

Getchell Mill Is Completed

The mill at the famous Getchell Mine, expected to become one of the greatest producers of gold in the United States, will soon be operating at full capacity of 600 tons per day as the installation of two large filters recently purchased.

One of the large filters, which measures 14 feet by 14 feet, has already been installed while the other will be completed soon. The mine and mill is 43 miles east of Winnemucca in Humboldt county. Only

540 tons of ore per day has been passing through the plant since it began operation last winter.

The filters were brought by truck from the Central Tailings mill at Jackson, California. They are being installed in the southeast section of the large plant in the main mill building. The mill will be running to full capacity when they are installed and final details of the entire plant are checked.

The 600-ton plant is Nevada's largest and most modern milling plant. It employs both the oxide and sulphide circuits. Three conical ball mills are used in the oxide circuit.

Ore from a series of tunnels is to be delivered to the 500-ton coarse ore bin especially designed for the

product. Sulphuric fumes from the sulphide ores by an electric haulage system. Five 500-ton ore bins are at the mill. Three are used for the sulphide and one for the processed lime, employed in the cyanide circuit.

Treatment of the sulphide ore, mined from the underground stopes involves a primary furnace roast at a low temperature prior to introduction in the cyanide circuit. As the roasted or calcined ore flows from the lower discharge end of the furnace, it enters a cooling cylindrical revolving unit. It is then taken to a belt conveyor from which it passes to calcining tanks and on to the regular cyanide circuit, properly apportioned with the oxidized

Former Vegan B. and P. W. Head

Hallie O'Connor, formerly a resident of Las Vegas, but more recently residing in Carson City where Robert O'Connor, her husband, is employed, was elected state president of the Business and Professional Women's Clubs at the state convention of the order held in Vegas the latter part of the week. The announcement was made at the closing banquet held in the Apache Hotel Marine room Saturday evening.

Mrs. O'Connor was formerly employed as secretary in the offices of the A. C. Grant Ford agency in this city. She is a former president of the local B. & P. W. club and while here was active in the Chamber of Commerce and other civic bodies.

Grace Bowman of Pioche was elected first vice-president; Sylvia Upwall of Elko, second vice-president; Dorothy Brimacombe of Las Vegas, corresponding secretary; and Gloria Bowman of Reno, treasurer.

At the banquet Saturday evening Mrs. Billie Nelson president of the Las Vegas B. & P. W. club, acted as toastmistress, and introduced Mayor H. P. Marble, Judge Jack Lewis, P. B. Griffith, president of the chamber of commerce, and Frank Beam, president of the Kiwanis club, all of whom made short addresses, and Mrs. Ethel Zimmer of Reno, state vice-president; and Mrs. O'Connor, new state president.

Miss Mary Stewart of Sacramento, California, well-known educator and pioneer member of the national Business and Professional Women's clubs, was the principal speaker and praised the various activities planned by the hostess club of Las Vegas.

She said, "You invite us to Las Vegas in the summer time, and we come expecting to swelter in the heat. You plan our meetings in an air-cooled hotel. Then you take us to a heavenly canyon a short distance from Las Vegas where we hold our meeting in an open air amphitheatre, while we sit with coats wrapped around us. All this is remarkable and unforgettable."

The installation program was held at the breakfast given at the Boulder Dam hotel Sunday morning after which delegates left for the Grand Canyon to attend the regional convention.

furnace are discharged from an 80 foot stack near the main mill building.

Some 120 men are employed at the mine and mill. The Getchell Mine Inc., was formed in 1937 with an authorized capital of \$1,500,000.

Officers are George Wingfield, president; Noble Getchell, vice president and general manager; T. L. Wilcox, secretary - treasurer; Roy Hardy, consulting engineer; Fred Wise and Carl Wark, superintendents.

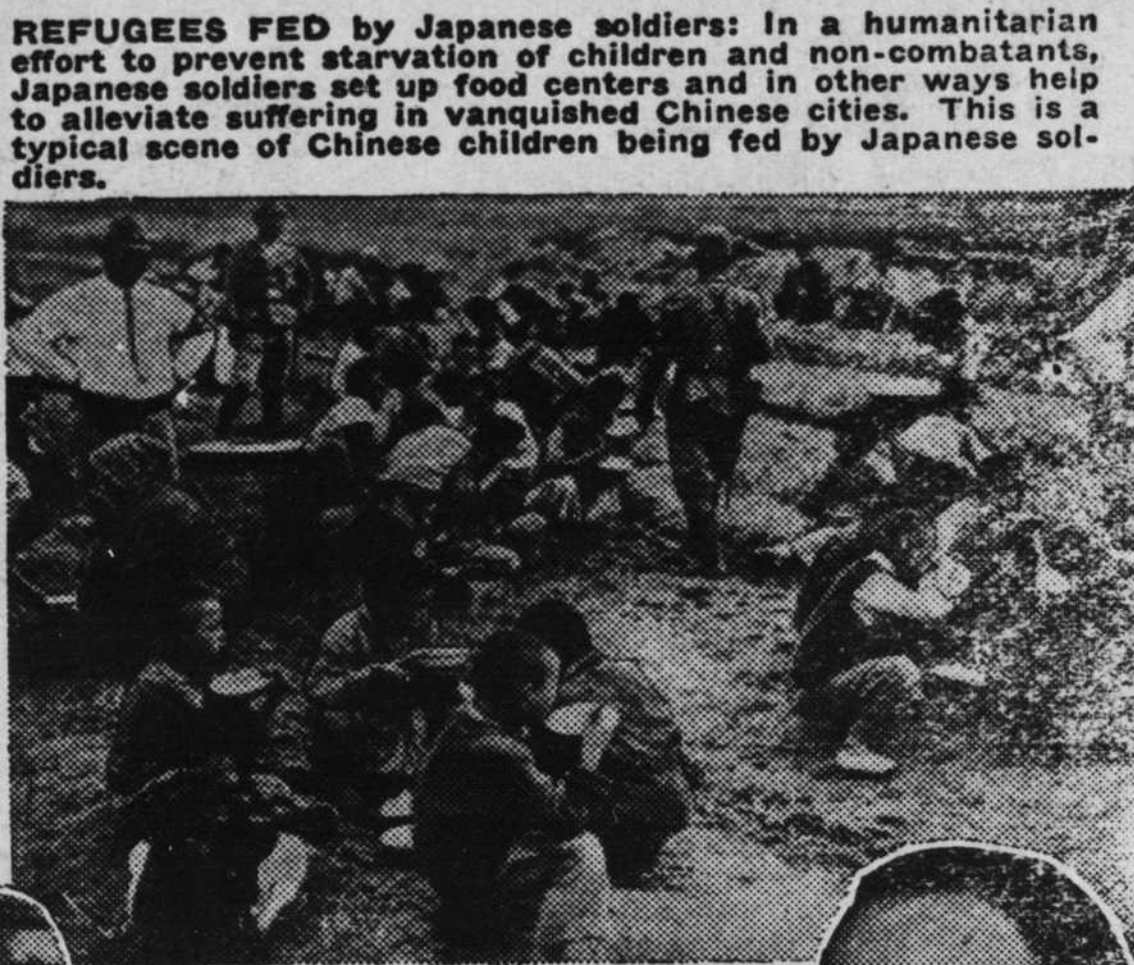

NOT A CHANCE

A political commentator says: "One favorable feature of the Iowa voting is that it might influence Washington brain trusters to leave politics to the practical politicians." But nothing has yet been able to influence the Washington brain trusters to leave business to the practical business men.

CAMERAGRAPHS

DAVE EELMAN, whose bent for hobbies has made him into one of radio's best known personalities, displays a few of the hobbies of which he talks on his new "Hobby Lobby" program heard Sundays at 7:00 p.m., EDST, over the NBC-Red Network.

REFUGEES FED by Japanese soldiers: In a humanitarian effort to prevent starvation of children and non-combatants, Japanese soldiers set up food centers and in other ways help to alleviate suffering in vanquished Chinese cities. This is a typical scene of Chinese children being fed by Japanese soldiers.

REST BETWEEN ROUNDS: Max Schmeling strikes a pose at his training camp where he is preparing for chance to wrest the heavyweight title from Joe Louis on June 22.

AL GARR, discovered by Phil Baker who calls him the "tenor find of the year," wins the stellar tenor assignment on John Nesbitt's "Passing Parade," heard Sunday evenings on CBS at 7:30 p.m., EDST.

LOCAL GIRL makes good! Susan Hayward is the proof that Hollywood still knows how to pick 'em. Susan was a clothes model—now she is a movie star.

TIME FOR VACATION, say Wallace Ford, popular motion picture star and lead of the prize winning play "Of Mice and Men," and his charming wife, as they stop to refresh and refuel at a Texaco station with Registered Rest Room facilities, a guarantee of cleanliness and comfort. Constant inspection by attendants and the supervision of the trained inspectors of the White Patrol assure them of a pleasant stop on the road.
