

The SNAPSHOT GUILD

A PICTURE A DAY—

Indoors... Outdoors... Wash-day... Birthday... family history is being made.

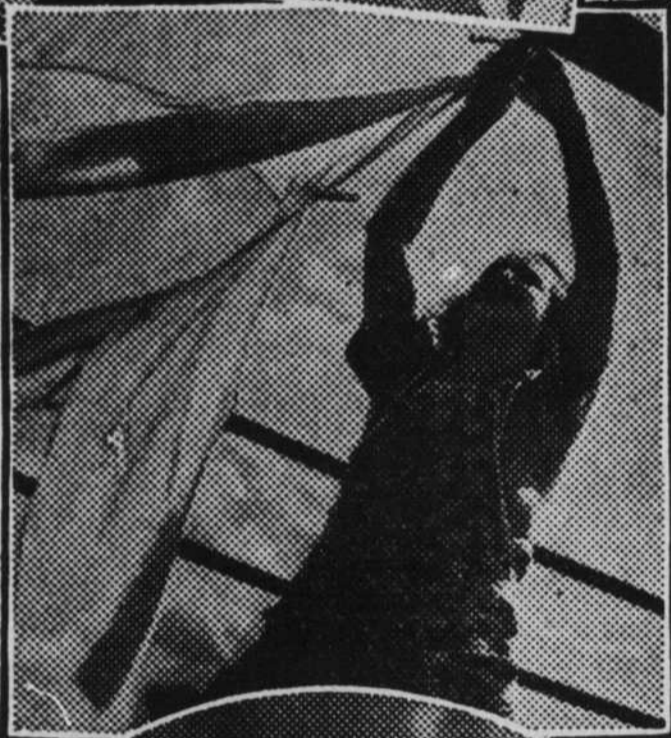

NOT long ago a young friend of mine married. He is a camera fan, like the rest of us, and he told me:

"My family history is going to be kept in pictures. I plan to take at least one roll of pictures a week—many more whenever possible. Whenever we do anything—move to a new house—go on a week-end trip—plant flowers—celebrate a birthday or an anniversary—add a new member—whatever it is, the story will be told in pictures."

His plans go further than that, too. His picture record is to be kept in handy, useful form. "There will be a new picture book for every year," he told me, "I plan to have the best shots enlarged, and mount the others contact size. Everything goes into the book, where we'll always be able to find it and recall—from our own snapshots—what we did in past days."

There, now, is an idea for all of us. In every family, things happen each day that we would like to remember. We buy new furniture, plant gardens, build a trellis for roses, put new screens on the back porch, take vacation trips. Children are born, grow up, change year by year. We change, too. And a true day-by-day picture-history of all our everyday activities, as well as activities not-so-everyday, would greatly enrich our memories in later years.

Let's make a mental note—make

Each family picture-book becomes more treasured as the years roll by.

It a household ritual, and abide by it. "A picture a day keeps the family history up to date. And a complete picture-book each year keeps it permanently."

John van Guilder.

Getchell Mill Is Heavy Producer

Seven hundred tons of ore are being treated daily at the Getchell mill, the Humboldt Star reports. The mill was designed to treat only 600 tons a day, but the increased output is made possible by careful preparation of the ore.

The mill, located about 43 miles east of Winnemucca, is one of the largest and most modern plants in Nevada. The Getchell Mine is regarded as one of the most promising now in operation in the state.

Problems encountered in the milling process are now being smoothed out, although it is expected to be some time before the plant is working perfectly. Two 14-foot fillers have been installed, eliminating the slimes problem.

Collectors were recently set in place, and calcinated ores are being sent to the seven-foot, 48-inch Hardinge ball mill direct from the roary furnace. From the ball mill, the ore is carried to the cyanide department by a Wifley pump. A new burner has been installed on the roaster.

The mill is designed to treat both oxide and sulphide ores, and more than 75 men are now employed at the mine and mill.

The property is operated by the Getchell Mine, Inc., with headquarters in Reno. George Wingfield is president; Noble H. Getchell, vice-president and general manager; T.

Fences Of Light Aid To Drivers

Greater safety in night driving has resulted from the "fences of light" formed by a new type of plastic reflectors set in units of three at 100-foot intervals along roadsides, it is indicated in recent reports to the signposting department of the Automobile Club of Southern California. This non-shattering, glass-like material casts a strong headlight reflection visible to front and rear for about a mile on straight road, it is claimed.

Along U. S. Highway 16 between Lansing and Detroit, Mich., where the first trial installation of the reflector "fences" was made, night accidents have declined 79 percent in three months from April to July compared with the same period a year ago, it is stated in a telegram report from Murray D. Van Wagener, Michigan state highway commissioner.

Effectiveness of reflectors is further indicated by the fact that daytime accidents declined only 37.5 per cent during the same period. Only nine night accidents were recorded on the highway for the same time a year ago. The record shows no fatal accidents at night for the same period this year as compared with four last year.

L. Wilcox, secretary and treasurer; Roy Hardy, consulting engineer; Fred Wise, mine superintendent, and Carl Wark, mill superintendent.

POLITICAL CARDS

W. B. ("Bill") MUNDY

(Incumbent)

DEMOCRAT

— for —

County Treasurer

Vote for Mundy Tuesday September 6, 1938

Sheriff

WISE

The wise and pleasant way to relieve a cough due to a cold is a Smith Brothers Cough Drop. (Two kinds: Black or Menthol—5¢.)

Smith Bros. Cough Drops are the only drops containing VITAMIN A. This is the vitamin that raises the resistance of the mucous membranes of the nose and throat to cold and cough infections.
