

# CHURCHES

**CHRISTIAN SCIENCE SOCIETY**  
316 South Fourth street, across from grammar school, is a branch of The Mother Church, The First Church of Christ, Scientist, Boston, Massachusetts. Meets every Sunday at 11 a. m. Sunday school at 9:30 a. m. and Wednesday evening at 8:00.

Christian Science reading room, 112 North Third street, open week days, except holidays, from 1:15 p. m. until 4 p. m. Evenings, except Wednesdays, from 7 until 9 o'clock.

First Church of Christ, Scientist, 316 South Fourth street, across from grammar school, is a branch of The Mother Church, The First Church of Christ, Scientist, Boston, Massachusetts. Meets every Sunday at 11 a. m. Sunday school at 9:30 a. m. and Wednesday evening at 8:00.

Christian Science reading room, 112 North Third street open Mon., Wed., Sat., except holidays, from 1:15 p. m. until 4 p. m. Evenings, Tues., Thurs., Friday, from 7 until 9 o'clock.

"GOD" will be the subject of the Lesson-Sermon in all churches of Christ Scientist Sunday, January 2 1938.

The Golden Text is from Psalms 77:13. "Thy way, O God, is in the sanctuary; who is so great a God as our God?"

The Lesson-Sermon includes the Bible passage, "Look unto me, and be ye saved, all the ends of the earth; for I am God, and there is none else." (Isa. 45:22.)

Also correlative from the Christian Science textbook, "Science and Health with Key to the Scriptures," by Mary Baker Eddy, "The starting point of divine Science is that God, Spirit, is All in all, and that there is no other might nor mind.—That God is love, and therefore He is divine Principle." (p. 275.)

Boulder City Rotary Club turned its Wednesday noon meeting into a tribute to "Parson Tom" Stevenson who met a tragic death when struck by a speeding automobile Christmas Eve.

"Parson Tom" had been chosen by the club before his death as an honorary member of the club and, had he lived, would have been received as a member at Wednesday's meeting.

Rotarian C. D. Wyatt for the club, paid an affectionate tribute to the dead pastor and a reply was made by Rotarian Stevenson, the brother of "Parson Tom," who came and had preached the funeral sermon over the remains of the dead man.

Expressing only pity for the plight of the driver whose car killed his brother, the speaker made a plea for the removal in some way of the menace which those who drive automobiles after drinking intoxicating liquors create.

## RUBY HILL SHIPS ORE

The Eureka Corporation company shipped nine cars of ore over the local railway from Ruby Hill to Utah smelters.

Diamond drilling at Ruby Hill was delayed during the past week owing to repairs needed on the pump.

A two-day holiday was given to the men employed in the mines on Ruby Hill. Manager Clean Anderson left here for southern California last Thursday.

# Edison Company Finishing Line

The Southern California Edison company is stretching aluminum wires on its single circuit transmission line which will carry the company's allocation of Boulder dam power to the Los Angeles area.

The line will carry electricity at a 220,000 voltage, while the Los Angeles Power Bureau double circuit line is designed for 287,000 volts.

The Edison Company line will cost, according to estimates announced, approximately four million dollars.

# Gen. Sweeney To March On Vegas

Capt. Charles L. Hall reports that General Walter C. Sweeney, commandant of Fort Douglas, Utah, is contemplating a practice march for the 38th Infantry, to Las Vegas and the Boulder dam area early next June.

The 38th Infantry, stationed at Fort Douglas is composed of between 800 and 900 men. It is commanded by Col. Robert S. Fulton, with Maj. McNeal as executive officer.

General Sweeney as well as all other officers are well known in Las Vegas and arrangements will be made to give them a hearty welcome on their visit.

# Nevada Farmers Plan Power Use

Additional power from Boulder dam will be used soon on a non-profit, co-operative basis by farmers of the state early next year when ranchers in Eagle and Rose valley in Lincoln county form their own power users association and put it into operation.

The first steps looking toward the use of the power have already been taken.

Meetings to thresh out the details of the plan have been attended by the farmers in the two valleys and agreements are now being drawn up. Louie Gardella, Lincoln county agent, and L. E. Cline, economist, of the University of Nevada Agricultural extension service, are working with the farmers.

The transmission line of Lincoln county power district No. 1 which supplies current from Boulder dam to the Pioche mines, passes near the properties of the farmers, and they have made arrangements to tap it.

They will receive the current at wholesale, and will distribute it to the various members of their organization on a cost basis. Special lines for distribution will be constructed by the farmers themselves. About 20 farmers are in the two valleys, and all are expected to become members of the association.—Humboldt Star.

## CATTLE DEHORNING CHUTE DEvised BY NEVADA AGENT

A new Nevada livestock dehorning chute, low in cost and efficient in operation, has been developed in Humboldt county, and is being used there and in other parts of the state.

Devised by Paul Maloney, Humboldt and northern Lander agricultural extension agent of the University of Nevada, in cooperation with several ranchers, the new chute is said to be easily and cheaply constructed on the average ranch and to possess an efficiency equalled only by the most expensive manufactured dehorning outfits.

With the spring dehorning season not many months away, many livestock men are at work building the new chute.

One of the special features of the chute is its speed of operation, which has been proved over four years of use on Humboldt county ranches.

Without any attempt to set a record an average of a hundred adult animals is dehorned in an hour Maloney says while with yearlings 120 can be run through.

Important in the speed of operation of Maloney's chute is a new side gate, which gets the animal quickly out of the device as soon as it has been dehorned.

The danger of injury to cattle with the new chute is negligible, according to the extension agent. In the four seasons the chute was used in Humboldt county more than 50,000 animals were dehorned without injury either to cattle or to the men who were handling them.

"Without hiring any skilled labor, any rancher can construct one of these chutes at a cost for materials of not more than \$20 where all new material is used," Maloney states.

In Humboldt county he states, the actual cost of construction of these chutes, where some material was available on the ranch, has ranged from \$2.50 to \$12.

A bulletin of the University of Nevada agricultural extension service, giving working drawings, photographs, and full instructions as to the building of the chute, has recently been issued and is available, without charge, from agricultural agents or from the Nevada Extension Service, University of

Mr. and Mrs. Ike Adams have returned from Ventura, where they spent Christmas with Mrs. Adams' mother.

Mrs. Nellie Wiley and daughter have returned from Reno and are guests at the home of Mrs. Minnie Price.

Miss Barbara Ferron has been confined to her bed the past few days with an infected throat.

## LAS VEGAS WEATHER

Following are the maximum and minimum temperatures as registered by the thermometers of the government weather station in Las Vegas for the dates shown:

	Max.	Min.
Dec. 23.....	62	49
Dec. 24.....	62	33
Dec. 25.....	63	34
Dec. 26.....	64	27
Dec. 27.....	64	28
Dec. 28.....	63	36
Dec. 29.....	59	33
Dec. 30.....	65	34

# News of Mines Given Briefly

## RAILROAD AIDS SHIPPERS

EUREKA, Dec. 28.—The Eureka Nevada Railway company is reported planning on keeping an engine and train crew at Eureka in order that ore shipping from Ruby Hill may be facilitated. If this is done it is believed that three shifts of miners will be employed at the Richmond mines.

## MRS. EDWARD SYPHUS PASSES TO FINAL REST

A pioneer resident of the Moapa valley passed into the great beyond Tuesday, December 28. Mrs. Edward H. Syphus who with her husband lived for many years on their ranch in St. Thomas, died at the home of her daughter, Mary Frehner, in Logandale.

When the government purchased their St. Thomas ranch they lived in St. George, Utah, for a time, but later they went to Logandale to be with their daughter. She leaves three sons and four daughters to mourn her passing.
