemophilia is a condition of the blood caused by a deficiency of blood platelets, and those who are afflicted bleed profusely. In some cases they live only a few hours. Dr. Fred H. Kruse of the University of California hospital staff, said the instructor had stopped bleeding following a blood transfusion today. The doctors had to perform two transfusions in one day last week but they can now achieve the same results with transfusions three or four days apart, Dr. Kruse said.

**HARMON TO LEAVE**  
District Attorney Harley A. Harmon plans to leave this evening for San Francisco.

**LONGS RETURN**  
Mr. and Mrs. George Long and daughter returned yesterday morning from Santa Anna, Calif., where they spent the holidays with Mrs. Long's sister.

**OAKES ILL**  
L. J. Oakes, local photographer, is confined to his home suffering from a serious illness, according to latest reports.

**LASKYS RETURN**  
Charles Lasky and wife of Lasky's shoe store, have returned after a two weeks' visit in Los Angeles.

**RECHARGE BATTERIES**  
Firestone Battery Agency  
Pep 'Em Up  
L. L. BRUNSTETTER  
Phone 766 107 So. 5th St.

**NOTICE**  
ALL CITY LICENSES NOT PAID BY NOON SATURDAY, JANUARY 9TH, WILL BE PENALIZED 25% OF THE LICENSE FEE ACCORDING TO NEW CITY ORDINANCE NO. 184.

VIOLA BURNS, City Clerk.

### 3 INITIATED INTO EAGLES

Three new members were initiated into the Las Vegas Aerie of Eagles, No. 1213, last night with due ceremony in the Eagles hall. The men so honored were H. A. Sisk, T. L. Roberts and Frank M. Ryan. A good turnout was present for the initiatory rites and a delicious luncheon was served after the meeting by the organization.

### SUSPECT WILL PLEAD GUILTY

**NEW YORK, Jan. 5. (U.P.)**—Three Italians, arrested today as suspects in last week's nation-wide bomb plot, were released tonight after two postal clerks from Easton, Pa., failed to identify them as being connected with bomb explosions there Wednesday.

**EL PORTAL**  
NEVADA'S FINEST THEATRE

Today and Wednesday  
SOMETHING NEW IN SCREEN ENTERTAINMENT  
**"LADIES OF THE BIG HOUSE"**  
with
