## Calling Out a Million Workers

Officials of the United Textile Workers' Union are shown sending out the formal call for a walkout of approximately 1,000,000 workers in the textile industry. Francis Gorman, left, chairman of the strike committee, gives the order to Robert Shearly, telegrapher, while Thomas F. McMahon, right, president of the union, looks on.

### WONDER-FAIRVIEW DISTRICT NEVADA, STARTS WORKING

RENO — There are many people familiar with the old mines about Wonder and Fairview in eastern Churchill county who hold to the belief that some of these properties are destined to be great wealth producers.

Henry Baxter and Roy Thompson were given a short-time lease on a part of the Jackpot mine at Wonder and they left the same day with lumber to make some repairs and will install an old eight-horsepower hoist that was used by the first operators.

They will begin on the 800-foot level and work up and it is claimed that ore worth several thousand dollars is ready for stoping. C. E. Wood, a mining engineer well known in Nevada, recently made an examination and is said to have made a very favorable report.

There is also said to be a deal pending with San Francisco men for the exploration of the mine at

depth and the building of a reduction plant later if conditions warrant.

In the meantime "Ingersoll Slim" McGlynn, who, with Judge J. A. Sanders, chief justice of the Nevada Supreme Court, holds a bond on the property, is putting in new ladders in the shaft from the 200 foot to the 300-foot level and will later continue the work to the 400. The shaft is said to have a depth of more than 700 feet.

Judge Tom McNiell, who owns adjacent property, will equip it with power drills, it is reported. A depth of 100 feet has been gained and there is said to be an encouraging showing in the bottom.
