in the crust the lava escapes to the surface and spouts out in the form of a volcano.

Pull Of Sun On Andes' Pent-Up Lava Jefferson, Jackson Overboard At MARRIED IN L. A. Seen As 'Trigger' Starting Eruptions Giving A Volcano A 'Lift'

Just as the attraction of the sun and moon causes the tides, so one scientific theory holds that their "pull" may release molten lava under pressure within the earth and thus cause eruptions such as those occurring in the Andes mountains. Map shows location of volcanoes and area visited by showers of ash.

Pull of the sun or moon on the stopper" again. earth may have set off the Andean
