**Big Shipments** Being Made

The Mountain City Copper company is shipping a hundred tons of crude ore that averages twenty per cent copper or more and 150 tons of concentrates daily to the International smelter at Toule, Utah, it was said by John A. Fulton, director of the Mackay School of Mines, after a visit to the district in northern Elko county.

#### Largest Ever Found

A short description of developments since discovery of the great body of copper by S. F. Hunt several years ago discloses the fact that here exists one of the largest bodies of high grade copper ore ever found in this country.

After sinking a shaft to a depth

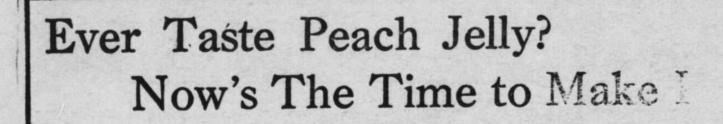

ed zone Mr. Hunt entered a deposit of secondary ore and shipped a number of carloads that averaged around 40 per cent, and this led to the purchase of the ground by the present company.

#### **New Shaft**

A new working shaft was sunk several hundred feet to the east and drifts were extended into the ore on the two, three and four hundred-foot levels, and it was not long before a mill treating five hundred tons daily was in operation, and a net revenue said to approximate a quarter of a million dollars monthly was being derived. It is estimated that above the 400-foot level there is enough or

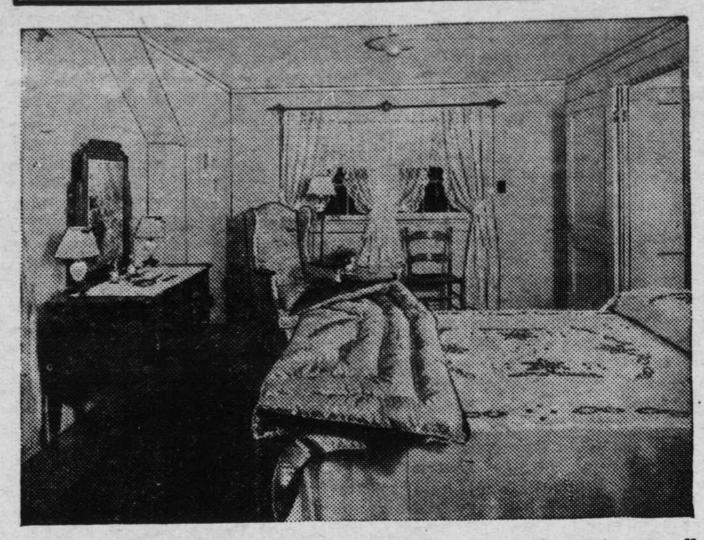

blocked out to supply the present milling facilities for three years or more.

More than 600 concessions will be on the forty-acre fun zone of the 1939 Golden Gate International Exof about 250 feet through a leach- position.

# Low-Cost Bedroom

This room shows the generous proportions of a bedroom in a small home. A window located next to the dressing table provides cross ventilation and there are two adequate closets which do not appear in the photograph. The Insured Mortgage System of the Federal Housing Administration provides budgeted rent-like payments, which include taxes, interest, and other fixed charges, as well as a portion of the principal.

# WHO BUYS FARM PRODUCTS?

PERCENT OF TOTAL COMMERCIAL FARM PRODUCTION PURCHASED BY MAJOR MANUFACTURERS AND DISTRIBUTORS

and delicate foods-and there's really nothing quite like a glass of constantly. Then bring to a full sparkling peach jelly for waking up warm-weather appetites. The Remove from fire, skim, pour delicious flavor of the spread flatters your salad and iced drinks . . . and its pale, sunbeam color is as pleasant to see as it is to eat.

Any and every fruit will jell today with the encouragement of proper directions and a half-minute boil! Choose fully ripe peaches, and your jelly will have every bit of the fine, fresh flavor of the fruit you use. Directions like these, when followed exactly, turn out a perfect product every time:

### Peach Jelly

8 cups (1½ lbs.) juice 6½ cups (2¾ lbs.) sugar 1 bottle fruit pectin

To prepare juice, remove pits from about 31/2 pounds fully ripe peaches. Do not peel. Crush in sugar, stirring constantly. (To peaches thoroughly. Add 1/2 cup water, bring to a boil, cover, and may be added.) Continue stirring, simmer 5 minutes. Place fruit in bring to a full rolling boil, and boil jelly cloth or bag and squeeze out hard 1 minute. Remove from fire, juice.

large saucepan and mix. Bring to a (6 fluid ounces each).

TOT, summer days call for cool | boil over hottest fire and at once add bottled fruit pectin, stirring rolling boil and boil hard 1/2 minute. quickly. Paraffin hot jelly at once. Makes about 9 glasses (6 fluid ounces each).

### Peach Jam

31/2 cups (13/4 lbs.) prepared fruit 4½ cups (2 lbs.) sugar 1 box powdered fruit pectin

To prepare fruit, peel about 21/2 pounds fully ripe soft peaches; pit and grind or crush thoroughly.

Measure sugar into dry dish and set aside until needed. Measure prepared fruit into a 5- to 6-quart kettle, filling up last cup or fraction of cup with water if necessary; place over hottest fire. Add powdered fruit pectin, mix well, and continue stirring until mixture comes to a hard boil. At once pour reduce foaming, 1/4 teaspoon butter skim, pour quickly. Paraffin hot Measure sugar and juice into jam at once. Makes about 8 glasses
