Five East-West ore-filled fractures that meet the North - South Major Fault Vein shown on second sketch.

Mine is located on the main highway in the center of Eldorado Canyon, one mile west of Nelson. You can drive right to the shaft and mill. You need no expert to SHOW you. Investigate, then use your own judgment. The mine is patented. Title absolutely clear.

To start the ball rolling we are offering a small amount of stock for TEN CENTS per share, which is a great bargain. We reserve the right to raise the price without notice. Make all checks payable to the Eldorado Empire Mining Company.
