

## Chief To Leave For Washington

Chief Dave Mackey will leave on Sunday for Washington, where he will be for three months as a student in the federal school for prevention and punishment of crime.

The school gives free instruction in the most modern methods of

criminology to a few chosen officers from each state in the union. Chief Mackey was one of the two chosen from Nevada.

A farewell dinner was given the Chief Thursday evening at the Apache hotel, at which a group of friends gathered to give the traveler proper advice, etc. Among other things Chief Mackey was presented with a school kit including lunch box, ruler, pencil and other adjuncts of the primary grade.

## The SNAPSHOT GUILD

Snapshotter! Spring Has Come!

The family news photographer records the start of the spring baseball practice of a great team. The speed (?) ball was "caught" at 1/250 second at f.6.3.

NOW comes the time of year when according to the poets, "Spring unlocks the flowers to paint the laughing soil," when "The joyous book of Spring lies open, writ in blossoms," when "Spring is in the world and all things are made new."

In the Spring, according to the meteorologists, the sky grows brighter, the sun stronger. According to the psychologists, the human urge for action also waxes stronger, and, according to the astrologers, Spring is an auspicious season.

Add these all up and the answer is that it is a grand time for picture taking. Beauty, light, action and omens of good luck—all fresh and new—what more promising conditions can an amateur photographer ask for?

So, if that camera has been hibernating in the closet all winter, get it out, dust it off, clean the lens, load up and start shooting. With even half an eye at what you are shooting at, you are bound to get pictures that will bring you lasting satisfaction.

Pretty backgrounds of flowers and foliage are waiting. Children are out

playing, always good subjects for story-telling snapshots, including the young Babe Ruths who are whacking 'em out once more on the sandlots. The season for hikes and auto excursions has begun with opportunities for beautiful scenic pictures of nature in her new dress; also for picnics which simply compel the presence of a camera; also for parades—ta-ra-ra! Have you a good picture of a drum major in your album yet?

And once more along comes the circus where, "under the big top," with extra fast film and an ultra fast lens, you may capture thrilling snapshots of that young man on the flying trapeze, not to mention revealing close-ups of the bearded lady and, as the circus press-agent would say, perfectly paralyzing portraits of the ponderous pachyderms.

Soon, too, school and college commencement celebrations will be with us, and June weddings—outstanding occasions for taking memory pictures, always to be cherished.

It's true. Snapshot time is here again. It's Spring! New pictures everywhere! Arise and shoot!

### A GOOD RECORD

In a period of 150 years the congress of the United States has exercised its power 40,000 times. In that period the supreme court has declared invalid only 75 acts of congress. That is a fine showing of judicial fairness on the part of the court. Yet we hear a lot of criticism of the court for its "narrow interpretation" of laws to work within the framework of the Constitution. —Rio Vista, Calif, River News.
