

Plan Conference On Real Estate

Real estate's place in today's economic picture, real estate business questions in today's market, real estate from the investor's viewpoint—these will be leading topics of discussion for a great Southwest regional conference of the National Association of Real Estate Boards announced today to be held at the Hotel Utah, Salt Lake City, June 6 and 7.

The conference, open to anyone interested in real estate, is being planned for the real estate boards of California, Arizona, Nevada and Utah, with Realtors from Colorado, Wyoming, Idaho and New Mexico invited to attend.

Realtors of principal Southwestern cities are forming "On to Salt Lake" committees to plan for their participation in the conference.

D. D. Watson, Oakland, California, vice president of the National Association of Real Estate Boards for the Southwest Region, heads the planning committee and will preside at general sessions. The Salt Lake City Real Estate Board, of which John W. Crofts is president, will be host to the conference.

Joseph W. Catharine, Brooklyn, N. Y., president of the National Association, will head the list of conference speakers, which will include national leaders in the fields of real estate brokerage, real estate appraisal, property management, home building and land development. Mr. Catharine will outline work now under way to strengthen and safeguard real estate advance and better our understanding of real estate use and of real estate value. Mr. Catharine, for the last two years vice president of the Association for the Central Atlantic region, is a past president of the Real Estate Association of the State of New York. Son of an Atlantic Sea captain, he has gone from office boy to head of the Chauncey Real Estate Company, Ltd., Brooklyn, one of the oldest real estate companies in the New York metropolitan area. He is vice president of the Kings County Savings Bank.

Mr. and Mrs. R. R. Russell of the Apache entertained Mr. Russell's mother and brother, Mrs. Dille Russell and Denny Russell of San Pedro, Calif., and Mrs. Russell's son, Fred Beeman, a student of U. S. C., over the weekend.

Beware Kidney Germs If Tired, Nervous, Aching

Are you Run Down, Nervous, suffer Aching or Swollen Joints? Do you Get Up Nights, or suffer from Burning Passages, Frequent Headaches, Leg Pains, Backache, Dizziness, Puffy Eyelids, Loss of Appetite and Energy? If so, the true cause often may be germs developed in the body during colds, or by bad teeth or tonsils that need removing. These germs may attack the delicate membranes of your Kidneys or Bladder and often cause much trouble. Ordinary medicines can't help much because they don't fight the germs. The doctor's formula **Oxytel**, now stocked by all druggists, starts fighting Kidney germs in 3 hours and must prove entirely satisfactory in 1 week and be exactly the medicine you need or money back is guaranteed. Telephone your druggist for **Oxytel** (Sias-tel) today. The guarantee protects you. Copr. 1937 The Knox Co.

Joseph W. Catharine, Brooklyn, N. Y., president of the National Association of Real Estate Boards.

D. D. Watson, Oakland, California, Vice President of the National Association of Real Estate Boards for the Southwest Region (which includes California, Utah, Nevada, Arizona and Hawaii).

NEWMONT IN TWO MINES IN NEVADA

Nevada holdings of Newmont Mining Corporation include 17 per cent interest in Getchell Mines, Inc., and 200,000 shares in Gray Rock Mining Co., at a cost of \$100,000, according to the annual report of President Charles F. Ayer.

Getchell Mines, Inc., has just completed and put into operation a new 600-ton mill on its gold property north of Golconda Hot Springs. Newmont owns 255,400 shares acquired at a cost of \$1,140,000. It is stated that the company has a practically unlimited quantity of \$8 ore, most of which can be mined by power shovel.

The Gray Rock property was formerly known as Elkor's mines and is located in the Jarbidge district.

Newmont controls and operates Empire Star Mining Co., at Grass Valley, Calif.

Mrs. Elmer Mikkelsen enjoyed a visit from her mother, Mrs. Mary Smith and little nephew, Frank Huber, last week. Mrs. Mikkelsen returned to Los Angeles with them Saturday and will remain there the coming fortnight.

General Bowley Inspects Camps

General Bowley and wife, and Bowley's aide, Captain W. B. Palmer from the Presidio in San Francisco, inspected the Boulder CCC Camps Saturday April 16th, 1938.

General Bowley served with distinction during the World War. He was in charge of the Fifth Corps Area before taking charge of the 9th Corps.

Captain Charles L. Hall, Camp Commander, escorted the party on a trip through Boulder Dam.

Zinnia Is a Bold Beauty

The zinnia of today is a bold beauty and a striking improvement over its ancestors.

Many new forms as well as new colors and color combinations have been developed by scientific plantmen. Zinnias like warm weather and the seed must be sown in warm soil. If the soil is cold they may decay and never germinate. If you sow the seeds of zinnias in the open ground where the plants are to remain, you will have early flowers, and sturdy plants.

Sow the seeds about 1/2 inch deep. Plants should be evenly spaced a foot to 18 inches apart, but may be sown more thickly and the extra plants moved to some other location. Firm soil over the seeds and in dry weather keep the ground moist until the plants emerge; this should be only a few days in warm weather. When the plants are growing vigorously they are likely to bloom best if not watered too frequently. As the florists' say "keep them on the dry side," but this does not mean they should not be watered thoroughly during drought periods.

The dahlia-flowered types are perhaps most popular. The flowers of these are of enormous size, up to 6 inches in diameter. The petals are slightly cupped and the stems are long with attractive foliage.

The California giants are other tall ones. They are excellent for planting in back of the dwarf and miniature zinnias, which grow into bushy border plants with hundreds of blossoms.

There is no more satisfactory flower for garden and for cutting than the zinnia, and for mass planting they are unrivaled. They are easily grown, bloom quickly from seed, and can be kept free of pests with an occasional dusting.

TRACES OF NORSE EXPLORATION FOUND NEAR LAKE SUPERIOR

In a dissertation on "The Norsemen in Canada, Alexander D. Fraser, associate professor of archeology at the University of Virginia, contends that the ancient Norse explorers, perhaps the first white men to reach America, entered by way of Hudson's Bay and not by the New England or Nova Scotia coasts, as held by some authorities. He states that no authentic traces of these hardy people have been found in New England or Nova Scotia, or, at east, no traces as creditable as those discovered recently at Kensington, Minn., and north of Lake Superior. At Kensington a well-preserved stone was found, bearing the date of 1362, which records the fate of Norsemen at the hands of Indians. Not far from the stone, Viking axes and hatchets were also found.

Professor Fraser cites as of the greatest importance of all the discovery of a Viking grave north of Lake Superior. In this grave, which came to light less than two years ago, were found an ax, a shield, and a sword of the eleventh century type, which are now in the Royal Ontario Museum at Toronto, Can.

In discussing his position, Professor Fraser argues that the Norse explorers reached Lake Superior by way of Hudson's Bay and the rivers which entered the Bay from the south. He argues with other archeologists that not only did the Vikings reach the shores of the New World in the tenth century—several hundred years before Columbus discovered and Island in the West Indies—but they explored areas known to them as Vinland and Markland, and perhaps founded settlements by which they maintained communication with the continent of North America for several centuries.

MANY INVENTIONS OF AUSTRALIAN ORIGIN

SYDNEY, Australia—But for the two Australian inventions, the "stripper" which strips or harvests the heads of grain, and the "stump jump" plough, half the land under cultivation throughout the world would have remained uncultivated. This opinion was expressed by the president of the Australian Institute of Engineers, who enumerated the following other inventions by Australians.

- The zipper fastener;
- The totalisator (betting machine);
- The sheep shearing machine;
- The first ice-factory (built at Geelong in 1850);
- The torpedo;
- The mono-rail car;
- The first airplane (a 5-pound model which flew 343 feet at 10 miles an hour).
- The Mitchell thrust bearing (a Melbourne invention that saved the British admiralty \$3,000,000 in four years).

FUNERAL FOR MRS. R. J. ROE

Final rites for Mrs. R. J. Roe were held Monday afternoon at the Garrison Mortuary. Rev. Charles H. Sloan read the service and Mrs. Ed. Waite sang appropriate solos. Mrs. Roe died suddenly Saturday morning of heart trouble. Besides her husband she leaves one daughter who is blind. The mother had been this girl's constant companion and tutor. Interment was in Woodlawn Cemetery.
