**Churches**

"MAN" will be the subject of the Lesson-Sermon in all churches of Christ, Scientist, Sunday, March 10, 1940.

The Golden Text is from Daniel 10:19, "O man greatly beloved, fear not: peace be unto thee, be strong, yea, be strong."

The Lesson-Sermon includes the Bible passage, "Verily, verily, I say unto you, He that heareth my word, and believeth on him that sent me, hath everlasting life, and shall not come into condemnation, but is passed from death unto life." (John 5:24).

Also the correlative from the Christian Science textbook, "Science and Health with Key to the Scriptures" by Mary Baker Eddy, "The admission to one's self that man is God's own likeness sets man free to master the infinite. This conviction shuts the door on death, and opens it wide towards immortality." (p. 90).

**Air Service May Join Reno and Las Vegas**

It may be possible that northern and southern Nevada will be linked by passenger and mail airplane service since the Nevada Airlines, Inc. laid preliminary groundwork toward a franchise.

Under the proposed schedule, a plane will leave Reno at 7:25 a.m. daily and arrive at 10:45 in Boulder City.

The time for the return trip from Boulder City will be 2:20 p.m. with the arrival at the Reno airport at 5:36 p.m.

Las Vegas and Tonopah will be regular stops, with stops at Carson City to discharge or take on passengers. During legislative sessions and if mail contracts should be given the company they would stop regularly at the capital.

**MAE WEST AND W. C. FIELDS NOW PARTNERS**

**Mae West and W. C. Fields In Comedy Smash**

Mae West and W. C. Fields, two of the most celebrated figures in the entertainment world, come to the Palace Theatre, Sunday, Monday, Tuesday and Wednesday in their new starring picture, Universal's "My Little Chickadee."

Heralded as one of outstanding screen combinations of all time, the curvaceous actress and the flaming-nosed funster blend their colorful personalities in a rip-snorting comedy of frontier days. The story is

said to be alive with rootin'-tootin' action played against a background of romance, skulduggery and music.

Mae is seen as a glamorous big-city belle who stirs up a mess of trouble when the boys of the wild and woolly frontier start to vie for her affections. Among "the boys" is Fields, as a medicine man and card sharp, who is completely captivated by Mae and strives throughout the film to claim her for his very own.

One of the strongest supporting casts of the year was assembled for the production. A partial list of players includes such favorites as Joseph Calleia, Dick Foran, Donald Meek, Gene Austin with Candy and Coco, Annie Nagel, Margaret Ham-

ilton and Ruth Donnelly.

In the film Miss West sings "Willie of the Valley," a new number written especially for her.

The story and screenplay of "My Little Chickadee" were concocted to assure generous portions of Western witticisms and Fieldsian fooleries.

Edward Cline, who piloted some of Hollywood's most successful laugh hits, and who was once a member of the famous Keystone Cops of Mack Sennett days, directed the film. Lester Cowan was the producer and Joseph Valentine, noted for his camera work on all of Deanna Durbin's films, did the photography.

**New Method For Finding Oil**

Oil producers everywhere are keenly interested now in the new method, popularly termed soil analysis, which is being employed in the search for oil fields. This is a practice that has been developed by chemists, and it is thought probable that for the next decade it will go hand in hand with geology and geophysics of crude oil supply.

things about this geochemical tool as compared with earlier geophysical methods," says the Chemical Bulletin, "is that while the latter determined only geological structures which are favorable to the accumulation of oil, but which may or may not actually contain oil, the geochemical methods apparently determine the actual presence of oil fields.

"If this is proven a part of time, it will mean that chemistry rather than physics has been the first science to provide an actual method of determining from surface
