

Large Crew Works Mine

A 15-man crew has been working steadily for some time at the National mines and shipping for M. E. MacDonald and P. H. O'Neill, owners.

MacDonald, who recently visited Winnemucca on business, said the ore is almost "unbelievably rich," running from \$25 to \$30 a pound.

MacDonald, who has been on the properties more than a year, and expects to make the mine his home for several years to come, said the work at present consists of mining the exceptionally high grade ore and cleaning up the dumps.

The ore, he said, is mined, handled with a ball mill at the mine, amalgamated, and the bullion shipped.

He refused to comment on the amount of high grade blocked out or the probable continued extent of the present operations.

KANSAS BEAUTY DIET

"Coffee and doughnuts are two of the world's greatest beauty preservers," the Kansas City Kansan declares. "The husband has coffee and doughnuts for breakfast downtown so that his wife can have her beauty sleep."—Topeka Daily Capital.

Although friends are not "urging" him to do so, Ye Ed has about decided to run for governor in '38, and should he be defeated in this attempt, he may run for President in '40. Personally it doesn't matter to which office he is elected, either one will do, for the plain, simple cause of this yearning for office is the fact he hasn't had an opportunity to go fishing for over two years. —Greenleaf, Kan., Sentinel.

Truth expressed in poor grammar is more important than a silly ideal expressed in elegant phrases. —Atchison Globe.

A man who drives a gasoline truck and lived long enough to retire on a pension naturally attracts some attention.—Topeka State Journal.

Yes, times do change. Take crossing the continent for instance. First it was the covered wagon, then it was the railroad, and now the trailer.

It pays to be honest. If you do something naughty, and then voluntarily tell your wife about it, the chances are that she won't believe you.

One good way to keep from getting old is to drink a couple of highballs and then take your car down the road to see whether or not it can do ninety.

The only difference between playing the horse races and the stock market is that the agony of losing lasts a little longer on the stock market.

A lot of young folks used to think that their elders ought to be chloroformed upon arriving at the age of forty. But not any more—when it will soon be possible to live off the old folks' "social security" pensions.

BRAGG TAKES OVER SWEETWATER IN SURVEY

ELY — J. S. Bragg, mining engineer who handled more than \$250,000 in development and exploration work in the Hamilton district from 1920-24, announced he has taken a lease on the Sweetwater claims on Treasure Hill at Hamilton from Carl Muir of Ely.

Bragg declared he is confident only a part of the silver has been recovered from the old camp which produced millions in the 70's, estimating only about 20 per cent of the ore bodies present have been found. The Sweetwater claims are north of the old workings.

A birthday item in a Missouri paper ended happily with this sentence: "At the last table sat grandpa and the birthday cake, beautifully lit up."—Kansas City Star.

200-Ton Mill To Be Built At Nivloc

A repair crew has recently been employed at the Nivloc mine, located eight miles southwest of Silver Peak in Esmeralda county, and it has been reported that designs have been completed for a mill of 200 tons or more capacity. This property was acquired under option of purchase a short time ago by the Bralorne corporation of Canada, which is said to be a syndicate of wealthy operators.

VERMONT

Since Vermont has repealed her amusement tax she can laugh at the rest of the country without cost. —Pittsburgh Post-Gazette.

According to the Literary Digest, persons in Japan desiring to install a telephone must often wait a year or longer for service. As might readily be guessed, Japan's telephone system is run by the government.

SEE Boulder Dam Exhibit RECREATION CENTER

A Working Model of Boulder Dam. A reproduction in miniature, showing by the use of water the operation of appurtenant works at Boulder Dam. You can see the complete underground structure of the project on the Arizona side. Your presence and cooperation in attending this showing will help to put this exhibit on the road as a permanent publicity organ for Las Vegas and Boulder City.

Our demonstration will show you Boulder Dam as it was during construction, as it is now, and as it will operate in the future.
