

Gate Bridge Nearly Finished

SAN FRANCISCO, Calif., Feb. 18.—The completion next May of the great Golden Gate Bridge, longest suspension span ever constructed, will be the signal for a spectacular four day celebration in San Francisco, which promises to echo around the world.

Sweeping majestically across San Francisco's famed Golden Gate, through which the Argonauts first glimpsed the land of their golden hopes 88 years ago, this gigantic bridge is one of the most impressively beautiful structures built by man.

Two years from now, the Golden Gate Bridge and the San Francisco-Oakland Bay Bridge will be memorialized by the glamorous Golden Gate International Exposition. The exposition site will be a man-made island between the two huge spans and will symbolize the progress and spirit of the eleven western states.

The Golden Gate Bridge Fiesta, as the opening celebration will be known, is to be held from May 20 to 23 and is aimed to eclipse anything of its kind ever seen in the West. Plans already advanced call for a series of brilliant and colorful land, water and aerial pageantry and other activities for four wondrous days and nights.

It will be a fiesta of free-souled gayety, laughing, dancing and making merry together with San Francisco and its picturesque Redwood Empire counties to the north holding "Open House" and inviting the world to enter and visit.

The celebration is to be international in scope, for the \$35,000,000 bridge will break the last major water barrier to the north of San Francisco and offer a continuous highway between Canada and Mexico via San Francisco and the Redwood Empire along the northern coast of California.

The President of the United States has been asked to attend in person, the President of Mexico will be invited, as will be the Governor General of Canada, the Lieutenant Governor of British Columbia, the Governors of every state in the United States, and representatives of every other foreign government.

BED ROCK

GEOLOGISTS tell us that even bed-rock moves. But it shifts so gradually that it makes a safe, sure base for the largest structure. This bank, too, is moving with the times. But the movement is always gradual, along predetermined lines. Every succeeding move has merely served to further strengthen and consolidate its underlying stability. Each year finds this bank in even better position to serve its many clients and depositors.
